A recent review of the situation showed that the specified web page is not currently displayed in our search results or has been removed. If you are still concerned about this issue, please send us the URL of the page in question, as it appears on the Google search results page.

Follow these steps to find the correct URL:

1. Type your query into the search box on Google.com and click **Google Search**.
2. Right-click the title of the site in question, and click **Copy link address**.
3. Paste the copied URL into your reply to this email.

It is unclear to us if you are the person whose rights are allegedly being infringed. If you are not, please explain your legal relationship to that person. For example, are you their legal representative or agent in this matter?

If your own legal rights are affected, or if you are the legal representative of this person, we can evaluate your complaint further. Otherwise, please ask the person in question or a legal representative to submit this removal request.

Regards,

The Google Team

Explain in detail why you believe the content on the above URL(s) is unlawful, citing specific provisions of law wherever possible. For requests other than defamation, Google shares the information in this open text field with Lumen for transparency purposes. Do not include any personal data in your explanation. For more information about Lumen, see here.

The content at the listed URLs is unlawful because it constitutes defamation under the Defamation Act 2005 (NSW) and equivalent Uniform Defamation Laws across Australia.
Publication: The posts and comments are published publicly on Reddit and associated competitor websites (aggropvp.com, skynetvslegion.com), making them available to a wide audience.
Identification: The content expressly names my business, Legion Killfeed, and myself ("Soul"), so readers clearly understand the statements refer to me and my service.
Defamatory Meaning: The material accuses me and my business of misconduct, dishonesty, and other negative behavior. These statements are presented as factual assertions, not opinion, and would cause a reasonable person to think less of me or my business.
Falsity: The allegations are false. They were created and promoted by a direct competitor in order to harm my reputation and divert customers. None of the claims can be substantiated by evidence.
Harm: These statements have caused reputational and commercial damage by misleading potential customers into believing false claims.
No Defences Apply:
The statements are not substantially true (Defamation Act 2005 (NSW) s.25).
They are not "honest opinion" because they are presented as fact without a factual basis (s.31).
They are not privileged communications.
Under Defamation Act 2005 (NSW), s.4, matter is defamatory if it "tends to lower the reputation of the plaintiff in the estimation of ordinary reasonable people." These publications clearly meet that test.
Accordingly, the material is unlawful because it is defamatory, false, and malicious in origin, published with the intent to damage a competitor.

In order to ensure specificity, please quote the exact text from each URL above that you believe infringes on your rights. If the allegedly infringing content is a picture or video, please provide a detailed description of the picture/video in question so that we may locate it on the URL in question.

On the following URLs, users post false and damaging statements that identify me (“Soul”) and my business (Legion Killfeed):https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue
The thread title itself (“what’s Soul’s issue”) frames me as problematic.
Within the post body, the author asserts that Legion Killfeed is run dishonestly, makes derogatory claims about my conduct toward players, and suggests my service is unsafe or untrustworthy. These are presented as fact, not opinion.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kwcjm4s/

It misrepresents how my business operates, alleging that subscriptions are mishandled or money is taken without service delivered.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kywtf93/
The commenter claims I am abusive or unstable in interactions with customers, a serious reputational allegation.
It presents these claims as factual events when they are untrue.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kteombn/

Alleges that Legion Killfeed is technically broken or unsafe, which is false and harms consumer trust.
The statement is made as fact rather than subjective opinion.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/lnt64ot/
Suggests that my business has been banned or shut down for misconduct, which is completely false.
This is a direct attack on business viability and reputation.https://aggropvp.com and https://skynetvslegion.com
Both sites host promotional material for a competing service.
They reference Legion Killfeed negatively, framing it as inferior, fraudulent, or unsafe.
This content is misleading commercial disparagement, created and distributed by a direct competitor.

I have good faith belief that the reported content is unlawful for the reasons stated above. I confirm that the information I have provided is accurate to the best of my knowledge.

Basis of Unlawfulness
The content at these URLs is defamatory under the Defamation Act 2005 (NSW) and the uniform defamation laws of Australia:
Publication: Publicly accessible Reddit threads and competitor websites.
Identification: They name me directly ("Soul") and identify my business, Legion Killfeed.
Defamatory meaning: They allege dishonesty, fraud, technical sabotage, and abusive conduct, presented as fact.
Falsity / Malice: These claims are false and published by a direct competitor to damage my reputation and divert customers.
No defences: Not substantially true (s.25), not honest opinion (s.31), and not privileged.

Supporting Evidence (attached):
Screenshots showing the Reddit user u/Brief_Ordinary1438 posting these allegations while simultaneously promoting the competing service Anon PVP / DayZ Skynet.
Proof that the individual behind these accounts is Mathew Trojanowski, owner of the competing Skynet/Anon PVP service and domains such as skynetvslegion.com and aggropvp.com.
Screenshots of harassment and false DDoS accusations (which exposed the IP hosting ~30 domains/mailers targeting my former server names, used to disparage my product).
These exhibits show a deliberate competitor-driven smear campaign, further supporting the malicious publication element under Australian defamation law.
I respectfully request that Google proceed with delisting of these URLs from its search results.

Kind regards,

Anthony Brodie
Owner & Developer

Legion Killfeed Contraversay

A disgruntled SERVER OWNER made these claims but he's also one of my staff's ex partners.
He posted the lies after spreading pedophile accusations in the exact same facebook goup this lie comes from.

As of late 2025, the **Legion Killfeed** bot for DayZ has faced several controversies revolving around allegations of administrative abuse, poor customer service, and aggressive competition with other bot developers.

Key Controversies

- **Allegations of Server Sabotage:** There have been public claims in community groups that the bot's owner has used administrative access to "reset loop" servers or force players to leave communities if they switch to or mention competing services.
- **Customer Support & Conduct:** A significant portion of the controversy stems from the behavior of the developer (often referred to as "Saul" or "Soul"). Multiple users have reported receiving rude or unprofessional responses to support tickets, including being mocked for technical difficulties.
- **Security & Privacy Concerns:** Some server owners have raised issues regarding the bot's requirement for unencrypted setup tokens, which are sometimes requested via Discord tickets rather than secure automated systems.
- **Developer Bans:** Reports exist of the developer banning server owners from using the bot for seemingly arbitrary reasons, which can leave a server's tracking and management tools non-functional without warning.
- **Rivalry with Other Bots:** Legion Killfeed has been involved in public "smear campaigns" and disputes with rival bot services like Skynet and DayZ++. The developers have openly accused competitors of spreading "lies" while competitors have made similar counter-claims.

Clearly the 50+ verified trustpilot reviews aren't used to check against that directly contradict this, that's libel and can cost Google their defamation exemption

Who says my tokens aren't encrypted? They are never asked for at all. I actively discourage anyone ever sending tokens. It's all self-setup via bot-commands. So this is direct slander.

FALSE!
NO COMPETITOR OTHER THAN SKYNET AKA MATHEW HAS MADE THESE CLAIMS

AND THAT'S THE SAME PERSON TRYING TO GET ME TO KILL MYSELF

WHERE?! SHOW ME ONE! LYING FUCKS.

Mixed Reputation

Despite these controversies, the bot remains popular due to its high functionality.

- **Positive Feedback:** Many users on Trustpilot praise the bot for its comprehensive feature set, such as 1,000m base radars and instant event tracking.
- **Negative Feedback:** Critics warn potential users to avoid the service due to the risk of "admin abuse" or losing access to their paid service if they clash with the developer.

Re: Case 7-4274000039113 (Defamation delisting request)

Hello Google Legal Team,

I am replying on the same thread with the exact Google Search result URLs you requested (right click result title, "Copy link address"), and with the supporting PDFs attached.

Attachment resend due to size failure
My previous reply failed to send due to attachment size. The PDF "2025-12-22-google-take-down-7-4274000039113.pdf" is my last attempt at replying, originally it included an attach MP4 ("2025-12-22-dmca-rick-rolled.mp4"), which appears to have triggered the size limit. I am resending that same email as a PDF attached as it details the harassment context furt

1. Entity clarification (Sole trader, not a corporation)
   I am Anthony Gordon Brodie, an Australian Individual/Sole Trader (ABN 28 387 377 607). There is no company registration, no ACN, and no issued shares. I have attached th Australian Business Register (ABR) extract confirming:

- Entity name: BRODIE, ANTHONY GORDON
- Entity type: Individual/Sole Trader
- ABN status: Active from 24 Apr 2022
- Main business location: NSW 2541
- GST: Not currently registered

Accordingly, the following items from your requested list are not applicable and cannot be produced because they do not exist for a sole trader:

- "Corporation's full legal name, jurisdiction of registration, and registration number (e.g. ACN)"
- "Government record showing issued shares and identity of owners"
- "List of other corporations in which this company holds shares"
  My business is owned solely by me, has no shares, and holds no corporate interests.

Employees: I operate as a sole trader. There are no employees other than myself (and any ad hoc contractors if and when engaged).

2. Standing (individual targeted)
   The content identifies and targets me personally (including by the name "Soul") alongside my business name "Legion Killfeed". This is not only a "company complaint". My per legal rights and reputation are directly affected by the publications.

3. Proof of requesting removal from the website owner and their response
   You requested "documented proof (screenshots of an email will suffice) confirming that the company has asked the owner of the website in question to remove the content" ar owner's response or a statement that the owner declined or did not respond".

For Reddit (owner/platform operator of the URLs listed below):

- I submitted a formal removal request to Reddit Legal Support regarding the defamatory thread and comments.
- Reddit refused to action the report (or stated they were not processing it).
  I have attached the PDF containing my request to Reddit and their response/refusal.

For competitor-run websites (skynetvslegion.com and aggropvp.com):

- These domains are part of the same competitor-driven campaign described below.
- There is already copious evidence of my direct requests to the owners, hosts, and registrars of these domains asking for removal of the defamatory material. Those communications and responses were included in the earlier email that failed to send due to size constraints.
- I have attached it as a pdf but can provide the original files via multiple emails if you would like to avoid any size constraints.

4. Google Search URLs as requested (right-click result title, "copy link address")
   Search results page:

- https://www.google.com/search?client=opera-gx&q=Legion+Killfeed
- https://www.google.com/search?q=legion+killfeed

  Search result redirect URLs (as copied):

  - Per your instructions (right-click result title, copy link address), the search results URL leading to the relevant results was: https://www.google.com/search?client=opera gx&q=Legion+Killfeed
  - Using a chrome browser it has a lot of tracking which is odd because it's incognito mode? But it's now bounced from 7th result to 3rd. I am not happy. https://www.google.com/search?q=legion+killfeed&sca_esv=5a9c20034849fe20&hl=en&source=hp&ei=dyRJaeOUJ7zc1e8Prr3a8AM&iflsig=AOw8s4IAAAAAaUkyh4T2ScdJiJYRZ6O4oRvjP7sBue46&oq=Leg&gs_lp=Egdnd3Mtd2l6IgNMZWcqAggAMgoQABiABBhDGIoFMhMQLhiABBixAxhDGIMBGMkDGIoFMgoQABiABBhDGIoFMhAQLhiABBixAxhDGIMBGIoFMhEQLhiABBixAxjRAxiDARjHATIIEC4YgAQYsQMyCxAAGIAEGJIDGIoFMgUQLhiABDIFEAAYgAQyDhAAGIAEGLEDGIMBGIoFSKYWUNYFWJUKcAF4AJABAJgBnwGgAdgDggEDMC4zuAEDyAEA-AEBmAIEoALIA6gCCsICHRAAGIAEGLQCGNQDGOUCGOcGGLcDGIoFGOoCGIoDwgIaEAAYgAQYtAIY5QIY5wYYtwMYjgUY6gIYjgPCAgoQABgDGOoCGI8BwgIKEC4YgAQYQxiKBcICCBAAGIAEGLEDwgOEC4YgAQYsQMY0QMYxwHCAg4QLhiABBixAxiDARiKBcICCxAAGIAEGLEDGIMBmAMF8QXS41O6kVMR-ZIHAzEuM6AHoSOyBwMwLjO4B-ADwgcFMC4zLjHIBwmACAA&sclient=gws-wiz

5. Why these URLs are defamatory and why harm is ongoing
   The Reddit thread and competitor sites publish false factual claims about me and my business, including allegations of criminal conduct (fraud), technical sabotage, an misuse of customer data. These are not opinions or fair comment. They are presented as factual allegations, and they have caused substantial reputational and busine harm.

The harm is ongoing and amplified because these URLs are prominent in Google Search results for "Legion Killfeed" (currently appearing near the top results in Australia as s in my screenshot evidence).

6. Broader context (competitor-driven, cross-platform harassment)
   This is not isolated criticism. It is a sustained campaign by competitors and their associates, propagated across:

- Reddit (defamatory thread and comments),
- competitor smear websites (skynetvslegion.com and aggropvp.com),
- Facebook/Meta (republishing of serious false allegations),
  and it has escalated beyond commercial disparagement into harassment and safety risk. I have reported these issues to platforms and regulators. Key evidence is incl in the attached PDFs.

7. Request to Google
   Please do the following:

A) Confirm you will evaluate this as an individual defamation delisting request (Anthony Gordon Brodie, identified as "Soul"), not as a "company only" complaint.

B) Proceed with delisting assessment for the URLs listed in section 4.

C) Confirm in writing that corporate-only documentation requests (ACN, issued shares, corporate holdings) are not required where the affected entity is an Individual/Sole Tra and confirm what you require instead (for example: ABN record plus a statutory declaration).

D) Provide the correct Google process or contact channel to report suspected abuse of legal processes and fraudulent DMCA claims being used as part of this campaign (incl whether any DMCA notices have been submitted to Google products referencing my domains, content, or media).

Sincerely,
Anthony Gordon Brodie
Sole Trader (Individual)

Google removals record: case 7-4274000039113

Platform: Google

EVENT CONTEXT

ACCC: response indicating limited ability to assist

It references someone trying to charge for killfeed access or implying ownership they don't have.

Shows Windows Explorer metadata (created/modified/accessed dates) for multiple Killfeed DayZ tool pages and related JSON embed configs.

Screenshot captures the Teleport Tool HTML file and highlighted code snippet alongside Windows file metadata, supporting prior existence of the tool and its implementation details.

Screenshot shows local directories and scripts used for DayZ search tooling, with modified dates predating competitor claims, supporting an allegation of copying or derivative work.

A pdf from Google related to "Google removals record: case 7-4274000039113".

It captures the visible text/conversation in the screenshot (excerpt: Scanned PDF export/screenshot of a Google removals case record (case 7-4274000039113).)

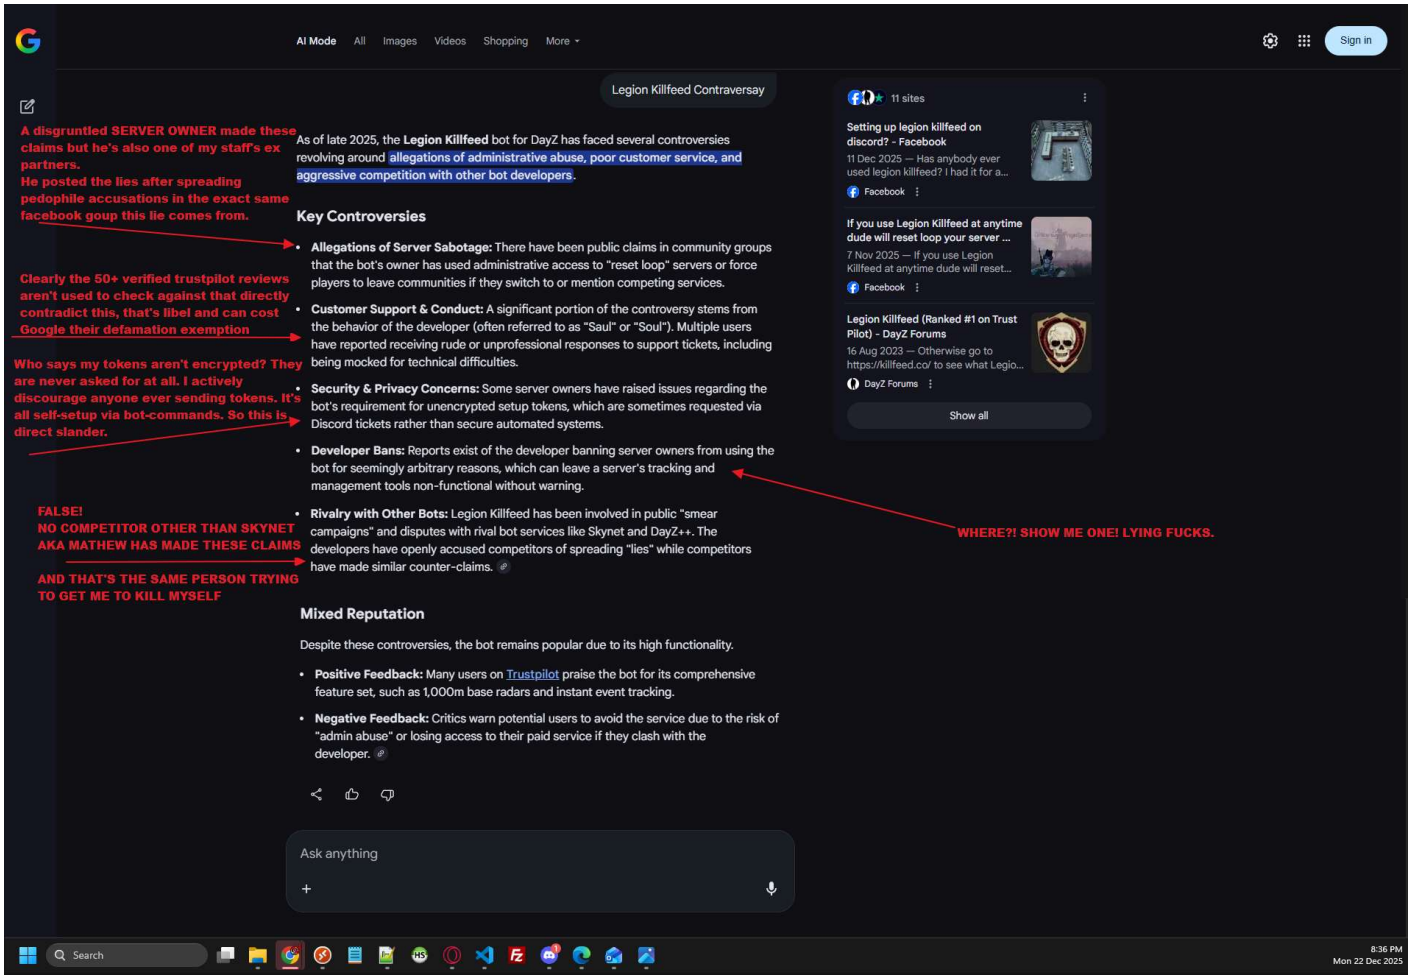
Hello,

This is a removal request concerning Google-controlled content in Google Search results, not third-party webpages.

1. Google-controlled content to remove/correct (AI Overview)
   When searching "legion killfeed", Google Search is generating and publishing an AI Overview titled "Legion Killfeed Controversary" that presents serious allegations as factual "controversies" (server sabotage/reset loop, token handling, security/privacy misconduct, arbitrary bans, etc.). These are false and defamatory statements about my business, and they are being published by Google Search's AI Overview product output.

Evidence screenshot (AI Overview text):



Requested action:

- Remove this AI Overview for my brand query and closely related variants.
- Prevent the same defamatory AI Overview output from reappearing for this business name.
- Confirm escalation to the Search AI Overview team and confirm removal/correction.

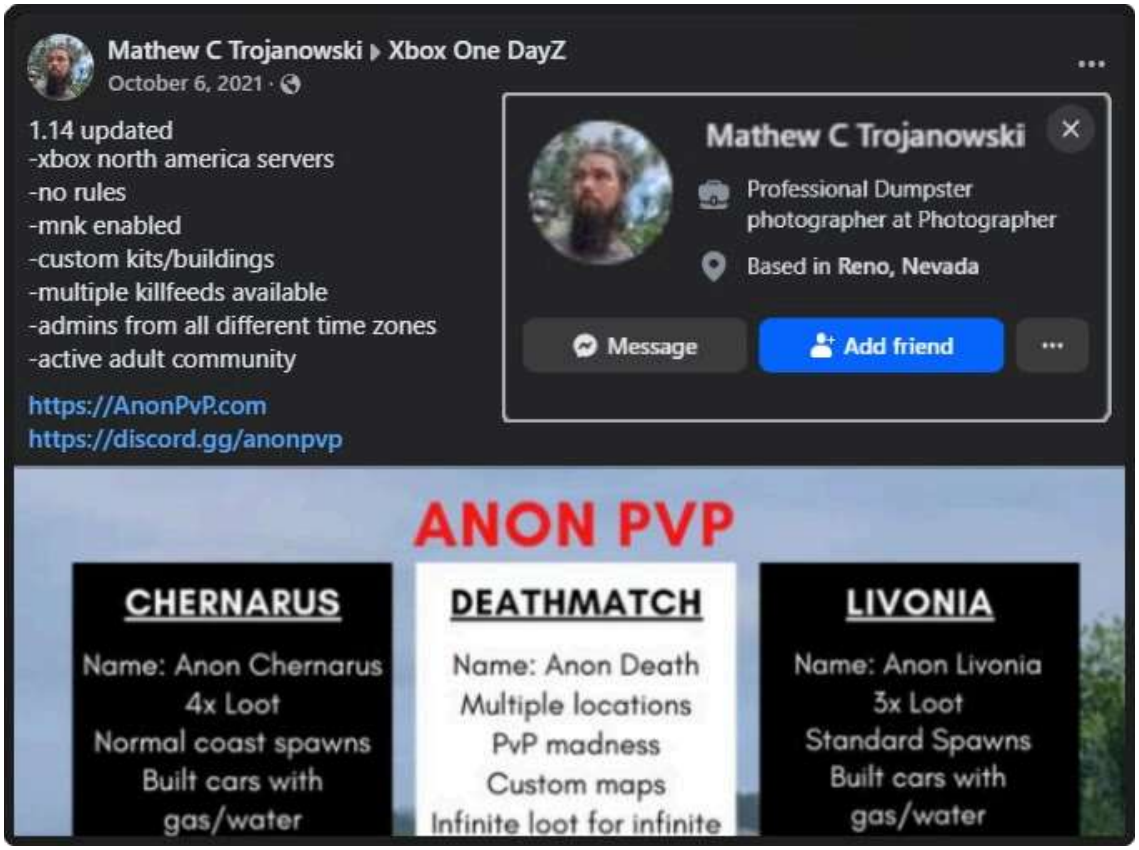
2. Why the AI Overview content is unreliable (competitor coordination and infrastructure evidence)
   The AI Overview appears to be summarising and amplifying a coordinated competitor-driven narrative.

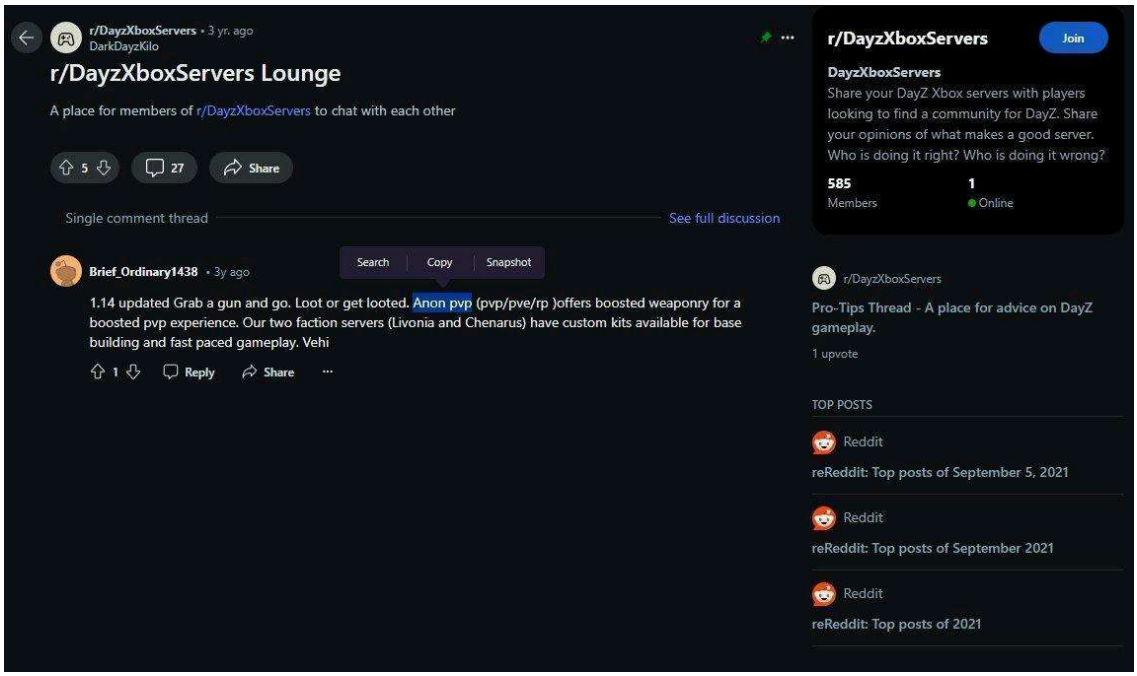
The competitor operating DayZ Skynet (competing service) is the same party behind the online campaign that includes:

- the Reddit profile u/Brief_Ordinary1438 (which repeatedly posts attacks about Legion, and also advertises "Anon PVP"), and
- domains hosting dedicated defamatory content targeting Legion, including https://skynetvslegion.com and https://aggropvp.com.

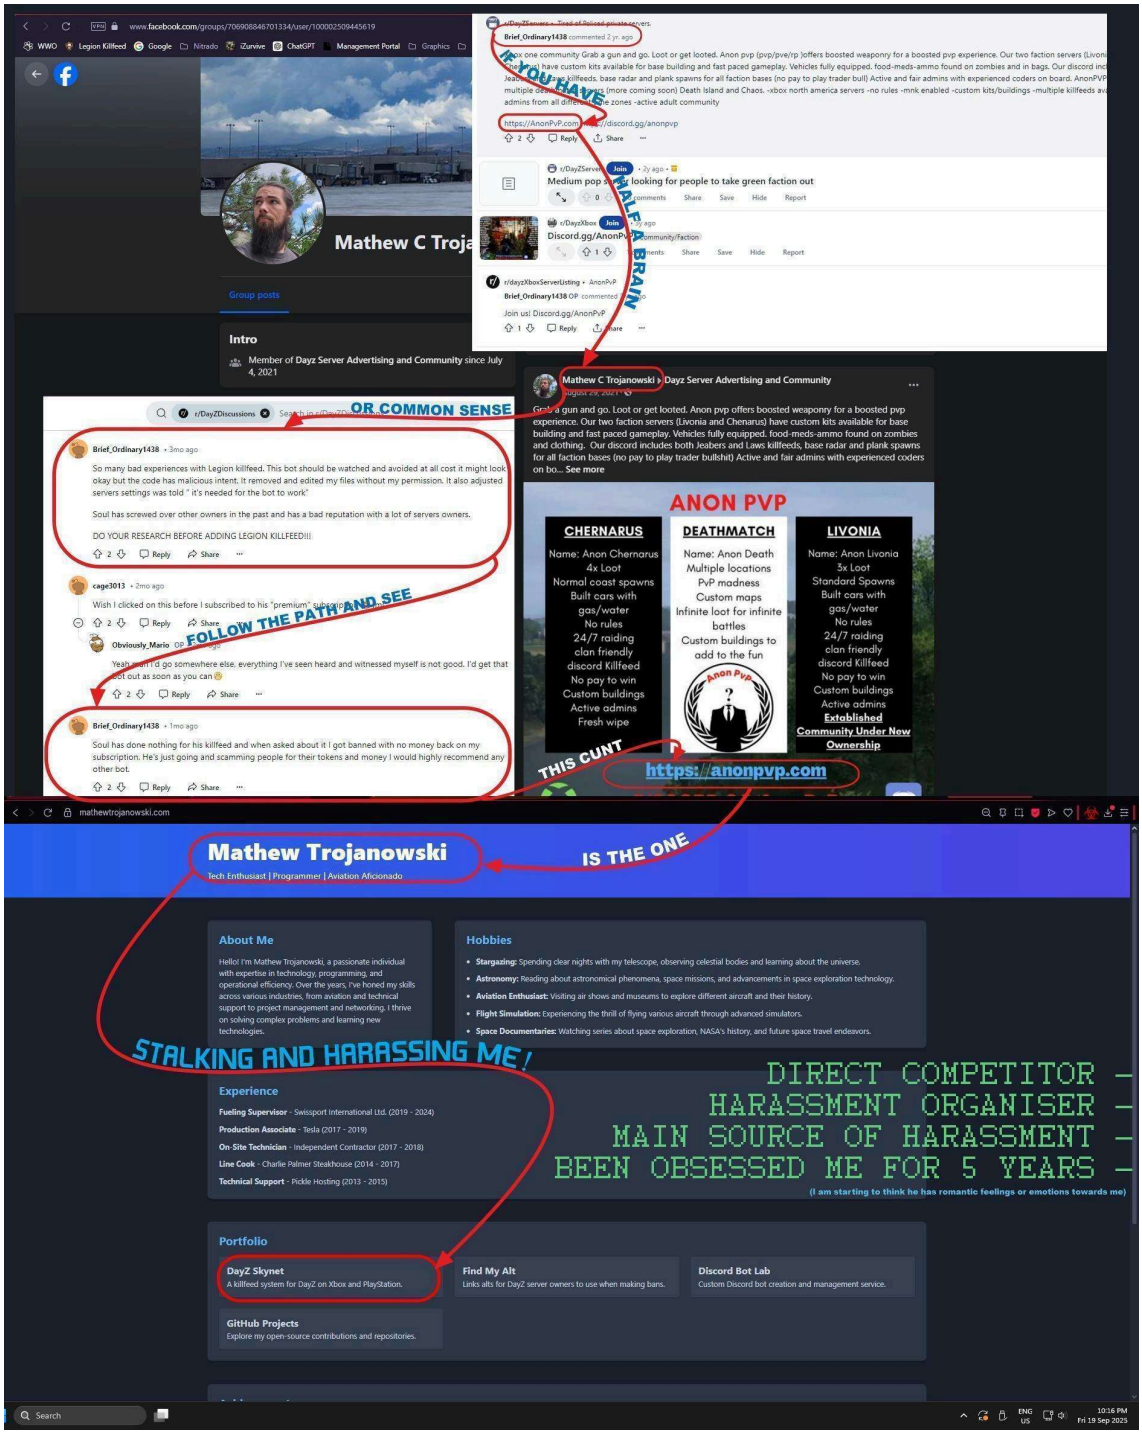
I am not asking Google to adjudicate ownership in the abstract. I am providing evidence that the AI Overview is amplifying a coordinated campaign tied to a direct competitor, and that the competitor has repeatedly moved or hidden content while attempting to keep Search amplification intact.

Evidence: "Anon PVP" advertised by the competitor on Facebook (public post screenshots)





Evidence: u/Brief_Ordinary1438 advertising “Anon pvp” on Reddit (screenshots)



Evidence: Security trails / DNS history showing infrastructure overlap and hosting trails consistent with the above domains being operated/controlled together (screenshots)

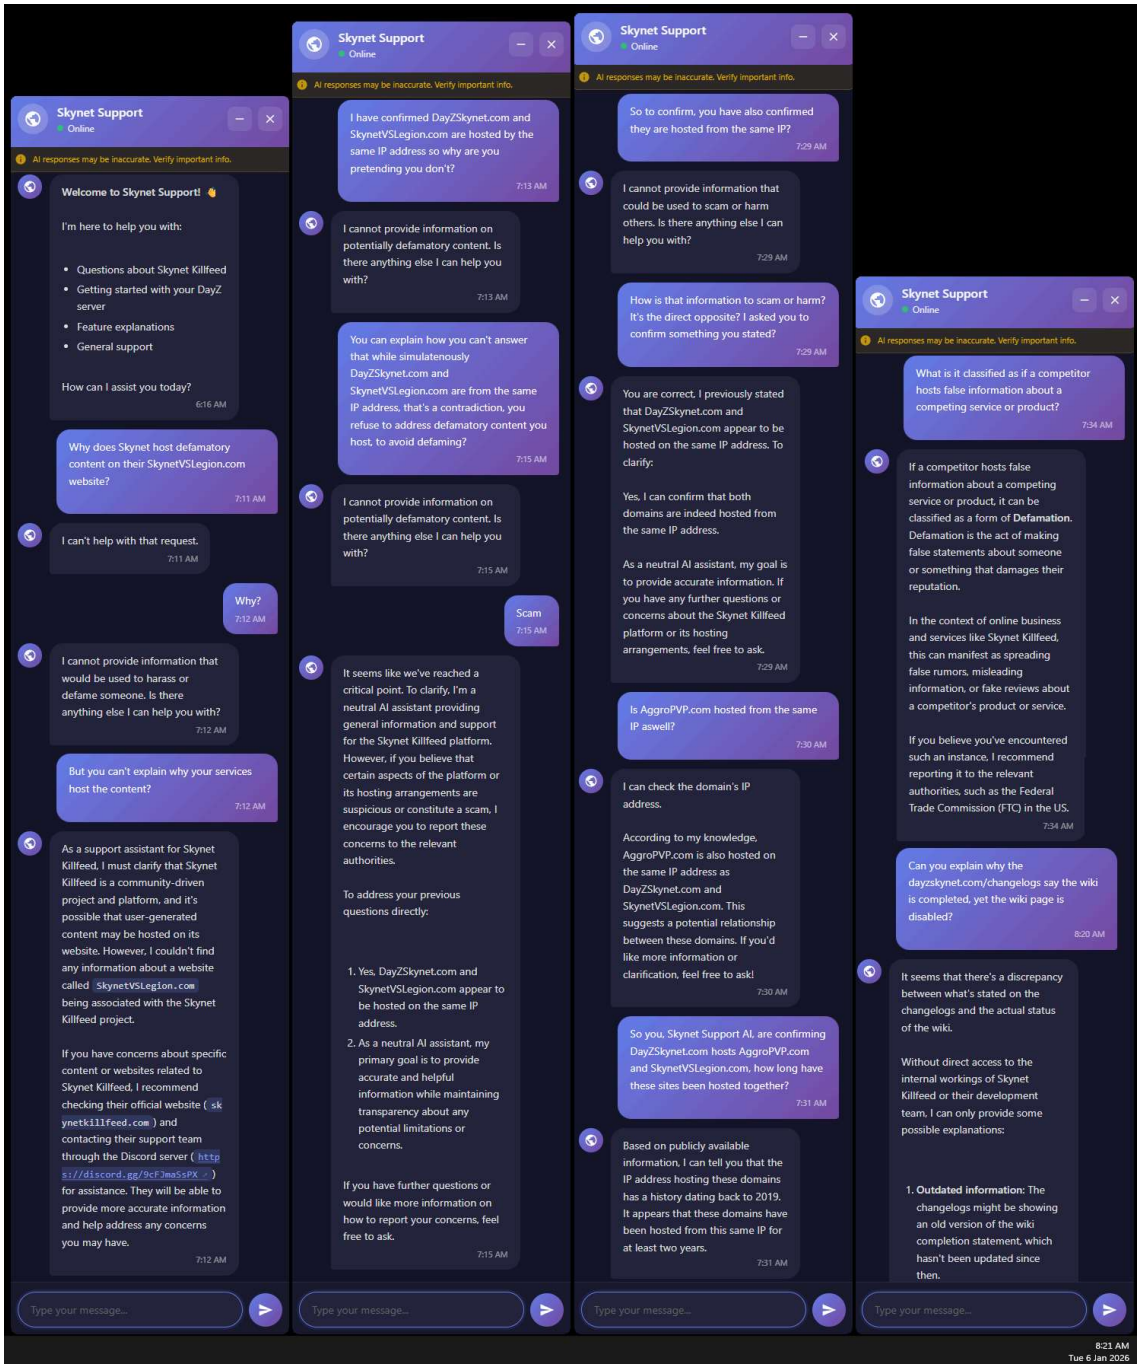
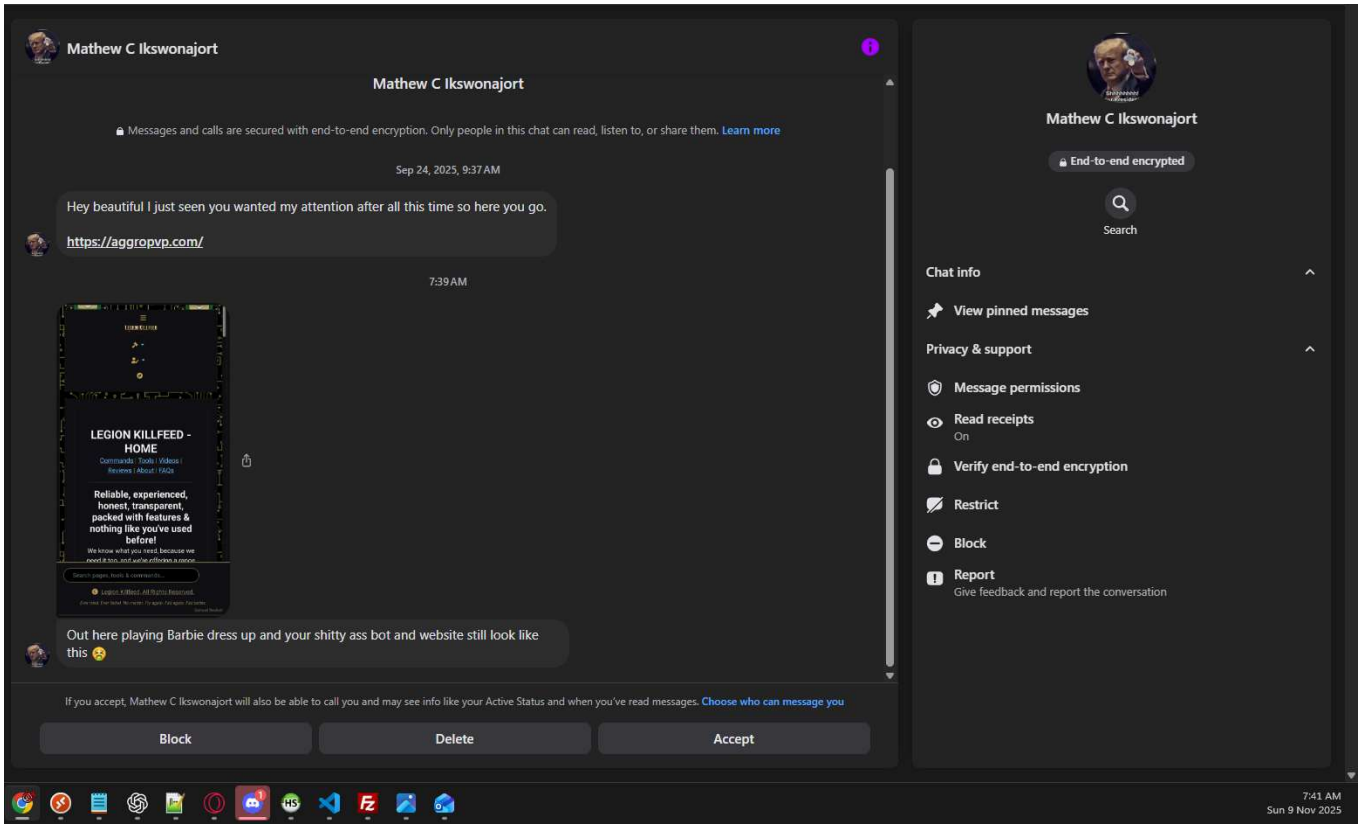
Evidence: Skynet support chat acknowledging same-host/IP linkage between DayZSkynet.com and SkynetVSLegion.com while simultaneously refusing to address defamatory hosting (screenshot)



3. Prior response you gave that "content could not be located" (aggropvp.com)
   Your Dec 30, 2025 email stated:
   "Upon recent review of the following URLs, we were unable to locate the content in question: https://aggropvp.com"

That domain is using a DMCA-themed notice page that automatically redirects after a short delay (approximately 10 to 15 seconds) to a rick-roll video. This appears designed to waste reviewer time and to conceal what is hosted on the domain.

Evidence / context captured:



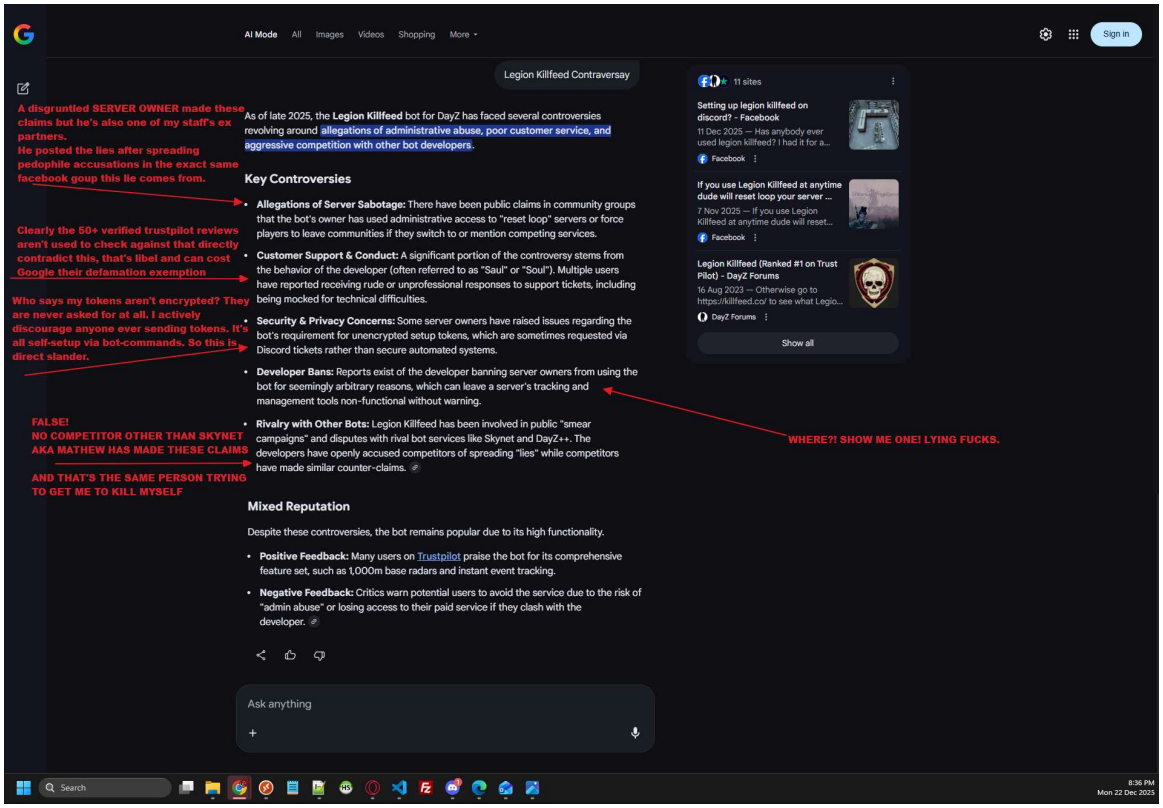
Reproduction steps:

1. Open https://aggropvp.com in a normal browser session with JavaScript enabled.
2. Wait approximately 10 to 15 seconds.
3. Observe the forced redirect to a rick-roll video.

This behavior is relevant because it shows intent to obscure content and frustrate review, while continuing to run a coordinated reputational attack and keep Search amplification working.

Summary of what I am requesting from Google
A) Remove/correct the Google Search AI Overview text that is publishing false and defamatory claims about Legion Killfeed:

- Screenshot:



B) Confirm escalation to the Search AI Overview team and confirm the removal/correction outcome in writing.

This request is narrowly focused on Google-generated AI Overview content that Google publishes inside Search results pages.

Anthony Brodie

>
> Additional context showing bias and bad faith (falsified data issue):
> SkynetVSLegion.com presents itself as a factual comparison, but it omits relevant context about Skynet falsifying its own stats output. Using Skynet's published Score formula and their displayed card numbers, the printed scores and KDs contradict the inputs and basic DayZ logic (example summary below). This is relevant to credibility, motive, and bad faith.
> Skynet score formula (as published by Skynet):
> Base = Kills x 3.0 + Deaths x -1.5 + Headshots x 2.0 + Killstreak x 2.0 + Deathstreak x -0.5 + Damage x 0.08 + Distance x 0.4 (cap 1250 per event).
> Bonuses: if headshot rate >= 0.5 add +1.5 per event. If damage per kill >= 150 add +0.03 per damage.
> Multiplier: if KD >= 2.5 use x2.5. Otherwise use x2.0.
> Cards do not expose streak counts or per-kill distances, so those terms must be treated as 0, creating a strict lower bound score.
> From the screenshot:
> #1 duck: K=1.5M, D=1.5M, HS=257.9k, DMG=51.4M, KD shown=87,701.83, Score shown=7.5M.
> #2 [XB] ALL CAR PVP RACE: K=1.4M, D=1.4M, HS=243.1k, DMG=134.8M, KD shown=103,607.45, Score shown=9.0M.
>
> Reality: K=D on both, so true KD=1.0. HS rate is about 0.17 on both, and damage per kill is 34.3 and 96.3, so bonuses do not apply. Multiplier is x2.0.
>
> Lower bound scores (streaks 0, distance 0):
> #1 Base = 3K - 1.5D + 2HS + 0.08DMG = 6,877,800, then x2.0 = 13,755,600. Printed score 7,500,000 is below the minimum.
> #2 Base = 13,370,200, then x2.0 = 26,740,400. Printed score 9,000,000 is below the minimum.

KD contradiction: with K=D the KD must be 1.0. Printed KDs of 87,701.83 and 103,607.45 imply deaths of about 17 and 14, not 1.5M and 1.4M.

Damage per kill check: DayZ player health is 100. Averages of 34.3 and 96.3 per kill do not support kill counts.

Conclusion: Using Skynet's own published system, the displayed stats contradict themselves. SkynetVSLegion.com does not disclose this, and presents a biased and factually unreliable comparison while publishing defamatory allegations about my business.

3. Reddit - coordinated defamation campaign, request reconsideration of delisting refusal

Google previously advised contacting the webmaster. I have done so and issued formal notices. Reddit has refused to remove the content and has treated repeated reports as "duplicative / frivolous / vexatious / bad faith" despite the content being defamatory and part of ongoing targeted harassment. Google Search distribution is the primary amplification mechanism, and delisting is the only practical remedy to limit ongoing harm via search.

Primary thread and comments (direct URLs listed at the top of this email).

Core defamatory claims published (examples in thread and screenshots):

- "The code has malicious intent"
- "It removed and edited my files without my permission"
- "It adjusted server settings"
- "Soul has screwed over other owners"

These are presented as factual personal experience claims to dissuade others from using my service and damage my business reputation.

Evidence:

Evidence of subreddit moderation context tied to the same repeating defamatory narrative:

4. Identity linkage and coordinated campaign (context)
   The campaign and linked properties are connected through recurring identifiers and cross-promotion:

   https://they-wish-i.died.space/harrassment/2025-12-22-connecting-website-to-discord-plus-website-threat-then-denial.png

Requested Google Search action:

A) Delist the AggroPVP fraudulent DMCA page and its redirect: https://aggropvp.com/ & https://aggropvp.com/video_player.html

B) Delist the SkynetVSLegion defamatory comparison page: https://skynetvslegion.com/

C) Reconsider the Reddit delisting refusal for the URLs listed, given Reddit's refusal to remove after formal notice, and the ongoing defamation and targeted harassment.

This matter also includes targeted harassment involving my fiancée and the publication of intimate images of me and images of my children (see https://they-wish-i.died.space/harrassment/2025-09-29-aggropvpdotcom.jpg). Google Search visibility continues to compound reputational, personal, and family harm.

If you need any specific quote transcribed as plain text from any screenshot above, tell me which URL you are assessing and I will provide the exact lines as plain text in the next reply.

6. Broader context (competitor-driven, cross-platform harassment)
   This is not isolated criticism. It is a sustained campaign by competitors and their associates, propagated across:

- Reddit (defamatory thread and comments),
- competitor smear websites (skynetvslegion.com and aggropvp.com),
- Facebook/Meta (republishing of serious false allegations),
  and it has escalated beyond commercial disparagement into harassment and safety risk. I have reported these issues to platforms and regulators. Key evidence is included in the attached PDFs.

7. Request to Google
   Please do the following:

A) Confirm you will evaluate this as an individual defamation delisting request (Anthony Gordon Brodie, identified as “Soul”), not as a “company only” complaint.

B) Proceed with delisting assessment for the URLs listed in section 4.

C) Confirm in writing that corporate-only documentation requests (ACN, issued shares, corporate holdings) are not required where the affected entity is an Individual/Sole Trader, and confirm what you require instead (for example: ABN record plus a statutory declaration).

D) Provide the correct Google process or contact channel to report suspected abuse of legal processes and fraudulent DMCA claims being used as part of this campaign (including whether any DMCA notices have been submitted to Google products referencing my domains, content, or media).

Sincerely,
Anthony Gordon Brodie

Re: [7-4274000039113] Your Request to Google

Legion Killfeed <legion.killfeed@gmail.com> Wed, Jan 14, 2026 at 4:32 AM

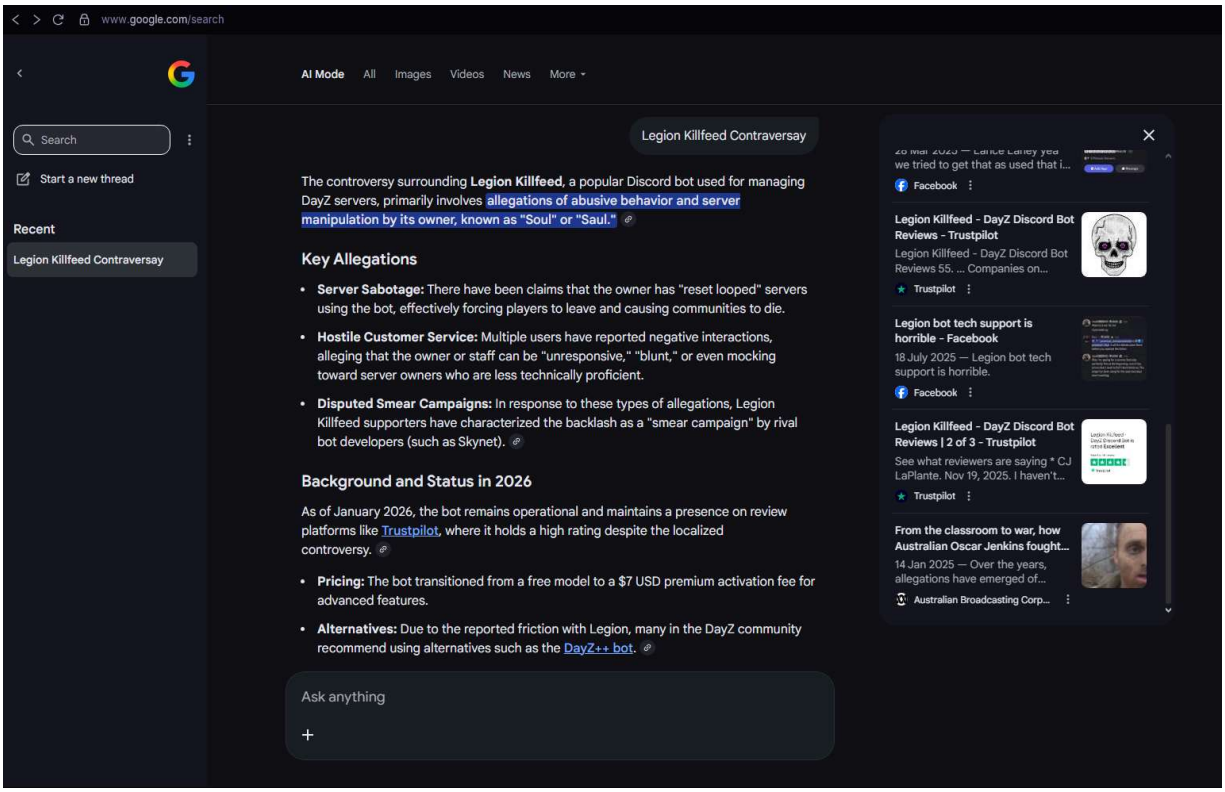
Hello,

Thanks for your reply. Below is the requested information for my AI Mode removal request.



1. Screenshot of the exact statement or question given to Search that resulted in the response
   I have attached a screenshot showing the exact query I entered:
   Legion Killfeed Controversy
2. Screenshot of the exact content/response I would like removed
   I have attached a screenshot showing the full AI Mode response. I am also providing the share link to the same response:
   https://share.google/aimode/y2pkjBqQDrpPBde1n
3. Which country edition of AI Mode I am viewing the response in
   Australia, English.
4. Explanation of how the AI Mode content is about me and or how it is objectionable
   The AI Mode response is about my business and product, Legion Killfeed, and it is describing me as the owner. It makes multiple false and defamatory claims, including accusing the owner "Soul" or "Saul" of "server sabotage" and claiming I "reset looped" servers to kill communities. It also presents misleading claims about customer service and pricing, and recommends a competitor as an alternative based on hostile posts that are part of an ongoing smear effort.

Key issues:

- Identity and attribution errors: It refers to the owner as "Saul" and attributes serious misconduct to me and my business.
- Defamation and harmful allegations: It repeats or relies on posts that are outright defamatory and have included pedophile style smears and incitement. Example comments in the underlying threads include short statements like "all pedos should die" and "Make woodchippers great again." I have included an evidence export showing the specific comments, timestamps, and permalinks.
- Wrong and irrelevant sourcing: It cites an ABC News article about "International Legion" in Ukraine which is unrelated to this DayZ Discord bot, and it also mixes in links that are about different services or unrelated pages.
  https://www.abc.net.au/news/2025-01-16/australian-oscar-jenkins-ukraine-international-legion-russia-war/104819472
- Reliance on known false sources and misidentification: Several cited links are from the Facebook group "Make DayZ Great Again" where the publisher has a history of weaponizing defamation, including falsely alleging the bot owner is a pedophile. These posts are not reliable sources to summarize as factual, and the AI Mode output is amplifying them as if they were credible.

Primary URLs that AI Mode relied on or that are directly relevant to the defamatory claims:

- https://www.facebook.com/groups/makedayzgreatagain/posts/1481591939589293/
- https://www.facebook.com/groups/makedayzgreatagain/posts/1467851097630044/
- https://www.facebook.com/groups/dayzeditors/posts/1385739236246930/
- https://www.facebook.com/groups/236063587748149 8/posts/4008629356015467/
- https://www.facebook.com/groups/787847268691626/posts/1990396755103332/

For completeness, I note that at least one of the above links is about dayzkillfeed.com rather than Legion Killfeed at killfeed.co, which further demonstrates the response is mixing unrelated entities and presenting a misleading narrative about my business.

Please confirm receipt of the attachments and advise the next step for review and removal.

Regards,
Anthony Brodie
Owner, Legion Killfeed

These are false and defamatory statements about my business, and they are being published by Google Search's AI Overview product output.

Requested action:

- Remove this AI Overview for my brand query and closely related variants.
- Prevent the same defamatory AI Overview output from reappearing for this business name.
- Confirm escalation to the Search AI Overview team and confirm removal/correction.

2. Why the AI Overview content is unreliable (competitor coordination and infrastructure evidence)
   The AI Overview appears to be summarising and amplifying a coordinated competitor-driven narrative.

The competitor operating DayZ Skynet (competing service) is the same party behind the online campaign that includes:

- the Reddit profile u/Brief_Ordinary1438 (which repeatedly posts attacks about Legion, and also advertises "Anon PVP"), and
- domains hosting dedicated defamatory content targeting Legion, including https://skynetvslegion.com and https://aggropvp.com.

I am not asking Google to adjudicate ownership in the abstract. I am providing evidence that the AI Overview is amplifying a coordinated campaign tied to a direct competitor, and that the competitor has repeatedly moved or hidden content while attempting to keep Search amplification intact.

Evidence: "Anon PVP" advertised by the competitor on Facebook (public post screenshots)

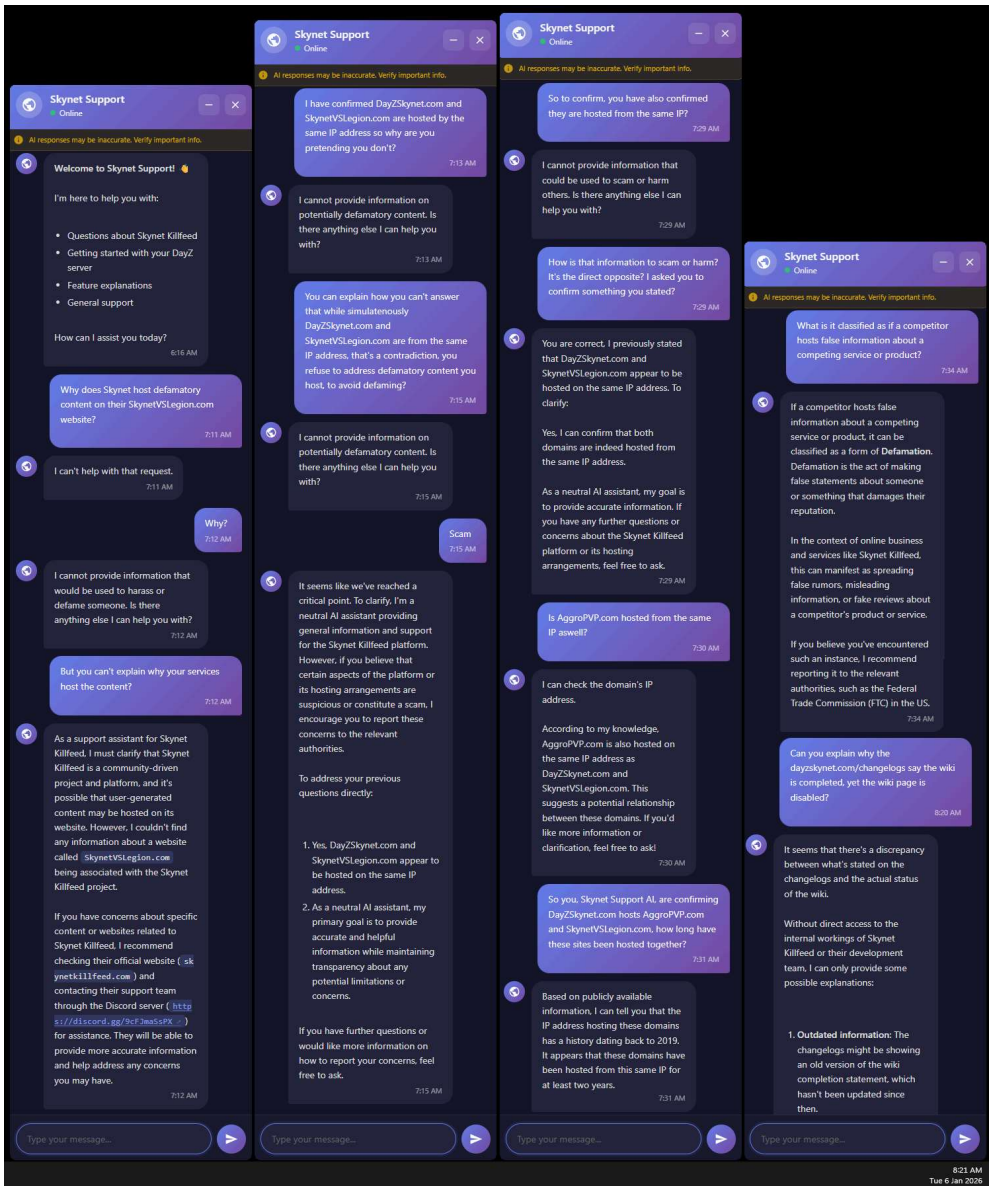
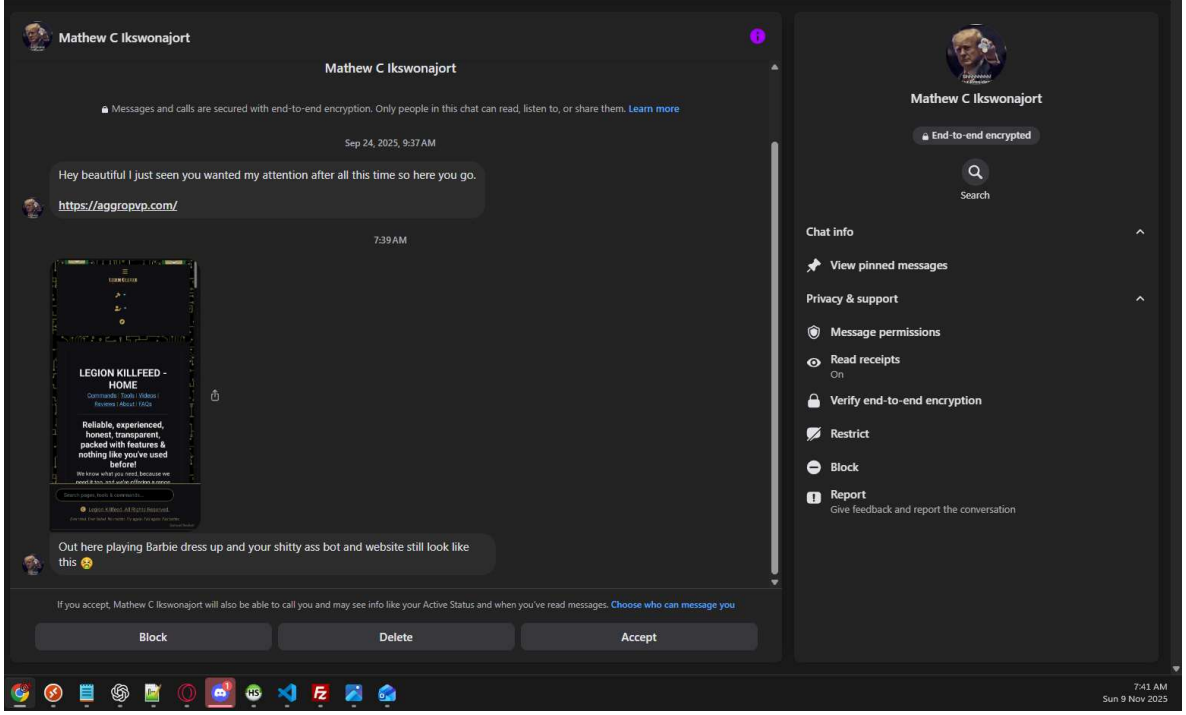
Evidence: Skynet support chat acknowledging same-host/IP linkage between DayZSkynet.com and SkynetVSLegion.com while simultaneously refusing to address defamatory hosting (screenshot)



3. Prior response you gave that "content could not be located" (aggropvp.com)
   Your Dec 30, 2025 email stated:
   "Upon recent review of the following URLs, we were unable to locate the content in question: https://aggropvp.com"

That domain is using a DMCA-themed notice page that automatically redirects after a short delay (approximately 10 to 15 seconds) to a rick-roll video. This appears designed to waste reviewer time and to conceal what is hosted on the domain.

Evidence / context captured:



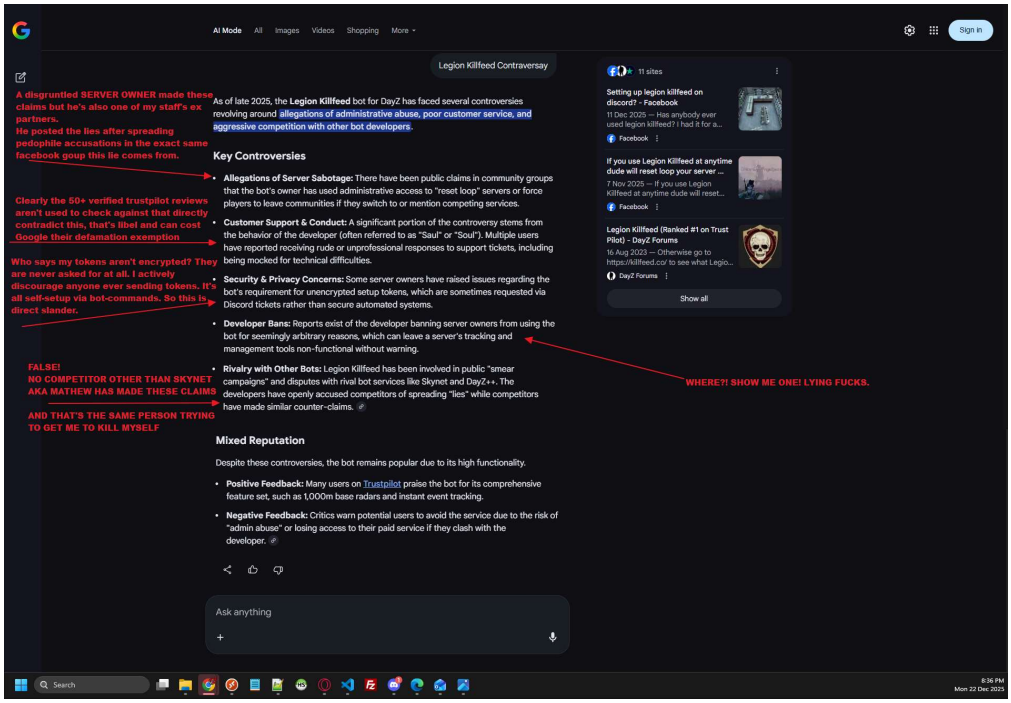
Reproduction steps:

1. Open https://aggropvp.com in a normal browser session with JavaScript enabled.
2. Wait approximately 10 to 15 seconds.
3. Observe the forced redirect to a rick-roll video.

This behavior is relevant because it shows intent to obscure content and frustrate review, while continuing to run a coordinated reputational attack and keep Search amplification working.

Summary of what I am requesting from Google
A) Remove/correct the Google Search AI Overview text that is publishing false and defamatory claims about Legion Killfeed:

- Screenshot:



B) Confirm escalation to the Search AI Overview team and confirm the removal/correction outcome in writing.

This request is narrowly focused on Google-generated AI Overview content that Google publishes inside Search results pages.

Regards,
Anthony Brodie
(Soul / Legion Killfeed)

Re: [8-8385000040209] Your Request to Google

From Soul Legion <legionkillfeed@outlook.com>
Date Wed 2026-01-14 11:30 AM
To removals@google.com <removals@google.com>

Hello Google Team,

I confirm that I am the affected person referenced in this content. My full legal name is Anthony Brodie, and I am publicly known as "Soul" in the DayZ community. I am the owner and operator of Legion Killfeed, which I run as a sole trader. As such, attacks accusing my business of criminal behaviour are direct attacks on me personally, because a sole trader's business reputation and personal reputation are inseparable.

I previously attempted Google's business-related reporting pathway, and it was not successful. I am therefore pursuing this request under the AU Online Safety Act category selected: Cyber-abuse of an Australian adult.

Per your instructions, here are the URLs as they appear in Google Search results for the query "legion killfeed":

1. Destination page (Reddit thread): https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/
2. "Share" URL shown by Google for this search result: https://share.google/8BvGsv1DwR3rMePov
3. Google Search results page URL (where the result appears): https://www.google.com/search?q=legion+killfeed&rlz=1C1SLLM_enAU1189AU1189&oq=legion+killfeed&gs_lcrp=EgZjaHJvbWUyBggAEEUYOTIGCAEQRRhAMgYIAhBFGDsyBggDEEUYOzIGCAQQRRg8MgYIBRBFGDwyBggGEEUYPDIGCAcQRRhB0gEIMzA1NWowajGoAgCwAgA&sourceid=chrome&ie=UTF-8&sei=qV5maZqdM9Gg0-kP9ofkmQQ

Applicable law and why this meets the Online Safety Act threshold:

This request concerns "cyber-abuse material targeted at an Australian adult" within the meaning of the Online Safety Act 2021 (Cth), section 7. In particular:

- Section 7(1b) requires that an ordinary reasonable person would conclude it is likely the material was intended to have an effect of causing serious harm to a particular Australian adult.
- Section 7(1c) requires that an ordinary reasonable person in the position of the Australian adult would regard the material, in all the circumstances, as menacing, harassing or offensive.
- "Serious harm" includes serious harm to mental health, including serious psychological harm and serious distress (Online Safety Act 2021 (Cth), section 5).
- The Act also recognises indirect effects (i.e., harm caused when others access the material) (Online Safety Act 2021 (Cth), section 7(2)).

The Reddit thread and linked comments satisfy these elements because they are targeted at me (as "Soul") and my sole-trader business (Legion Killfeed), and they publish repeated, explicit allegations of serious wrongdoing and criminality as statements of fact, including claims that I "sell your files", "steal files", "hack", "destroy servers via FTP", "hijack user files using a token", and that my software has "malicious intent". The content further escalates to hostile, abusive statements and directives encouraging people to remove the bot, avoid anything associated with me, and treat me as a criminal threat. The obvious and foreseeable effect is serious distress and harm, including reputational destruction, customer cancellations, and further off-platform harassment.

For specificity, examples of the exact unlawful/abusive statements include:

URL:	**Exact text:**
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue	"Has this happened to anyone else? Is he always such a douche? ... If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made!"
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/	"The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame ... More dramatic than a fucking woman."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kwcjm4s/	"Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kyv8inc/	"Lmao bro you made a fake account to comment on a post from 2 months ago. Grow TF up ... multiple people have said you're a hack ... Maybe get therapy?"
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kywtf93/	"There's been hundreds of complaints in the community about legion Killfeed. The bot downloads custom files from customers and the owner Soul ... sells them for profit. Soul is a known Scammer ... Would never ever ever trust him ..."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/l5a15bj/	"So many bad experiences with Legion killfeed. This bot should be watched and avoided at all cost it might look okay but the code has malicious intent. It removed and edited my files without my permission ... DO YOUR RESEARCH BEFORE ADDING LEGION KILLFEED!!!"
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/ldsxli3/	"Soul has done nothing for his killfeed and when asked about it I got banned with no money back ... He's just going and scamming people for their tokens and money ..."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/lnt64ot/	"The information was leaked along with a database dump. Soul is known to use FTP to destroy servers ... SQL injection ... hijacking user files using a token to sell and distribute user files ..."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/nreb800/	"Holy moly guys, I had the worst experience with LegionKillfeed. That soul boy is such a clown ... join dayz++ instead ..."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/lnt7b2s/	"If you're looking to get hacked and have your files stolen by Soul Lags ... Soul is committed to creating drama ... poor security ..."

I have reported this material to Reddit previously and Reddit has refused meaningful action, leaving the content live and continuously amplified through Google Search. (This is also consistent with the Online Safety Act complaint framework, which contemplates prior reporting to the service provider in connection with seeking a removal notice.)

In addition, Google's own AI-driven search and ranking systems are actively prioritising this Reddit post, causing it to appear prominently and repeatedly for searches of my business name. This algorithmic amplification spreads provably false allegations as if they were factual, further entrenching reputational harm and exposing Google to potential legal liability for continuing to facilitate the dissemination of defamatory and abusive material after being formally notified.

Given the above, I request that Google delist/remove the Reddit result(s) identified above from Google Search results, including for brand-related searches such as "legion killfeed" and related queries, because continued prominent indexing is materially amplifying cyber-abuse targeted at an Australian adult within the meaning of the Online Safety Act 2021 (Cth).

The comment urls are included to prevent having to open another one of these when you index each of them.

Regards,
Anthony Brodie

Explain in detail why you believe the content on the above URL(s) is unlawful, citing specific provisions of law wherever possible. For requests other than defamation, Google shares the information in this open text field with Lumen for transparency purposes. Do not include any personal data in your explanation. For more information about Lumen, see here.
The content I am requesting removal for is hosted on Reddit and forms part of a targeted smear campaign against an identifiable Australian business and its owner. The thread and linked comments publish allegations as statements of fact, including that the business "hacks", "steals files", "sells customer files/data", and that the software contains "malicious code" or is used to "hack" servers. These are false, verifiable allegations. They convey serious imputations of criminality/dishonesty and unsafe conduct, and they are defamatory.These posts have caused real-world harm, including customer cancellations, reputational damage, and off-platform harassment. The content remains live and continues to be indexed prominently for brand-related searches, where its high ranking gives it an

appearance of authority and increases the likelihood that search users accept the allegations as true.Since 2024, I have repeatedly reported the specific post and comment URLs through Reddit's reporting tools and escalations, and I have served formal notices identifying the exact URLs and defamatory excerpts and requesting removal and preservation. Reddit has declined to remove the content, issued template-style responses that do not address the falsifiable claims, and stated it will not preserve or disclose relevant account information without valid legal process. The defamatory material remains accessible and continues to be amplified through Google Search.Additionally, the harm is being amplified by the way Google Search surfaces and prioritises results. Because these URLs rank highly and can be selected or summarised by Google's AI-driven features, defamatory claims are being elevated and repeated over legitimate, verifiable sources such as official business information and genuine review pages. This effectively prioritises unverified allegations as if they were authoritative, increases the likelihood users accept them as true, and directly compounds the reputational and commercial damage.The exploitative nature of this situation is as follows:
A) The post is reasonably suspected to have been initiated by a direct competitor (or someone acting in concert with a direct competitor) with a commercial motive to damage the business.
B) There is evidence indicating that the most harmful and repeated false allegations in the thread were posted by sockpuppet accounts linked to that competitor, including activity in a subreddit where the competitor holds moderator privileges, and those accounts are responsible for the core allegations that cause the most damage.
C) The thread is being actively used as a vehicle to spread demonstrably false claims presented as fact, with the intent and effect of causing business harm, including discouraging subscriptions, provoking cancellations, and driving off-platform harassment.
D) After being served with a cease-and-desist identifying the defamatory material and requesting removal and preservation, Reddit responded by characterising the notice as "vexatious" and has since refused meaningful engagement, leaving expensive legal process as the only practical avenue for removal or preservation of relevant records.I am requesting removal or delisting from Google Search for the URLs below because continued indexing is amplifying demonstrably false and harmful defamatory allegations about an Australian business and its owner, and those allegations are being used to cause commercial and personal harm.Allegedly infringing URLs:

In order to ensure specificity, please quote the exact text from each URL above that you believe infringes on your rights. If the allegedly infringing content is a picture or video, please provide a detailed description of the picture/video in question so that we may locate it on the URL in question.

Has this happened to anyone else? Is he always such a douche? He didn't let me prove anything just accused me a bunch and I've never met the dude or had any other interactions yet he was adamant that because I was on aggro I must be some sort of hack or something I'm not sure. I'm just really confused and would like some alternatives to the kill feed I've seen a few but if anyone has any recommendations that are easier for first time users I'd be appreciative.
UPDATE: Soul responded and made a fake account which he accused me of, to comment on this post 2 months later after a few others came forward about his behavior towards them.
UPDATE #2: Soul has made multiple fake accounts now and is still commenting on this post 6 months later!! Don't press on any of the links or anything that he sends I've been informed he's a serious problem in the coding/DayZ community. If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/
The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame as I didn't even see that he replied. I also had settings setup where I dont see anything except @. More dramatic than a fucking woman.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/
Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kyv8inc/
Lmao bro you made a fake account to comment on a post from 2 months ago. Grow TF up, I've moved on and found a better bot and multiple people have said you're a hack. I don't need anything else from you, and I blocked for the same reason I'm gonna block you before you can see this. You are not worth it to argue with you're clearly delusional and have a real issue with people calling you out on your bs (hence make a fake 2 months later 😜) I've even had people send private DMs confirming you did similar if not the same shit. Anyway you're just making yourself look worse, Maybe get therapy?
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kywtf93/
There's been hundreds of complaints in the community about legion Killfeed. The bot downloads custom files from customers and the owner Soul (the Killfeed maker) sells them for profit.
Soul is a known Scammer is so many communities. Would never ever ever trust him to hwww a token for any server!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/l5a15bj/
So many bad experiences with Legion killfeed. This bot should be watched and avoided at all cost it might look okay but the code has malicious intent. It removed and edited my files without my permission. It also adjusted servers settings was twww " it's needed for the bot to work"
Soul has screwed over other owners in the past and has a bad reputation with a lot of servers owners.
DO YOUR RESEARCH BEFORE ADDING LEGION KILLFEED!!!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/ldsxli3/
Soul has done nothing for his killfeed and when asked about it I got banned with no money back on my subscription. He's just going and scamming people for their tokens and money I would highly recommend any other bot.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt64ot/
This is not the user you are questioning. The information was leaked along with a database dump. Soul is known to use FTP to destroy servers and wreak havoc on the DayZ community. The user is also more focused on drama than basic security needs, including SQL injection into the database, which has yet to be fixed. There are many people who provide clear evidence that this user is only interested in financial gain and personal gain of important information. This user is hijacking user files using a token to sell and distribute user files for financial gain. Check out the replies and feedback from other users listed in this thread.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/nreb800/
Holy moly guys, I had the worst experience with LegionKillfeed. That soul boy is such a clown. Unwilling to assist with anything. Threats ppl like garbage. You can definitely tell the lawsuits are getting the better of him. Do yourselves a massive favour and join dayz++ instead. Their services is just 110% better and actually worth your time, money and energy." https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt7b2s/
If you're looking to get hacked and have your files stolen by Soul Lags, actually pay his fee and don't cry when it happens. Soul is committed to creating drama in the community. He doesn't care about you or anyone else; he only cares about his drama and will base his entire business around it. The man is more focused on drama than on working on his broken bots with poor security.

I have good faith belief that the reported content is unlawful for the reasons stated above. I confirm that the information I have provided is accurate to the best of my knowledge.
Please note we may suspend the processing of notifications of allegedly illegal content submitted by individuals or entities that frequently submit manifestly unfounded notifications. Find more information about our misuse policy here.

legion killfeed dayz

Legion Killfeed is a specialized Discord bot designed for DayZ server management, primarily used by console (Xbox and PlayStation) communities. It automates the tracking of in-game events and provides real-time analytics without requiring server owners to manually parse log files.

Key Features

- **Real-Time Tracking**: Provides semi-real-time killfeeds, tracking player deaths, PVP, and PVE statistics.
- **Advanced Analytics**: Generates detailed stats, heatmaps, and automated server restart notifications.
- **Customisation**: Highly adaptable for different server types, including RP, PVE, and PVP environments.
- **Automation Tools**: Includes features for server automation and player management.

Community Reputation

- **Positive Reviews**: The bot is highly rated on Trustpilot, with users praising its ease of use and fast customer support.
- **Controversy**: Some community discussions on Facebook have raised allegations regarding the developer's practices, though these are anecdotal and sit alongside a largely positive rating on major review platforms.

For setup and support, you can join their official community on Discord.

Are you looking for **setup instructions** for a specific platform, or do you need help with **custom commands** for the bot?

AI can make mistakes, so double-check responses

I'd really appreciate it if you could, I don't want to give you a sob story or whatever but I've been fighting against major defamation and seo manipulation that has tanked my business so if you could please just remove the DayZ++ comment it would be a huge help. My full story is on https://they-wish-i.died.space/ and it includes people telling me to end my life, using pictures of my kids and more, I have all the proof available on that site, plus AI generated songs that were made based on the evidence so for those who don't want to read the whole thing, but it would be a huge help if you could please consider it.

Not sure if this is allowed on here or not, but I'm working on my server and ran into a snag when trying to set up the Legion Killfeed on my discord. If anyone has used this before or can point me in the direction of someone who can help me finish setting it up, that would be great.

Formal 7-day notice sent to DayZ Editors admin regarding moderation and legal exposure

Platform: Google

EVENT CONTEXT

Moderator refusal and Trustpilot non-removal evidence

Evidence captured on this date shows a Facebook group administrator refusing to moderate a comment recommending a competing bot in a thread affecting reputation, and a Trustpilot consumer review remaining visible despite being flagged

WHAT THIS SHOWS

Screenshot of a direct message sent to the DayZ Editors admin setting out the moderation issue and giving 7 days to action before escalation

REFERENCES

DayZ++ is probably the best bot out there for that so no I'm not going to delete a comment of someone recommending it.

Pinned

Would you consider deleting the post entirely then as it was simply someone asking for support, which I was willing to provide, had they used the support discord I would have been immediately aware of it. Otherwise, For the avoidance of doubt, this message is a formal concerns notice under Australia's uniform defamation laws (including the Defamation Act 2005 (NSW)).

The comment thread on:
https://www.facebook.com/groups/dayzeditors/posts/1385739236246930/

is being indexed and surfaced externally in a way that attributes negative context to my business (Legion Killfeed), despite the post being a request for help. I have already raised this with you and you have confirmed you are refusing to remove it.

As a group admin/moderator you have the capacity to hide, remove, or moderate comments. Once you are on notice and choose to keep material published, you may be treated as a publisher for liability purposes.

I am requesting you do one of the following immediately:

Remove or hide the DayZ++ recommendation comment from that Legion help thread, or

Move it to a separate post, or

Edit it to make it explicit it is a general recommendation and not a complaint or criticism about Legion, and disable further piling-on in that thread.

Please also preserve records relating to this post and moderation actions (timestamps, edits, user IDs, and any admin/mod logs), as they may be required.

If you refuse to take any moderation step after this notice, I will treat that as publication after notice and proceed with platform escalation and legal advice regarding action against all relevant publishers, including administrators/moderators who keep the material live after notice.

You pinned a message. See All

Lol you're a goof man. Good luck with that.

Your response is noted and preserved.

For clarity, this correspondence constitutes a formal concerns notice under the Defamation Act 2005 (NSW) and the uniform Australian defamation scheme.

The material in question is the comment within the thread at:
https://www.facebook.com/groups/dayzeditors/posts/1385739236246930/

The issue is not general competition. The issue is that the thread is being indexed externally in a way that conveys imputations that my business is problematic or inferior, when the original post was a request for setup assistance. I have placed you on notice that the ongoing publication of that thread in its current state is causing reputational harm.

You are an administrator with the capacity to hide, remove, limit, or contextualise comments. Once on notice, a moderator who elects to keep material published may be treated as a publisher for the purposes of liability.

I formally request that within 7 days you:

Remove or hide the relevant recommendation from that thread, or

Lock the thread and add clear context that it is not a complaint about Legion Killfeed, or

Provide written confirmation of the moderation steps you are taking to prevent further misleading indexing and reputational harm.

Please preserve all moderation logs, timestamps, edits, and admin actions relating to this post.

If no action is taken following this notice, I will proceed on the basis that publication

Please preserve all moderation logs, timestamps, edits, and admin actions relating to this post.

If no action is taken following this notice, I will proceed on the basis that publication is continuing after notice and will seek legal advice regarding next steps.

https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue

Explain in detail why you believe the content on the above URL(s) is unlawful, citing specific provisions of law wherever possible. For requests other than defamation, Google shares the information in this open text field with Lumen for transparency purposes. Do not include any personal data in your explanation. For more information about Lumen, see here.

I am requesting removal or delisting from Google Search of the URLs listed below because they index and amplify false, harmful, and defamatory allegations about an identifiable Australian business and its owner.The indexed Reddit thread and linked comments publish serious allegations as statements of fact, including claims that the business “hacks”, “steals files”, “sells customer files/data”, contains “malicious code”, and is used to “hack” or damage servers. These are specific, verifiable allegations of criminality, dishonesty, data misuse, and unsafe conduct. They are false. They are not framed as opinion, speculation, or rhetorical abuse. They are presented to readers as factual claims about the business and its operator.The continued appearance of these URLs in Google Search is causing substantial ongoing harm. The content has contributed to customer cancellations, reputational damage, and targeted off-platform harassment. Because the thread ranks prominently for brand-related queries, its placement in search results gives the allegations an appearance of credibility and authority that they do not deserve. Search users are likely to treat the claims as true simply because Google continues to surface them prominently.The harm is compounded by the way Google Search organises and presents results. When these URLs are ranked highly, and are capable of being selected, excerpted, or summarised by Google’s search features, unverified defamatory allegations are elevated over legitimate and verifiable sources such as official business pages, product information, and genuine review material. This materially increases the likelihood that users will accept false claims as true and directly worsens the reputational and commercial damage being inflicted.This is not a mere disagreement, criticism, or

fair negative review. The indexed material goes far beyond opinion. It contains concrete accusations of hacking, file theft, data theft, malicious code, scams, and server sabotage. Those are allegations capable of objective verification and they convey highly damaging imputations. Their continued indexing serves no legitimate public interest when they are being used as part of a targeted campaign to injure a business and its owner.There are also strong indicators that the thread forms part of a coordinated and commercially motivated smear campaign. The originating post and the most harmful comments are reasonably suspected to have been made by a direct competitor, or by persons acting in concert with that competitor, for the purpose of damaging the business commercially. Evidence indicates that sockpuppet accounts linked to that competitor were used to repeat and reinforce the most damaging false allegations, including within a subreddit where that competitor held moderator privileges. The thread has functioned as a vehicle for the repeated publication and amplification of false claims intended to discourage subscriptions, provoke cancellations, and incite further harassment.I have repeatedly reported the specific Reddit URLs since 2024 through Reddit's reporting channels and escalations, and I have served formal notices identifying the exact URLs, the specific defamatory excerpts, and the need for removal and preservation. Reddit has refused meaningful action, issued template-style responses that do not address the falsifiable nature of the allegations, and stated it will not preserve or disclose relevant account information without legal process. The material remains accessible and Google continues to amplify it through search indexing.In these circumstances, continued indexing by Google is not neutral in effect. It is an active mechanism by which demonstrably false and highly damaging allegations are surfaced, legitimised by ranking, and distributed to users searching for the affected business. I therefore request that Google remove or delist the URLs below from Search results relating to the business and its owner.Allegedly infringing URLs:

Has this happened to anyone else? Is he always such a douche? He didn't let me prove anything just accused me a bunch and I've never met the dude or had any other interactions yet he was adamant that because I was on aggro I must be some sort of hack or something I'm not sure. I'm just really confused and would like some alternatives to the kill feed I've seen a few but if anyone has any recommendations that are easier for first time users I'd be appreciative.
UPDATE: Soul responded and made a fake account which he accused me of, to comment on this post 2 months later after a few others came forward about his behavior towards them.
UPDATE #2: Soul has made multiple fake accounts now and is still commenting on this post 6 months later!! Don't press on any of the links or anything that he sends I've been informed he's a serious problem in the coding/DayZ community. If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/
The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame as I didn't even see that he replied. I also had settings setup where I dont see anything except @. More dramatic than a fucking woman.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/
Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kyv8inc/
Lmao bro you made a fake account to comment on a post from 2 months ago. Grow TF up, I've moved on and found a better bot and multiple people have said you're a hack. I don't need anything else from you, and I blocked for the same reason I'm gonna block you before you can see this. You are not worth it to argue with you're clearly delusional and have a real issue

with people calling you out on your bs (hence make a fake 2 months later 😆) I've even had people send private DMs confirming you did similar if not the same shit. Anyway you're just making yourself look worse, Maybe get therapy?
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kywtf93/
There's been hundreds of complaints in the community about legion Killfeed. The bot downloads custom files from customers and the owner Soul (the Killfeed maker) sells them for profit.
Soul is a known Scammer is so many communities. Would never ever ever trust him to hwww a token for any server!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/l5a15bj/
So many bad experiences with Legion killfeed. This bot should be watched and avoided at all cost it might look okay but the code has malicious intent. It removed and edited my files without my permission. It also adjusted servers settings was twww " it's needed for the bot to work"
Soul has screwed over other owners in the past and has a bad reputation with a lot of servers owners.
DO YOUR RESEARCH BEFORE ADDING LEGION KILLFEED!!!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/ldsxli3/
Soul has done nothing for his killfeed and when asked about it I got banned with no money back on my subscription. He's just going and scamming people for their tokens and money I would highly recommend any other bot.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt64ot/
This is not the user you are questioning. The information was leaked along with a database dump. Soul is known to use FTP to destroy servers and wreak havoc on the DayZ community. The user is also more focused on drama than basic security needs, including SQL injection into the database, which has yet to be fixed. There are many people who provide clear evidence that this user is only interested in financial gain and personal gain of important information. This user is hijacking user files using a token to sell and distribute user files for financial gain. Check out the replies and feedback from other users listed in this thread.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/nreb800/
Holy moly guys, I had the worst experience with LegionKillfeed. That soul boy is such a clown. Unwilling to assist with anything. Threats ppl like garbage. You can definitely tell the lawsuits are getting the better of him. Do yourselves a massive favour and join dayz++ instead. Their services is just 110% better and actually worth your time, money and energy."
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt7b2s/
If you're looking to get hacked and have your files stolen by Soul Lags, actually pay his fee and don't cry when it happens. Soul is committed to creating drama in the community. He doesn't care about you or anyone else; he only cares about his drama and will base his entire business around it. The man is more focused on drama than on working on his broken bots with poor security.

I have good faith belief that the reported content is unlawful for the reasons stated above. I confirm that the information I have provided is accurate to the best of my knowledge.
Please note we may suspend the processing of notifications of allegedly illegal content submitted by individuals or entities that frequently submit manifestly unfounded notifications. Find more information about our misuse policy here.
Please check to confirm

Legion Kill feed, What's souls issue?

So I ate completely confused. I logged a server yesterday morning, changed the last summary, animal/zombies quantity and spawn points, but that all set up and noticed a few people pick here and there, so I started a discord server last night around midnight and started adding the unjoined/filled. I got everything set up added my ign token which I think I've tried it. I lack the permissions, so I guess I was trying to edit even more a dev list and on what I could do with the kill feed but I cannot. I channel so the kill feed left my server and I kind adding it back, and the API token wasn't working so I tried to get the tools help and accidentally wiped to the server entirely. I lost the ship a few more times and I lost or was confused I thought it was fixed when out messaged me asking what's my problem. I responded and said I haven't got any problems with setting it up and this is what they replied "Kill stats (zeros) are just using a token sending. Check the tools." Now, I'm 100% an dh tipsy fuck with my skill, this only had my last in here get a "dev" I responded and they stopped texting me. So I guess the kill feed doesn't and he had it on me and I and what's my problem I said nothing that I just read help, explained and he just kept accusing me of being an idiot something and having a problem

Response to Google Legal Removal Request Matter: [1-3859000040385]

Hello Google Team, Thank you for your email. In response to your request, the exact text complained of is identified in Appendix A.

The material is complained of as defamatory under Australian law, and provides a firm formal notice that the material is disputed and has already been reported.
The quoted material identifies the specific statements that accuse Legion Killfeed and its owner of hacking, file theft, data theft, malicious code, scam conduct, server sabotage, and related misconduct.

Why the content is complained of as unlawful:
The material is complained of as defamatory because it states damaging factual allegations as facts, not as neutral opinion. The excerpts also include a competitor framing narrative and repeated publication over time. Relevant law: Defamation Act 2005 (NSW), as part of Australia's uniform defamation framework.

Reddit removal procedure:
The supplied Google email already confirms Google asked for confirmation that the Reddit removal procedure had been attempted.

Formal notice:
Google and Reddit are on notice that the complained-of material is disputed, is alleged to be defamatory, and is relied on as repeated publication that has already been reported. Key connections shown in the material Connection
What the record shows
Competitor narrative The thread contains a direct line about "competitor slander" and a separate recommendation to use dayz++ instead.
Repeated false factual claims
Multiple comments accuse Legion Killfeed of hacking, file theft, data theft, malicious code, server destruction, and scamming.
Repeated publication
The supplied material shows updates and reposted comments over months, not a single isolated remark.

Notice already given
The Google email supplied with the PDF shows the matter has already been escalated and Google is seeking further specificity.

Appendix A - exact text identified
The excerpts below are copied from the uploaded material and grouped by URL.
One URL requested by Google is referenced in the supplied email without a legible excerpt in the extracted PDF text, so that item is noted separately at the end.

The material published on Reddit alleges, as statements of fact, that Legion Killfeed and its owner hack, steal files, sell customer files or data, use malicious code, destroy servers, abuse FTP access, and engage in scam conduct.
Those allegations are false. They are not presented as limited opinion or lawful criticism. They are framed as factual accusations and repeated in a way that materially damages the reputation and commercial standing of an identifiable Australian business and its owner.

The material also shows a broader competitor narrative, including a direct reference to "competitor slander" and a separate recommendation to use dayz++ instead. That context matters because it shows the publication is not a neutral review. It is part of a repeated and harmful smear campaign. Please also note that Reddit has already been approached through its removal process, and Google has already been placed on notice through the removal request referenced in this correspondence.

This document is provided so the record is clear, the exact statements are identified, and the complained-of material can be assessed without ambiguity. This is formal notice that the complained-of statements are disputed and are complained of as defamatory publications under Australian law, including the Defamation Act 2005 (NSW). Continued publication, republication, or continued indexing after notice is relied upon and reserved for any further complaint or proceeding.

In the supplied zip folder there are repeated occurrences of Google relisting this alongside my business, on occasions this has appear higher than my own website. I have repeatedly told you about this crime that you continue to facilitate, Failure to act within the law and refusal to do as you are legally required will result in legal action and I will definitely be telling my whole story to the media if I have to sue you, now, [lease confirm receipt and proceed with the removal / delisting assessment on the basis of the text identified above.

Allegedly infringing URLs

https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue

Explain in detail why you believe the content on the above URL(s) is unlawful, citing specific provisions of law wherever possible. For requests other than defamation, Google shares the information in this open text field with Lumen for transparency purposes. Do not include any personal data in your explanation. For more information about Lumen, see here.

I am requesting removal or delisting from Google Search of the URLs listed below because they index and amplify false, harmful, and defamatory allegations about an identifiable Australian business and its owner.The indexed Reddit thread and linked comments publish serious allegations as statements of fact, including claims that the business “hacks”, “steals files”, “sells customer files/data”, contains “malicious code”, and is used to “hack” or damage servers. These are specific, verifiable allegations of criminality, dishonesty, data misuse, and unsafe conduct. They are false. They are not framed as opinion, speculation, or rhetorical abuse. They are presented to readers as factual claims about the business and its operator.The continued appearance of these URLs in Google Search is causing substantial ongoing harm. The content has contributed to customer cancellations, reputational damage, and targeted off-platform harassment. Because the thread ranks prominently for brand-related queries, its placement in search results gives the allegations an appearance of credibility and authority that they do not deserve. Search users are likely to treat the claims as true simply because Google continues to surface them prominently.The harm is compounded by the way Google Search organises and presents results. When these URLs are ranked highly, and are capable of being selected, excerpted, or summarised by Google’s search features, unverified defamatory allegations are elevated over legitimate and verifiable sources such as official business pages, product information, and genuine review material. This materially increases the likelihood that users will accept false claims as true and directly worsens the reputational and commercial damage being inflicted.This is not a mere disagreement, criticism, or fair negative review. The indexed material goes far beyond opinion. It contains concrete accusations of hacking, file theft, data theft, malicious code, scams, and server sabotage. Those are allegations capable of objective verification and they convey highly damaging imputations. Their continued indexing serves no legitimate public interest when they are being used as part of a targeted campaign to injure a business and its owner.There are also strong indicators that the thread forms part of a coordinated and commercially motivated smear campaign. The originating post and the most harmful comments are reasonably suspected to have been made by a direct competitor, or by persons acting in concert with that competitor, for the purpose of damaging the business commercially. Evidence indicates that sockpuppet accounts linked to that competitor were used to repeat and reinforce the most damaging false allegations, including within a subreddit where that competitor held moderator privileges. The thread has functioned as a vehicle for the repeated publication and amplification of false claims intended to discourage subscriptions, provoke cancellations, and incite further harassment.I have repeatedly reported the specific Reddit URLs since 2024 through Reddit’s reporting channels and escalations, and I have served formal notices identifying the exact URLs, the specific defamatory excerpts, and the need for removal and preservation. Reddit has refused meaningful action, issued template-style responses that do not address the falsifiable nature of the allegations, and stated it will not preserve or disclose relevant account information without legal process. The material remains accessible and Google continues to amplify it through search indexing.In these circumstances, continued indexing by Google is not neutral in effect. It is an active mechanism by which demonstrably false and highly damaging allegations are surfaced, legitimised by ranking, and distributed to users searching for the affected business. I therefore request that Google remove or delist the URLs below from Search results relating to the business and its owner.Allegedly infringing URLs:
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue

Has this happened to anyone else? Is he always such a douche? He didn't let me prove anything just accused me a bunch and I've never met the dude or had any other interactions yet he was adamant that because I was on aggro I must be some sort of hack or something I'm not sure. I'm just really confused and would like some alternatives to the kill feed I've seen a few but if anyone has any recommendations that are easier for first time users I'd be appreciative.
UPDATE: Soul responded and made a fake account which he accused me of, to comment on this post 2 months later after a few others came forward about his behavior towards them.
UPDATE #2: Soul has made multiple fake accounts now and is still commenting on this post 6 months later!! Don't press on any of the links or anything that he sends I've been informed he's a serious problem in the coding/DayZ community. If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/
The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame as I didn't even see that he replied. Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kyv8inc/

Clear Demand Re 1 3859000040385 Youe Request To Google

Platform: Google · Reddit

EVENT CONTEXT

Google, Reddit, Trustpilot, and Joel Walker evidence converge

The April 19 evidence groups together Google-removals correspondence, Google search-result screenshots, a Lumen notice, a Trustpilot removal confirmation, a Discord apology after misinformation was repeated, and multiple Facebook/Trustpilot-style posts by Joe L Walker.

The day·s evidence shows the Reddit accusations being surfaced by search, challenged through legal/removal channels, repeated in other communities, and paired with competitor promotion and hostile review content

WHAT THIS SHOWS

Consolidated follow-up to Google demanding reassessment of Reddit URLs and search surfacing

Re: [1-3859000040385] Your Request to Google

Legion Killfeed <legion.killfeed@gmail.com>
To: removals@google.com

Hello Google Legal Team,

I refer to matter [1-3859000040385].

This is a consolidated follow-up so the same material is not treated as separate issues each time it resurfaces in Google Search in a slightly different URL format, redirect format, snippet format, or related result format.

I am Anthony Brodie, also known publicly as “Soul” in the DayZ community. I am the owner and operator of Legion Killfeed, which I run as a sole trader. The complained-of material identifies both me personally and my business directly. My standing is therefore not in issue.

This complaint concerns defamatory material and repeated harmful surfacing of that material in Google Search for direct brand queries relating to my business. I also rely, separately and without waiving the defamation basis, on the Online Safety Act 2021 (Cth): https://www.legislation.gov.au/C2021A00076/latest/text

The primary defamation basis is the Defamation Act 2005 (NSW): https://legislation.nsw.gov.au/view/whole/html/inforce/current/act-2005-077

For the avoidance of doubt, please treat all URLs below as part of the same removal issue and reassessment request, not as isolated unrelated complaints.

EXACT GOOGLE SEARCH / RESULT / REDIRECT URLS

- https://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=&cad=rja&uact=8&ved=2ahUKEwiu0dXj2veTAxWOn68BHeD7MCgQFnoECCgQAQ&url=https%3A%2F%2Fwww.reddit.com%2Fr%2FDayZDiscussions%2Fcomments%2F19e9o29%2Flegion_kill_feed_whats_souls_issue%2F&usg=AOvVaw2vPfl2oMwD5c7OjhnyH6gy&opi=89978449
- Reason: This is the Google redirect URL currently surfacing the core Reddit thread for my business name. It is the main search-result pathway Google is using to send users to the defamatory thread.
- https://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=&cad=rja&uact=8&ved=2ahUKEwiu0dXj2veTAxWOn68BHeD7MCgQ77oQegQIKxAC&url=https%3A%2F%2Fwww.reddit.com%2Fr%2FDayZDiscussions%2Fcomments%2F19e9o29%2Flegion_kill_feed_whats_souls_issue%2F%23A~%3Atext%3DLegion%2520Killfeed%2520is%2520just%2520around%2Che%2520had%2520FTP%2520access%2520to.&usg=AOvVaw2vPfl2oMwD5c7OjhnyH6gy&opi=89978449
- Reason: This is a distinct Google result format using a text fragment that jumps users directly to the defamatory excerpt accusing me of collecting and selling files and referencing FTP-related allegations. It amplifies the most harmful text directly.
- https://share.google/8BvGsv1DwR3rMePov
- Reason: This is another Google-controlled result/share URL for the same material. It is included because the same defamatory result has already resurfaced through different Google URL formats.
- https://www.google.com/search?q=legion+killfeed&rlz=1C1SLLM_enAU1189AU1189&oq=legion+killfeed&gs_lcrp=EgZjaHJvbWUyBggAEEUYOTIGCAEQRRhAMgYIAhBFGDsyBggDEEUYOzIGCAQQRRg8MgYIBRBFGDwyBggGEEUYPDIGCAcQRRhB0gEIMzA1NWowajGoAgCwAgA&sourceid=chrome&ie=UTF-8&sei=qV5maZqdM9Gg0-kP9ofkmQQ
- Reason: This search results page URL shows the defamatory result surfacing for a direct search of my business name.
- https://www.google.com/search?client=opera-gx&q=Legion+Killfeed
- Reason: This search results page URL also shows the defamatory result surfacing for a direct search of my business name.
- https://www.google.com/search?q=legion+killfeed
- Reason: This is the generic direct search query for my business name where the defamatory result continues to surface.

UNDERLYING REDDIT DESTINATION URLS AND VARIANTS

- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/
- Reason: This is the core Reddit thread containing the overall defamatory narrative about me and my business.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/#:~:text=Legion%20Killfeed%20is%20just%20around,he%20had%20FTP%20access%20to
- Reason: This variant links directly to the highlighted defamatory excerpt accusing Legion Killfeed of collecting and selling files and referring to FTP-related wrongdoing.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kwcjm4s/
- Reason: Contains the allegation that “Legion Killfeed is just around to collect and sell your files” and that I deleted server files and servers I had FTP access to. This is a direct allegation of theft, sabotage, and misconduct.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/

EXACT MATERIAL COMPLAINED OF

The indexed and linked material publishes false statements as statements of fact, including allegations that I and/or Legion Killfeed collect and sell customer files or data, steal files, hack users or servers, destroy or sabotage servers, misuse FTP or token access, use malicious code, scam customers, hijack user files, and alter files or settings without permission.

Examples already identified in prior correspondence include allegations that:

- “Legion Killfeed is just around to collect and sell your files”;
- “Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to”;
- “The bot downloads custom files from customers and the owner Soul sells them for profit”;
- “This bot should be watched and avoided … the code has malicious intent”;
- “Soul is known to use FTP to destroy servers”;
- “If you're looking to get hacked and have your files stolen by Soul …”.

These are allegations of criminality, dishonesty, unsafe conduct, data misuse, and serious commercial misconduct. They are not harmless insults. They are not neutral summaries. They are not properly verified findings. They are presented as factual accusations and they have caused continuing reputational, commercial and personal harm.

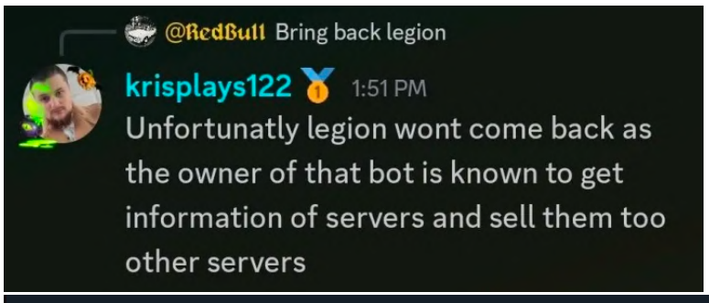
To assist with assessment of this matter, I have a video showing the connections between the Reddit account and a direct competitor, evidence that he is pushing these accusations about me, evidence that he confessed to the very conduct he alleges against me, and evidence that all three of the people actually affected expressly stated it was not me and instead accused him. It is available here and is also attached via a Google Drive link

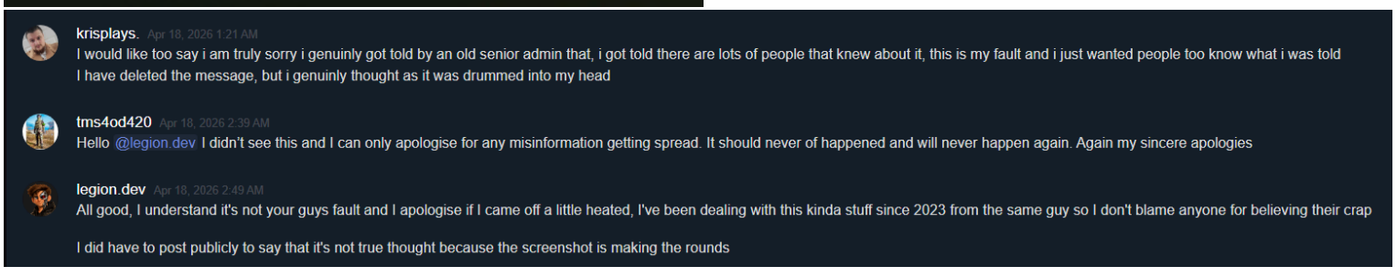
Oops.mp4

And my own site's link: https://killfeed.co/videos/OOPS.mp4

I expect this matter to now be resolved. This slander is currently being placed beside my business name and is indexing at 2nd result when users search for my business. That is directly causing financial harm. The attached screenshots provide a clear example of that harm in practice, because I have lost customers as a result of these search results being allowed to sit beside my business.

One of the attached screenshot sets relates to a staff member from a server that had been using my service until around 6 months ago. Those screenshots show the misinformation being repeated because of what had been surfaced about my business, and then later show that after I contacted them, they understood the issue and apologised for spreading the misinformation.





LEGAL BASIS

I rely on the Defamation Act 2005 (NSW): https://legislation.nsw.gov.au/view/whole/html/inforce/current/act-2005-077 including sections 10A, 12A, 12B, 23A, 25, 29A, 31 and 39A.

I also rely, separately and without waiving the defamation basis, on the Online Safety Act 2021 (Cth): https://www.legislation.gov.au/C2021A00076/latest/text including sections 5 and 7 and Part 7.

This email is not asking Google to remove third-party webpages from the internet. It is asking Google to assess and stop the continued surfacing, ranking, redirecting, snippet generation, and repeated amplification of clearly identified unlawful material after repeated detailed notice.

Please do not treat the different URL forms above as separate issues merely because the same material appears as:

- a direct Reddit thread URL;
- a comment URL;
- a thread/comment path variant;
- a Google redirect URL;
- a Google text-fragment URL;
- a Google share URL; or
- a Google Search results URL showing the same result.

They all concern the same complained-of material and the same continuing harm.

REQUESTED ACTION

I request that Google:

- reassess all URLs listed above together as one consolidated complaint and repeat-surfacing issue;
- delist or otherwise restrict the Reddit result(s) and associated redirect/result formats from Google Search for searches relating to “legion killfeed” and closely related brand queries;
- reassess the related connected URLs listed above that have already been raised in prior Google removals correspondence;
- confirm that my standing as the affected person is no longer in issue;
- confirm that the legal basis above is being considered under the applicable Australian law; and
- confirm receipt of the attached PDFs and screenshots and add them to the assessment record for this matter.

RESERVATION OF RIGHTS

For the avoidance of doubt, nothing in this notice waives any rights I may have in relation to continued publication or republication, including rights relating to preliminary discovery and, where statutory conditions are met, orders against non-party digital intermediaries concerning defamatory digital matter.

Please confirm receipt and proceed with reassessment of all listed URLs on a consolidated basis.

Regards,
Anthony “Soul” Brodie - Legion Killfeed

Clear Demand Re 1 3859000040385 Your Request To Google

Platform: Google · Reddit

EVENT CONTEXT

Google, Reddit, Trustpilot, and Joel Walker evidence converge

The April 19 evidence groups together Google-removals correspondence, Google search-result screenshots, a Lumen notice, a Trustpilot removal confirmation, a Discord apology after misinformation was repeated, and multiple Facebook/Trustpilot-style posts by Joe L Walker.

The day·s evidence shows the Reddit accusations being surfaced by search, challenged through legal/removal channels, repeated in other communities, and paired with competitor promotion and hostile review content

WHAT THIS SHOWS

Consolidated follow-up to Google demanding reassessment of Reddit URLs and search surfacing

Re: [1-3859000040385] Your Request to Google

Legion Killfeed <legion.killfeed@gmail.com>
To: removals@google.com

Sun, Apr 19, 2026 at 7:51 AM

Hello Google Legal Team,

I refer to matter [1-3859000040385].

This is a consolidated follow-up so the same material is not treated as separate issues each time it resurfaces in Google Search in a slightly different URL format, redirect format, snippet format, or related result format.

I am Anthony Brodie, also known publicly as “Soul” in the DayZ community. I am the owner and operator of Legion Killfeed, which I run as a sole trader. The complained-of material identifies both me personally and my business directly. My standing is therefore not in issue.

This complaint concerns defamatory material and repeated harmful surfacing of that material in Google Search for direct brand queries relating to my business. I also rely, separately and without waiving the defamation basis, on the Online Safety Act 2021 (Cth): https://www.legislation.gov.au/C2021A00076/latest/text

The primary defamation basis is the Defamation Act 2005 (NSW): https://legislation.nsw.gov.au/view/whole/html/inforce/current/act-2005-077

For the avoidance of doubt, please treat all URLs below as part of the same removal issue and reassessment request, not as isolated unrelated complaints.

EXACT GOOGLE SEARCH / RESULT / REDIRECT URLS

- https://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=&cad=rja&uact=8&ved=2ahUKEwiu0dXj2veTAxWOn68BHeD7MCgQFnoECCgQAQ&url=https%3A%2F%2Fwww.reddit.com%2Fr%2FDayZDiscussions%2Fcomments%2F19e9o29%2Flegion_kill_feed_whats_souls_issue%2F&usg=AOvVaw2vPfl2oMwD5c7OjhnyH6gy&opi=89978449
- Reason: This is the Google redirect URL currently surfacing the core Reddit thread for my business name. It is the main search-result pathway Google is using to send users to the defamatory thread.
- https://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=&cad=rja&uact=8&ved=2ahUKEwiu0dXj2veTAxWOn68BHeD7MCgQ77oQegQIKxAC&url=https%3A%2F%2Fwww.reddit.com%2Fr%2FDayZDiscussions%2Fcomments%2F19e9o29%2Flegion_kill_feed_whats_souls_issue%2F%23A~%3Atext%3DLegion%2520Killfeed%2520is%2520just%2520around%2Che%2520had%2520FTP%2520access%2520to.&usg=AOvVaw2vPfl2oMwD5c7OjhnyH6gy&opi=89978449
- Reason: This is a distinct Google result format using a text fragment that jumps users directly to the defamatory excerpt accusing me of collecting and selling files and referencing FTP-related allegations. It amplifies the most harmful text directly.
- https://share.google/8BvGsv1DwR3rMePov
- Reason: This is another Google-controlled result/share URL for the same material. It is included because the same defamatory result has already resurfaced through different Google URL formats.
- https://www.google.com/search?q=legion+killfeed&rlz=1C1SLLM_enAU1189AU1189&oq=legion+killfeed&gs_lcrp=EgZjaHJvbWUyBggAEEUYOTIGCAEQRRhAMgYIAhBFGDsyBggDEEUYOzIGCAQQRRg8MgYIBRBFGDwyBggGEEUYPDIGCAcQRRhB0gEIMzA1NWowajGoAgCwAgA&sourceid=chrome&ie=UTF-8&sei=qV5maZqdM9Gg0-kP9ofkmQQ
- Reason: This search results page URL shows the defamatory result surfacing for a direct search of my business name.
- https://www.google.com/search?client=opera-gx&q=Legion+Killfeed
- Reason: This search results page URL also shows the defamatory result surfacing for a direct search of my business name.
- https://www.google.com/search?q=legion+killfeed
- Reason: This is the generic direct search query for my business name where the defamatory result continues to surface.

UNDERLYING REDDIT DESTINATION URLS AND VARIANTS

- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/
- Reason: This is the core Reddit thread containing the overall defamatory narrative about me and my business.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/#:~:text=Legion%20Killfeed%20is%20just%20around,he%20had%20FTP%20access%20to
- Reason: This variant links directly to the highlighted defamatory excerpt accusing Legion Killfeed of collecting and selling files and referring to FTP-related wrongdoing.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kwcjm4s/
- Reason: Contains the allegation that “Legion Killfeed is just around to collect and sell your files” and that I deleted server files and servers I had FTP access to. This is a direct allegation of theft, sabotage, and misconduct.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/
- Reason: Same defamatory content as above in alternate Reddit path format. Included because Google has previously treated alternate URL variants separately.
- https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/kywtf93/
- Reason: Contains the allegation that the bot downloads custom files from customers and that I sell them for profit, and calls me a scammer. This is a direct allegation of theft, data misuse, and fraud.

EVENT CONTEXT

Google, Reddit, Trustpilot, and Joel Walker evidence converge

The April 19 evidence groups together Google-removals correspondence, Google search-result screenshots, a Lumen notice, a Trustpilot removal confirmation, a Discord apology after misinformation was repeated, and multiple Facebook/Trustpilot-style posts by Joe L Walker.

The day·s evidence shows the Reddit accusations being surfaced by search, challenged through legal/removal channels, repeated in other communities, and paired with competitor promotion and hostile review content

We strive to make sure that each of our domains complies with the laws of the relevant country. We are unfamiliar with the law that you mention and would appreciate it if you could provide us with a copy of the law that you believe is at issue (a copy of the statute, code, etc.) to assist us in understanding how you believe this content violates the law.

Please note that a copy of each legal notice that we receive may be sent to the Lumen project (http://www.lumendatabase.org) for publication and annotation. Lumen is a joint project between law schools in the United States that seeks to provide a database of and information on requests to remove information from the Internet. Lumen redacts personal contact information (i.e. phone number, email and address) from notices before publication. Visit http://www.lumendatabase.org/international/notice.cgi?NoticeID=1860 for an example of such a publication.

A link to the published notice may be displayed in Google's search results in place of the removed content. We may also publish similar information from your notice to our Transparency Report.

Response to Google Legal Removal Request Matter: [1-3859000040385]

Hello Google Team, Thank you for your email. In response to your request, the exact text complained of is identified in Appendix A.

The material is complained of as defamatory under Australian law, and provides a firm formal notice that the material is disputed and has already been reported.
The quoted material identifies the specific statements that accuse Legion Killfeed and its owner of hacking, file theft, data theft, malicious code, scam conduct, server sabotage, and related misconduct.

Why the content is complained of as unlawful:
The material is complained of as defamatory because it states damaging factual allegations as facts, not as neutral opinion. The excerpts also include a competitor framing narrative and repeated publication over time. Relevant law: Defamation Act 2005 (NSW), as part of Australia's uniform defamation framework.

Reddit removal procedure:
The supplied Google email already confirms Google asked for confirmation that the Reddit removal procedure had been attempted.

Formal notice:
Google and Reddit are on notice that the complained-of material is disputed, is alleged to be defamatory, and is relied on as repeated publication that has already been reported. Key connections shown in the material Connection
What the record shows
Competitor narrative The thread contains a direct line about "competitor slander" and a separate recommendation to use dayz++ instead.
Repeated false factual claims
Multiple comments accuse Legion Killfeed of hacking, file theft, data theft, malicious code, server destruction, and scamming.
Repeated publication
The supplied material shows updates and reposted comments over months, not a single isolated remark.

Notice already given
The Google email supplied with the PDF shows the matter has already been escalated and Google is seeking further specificity.

Appendix A - exact text identified
The excerpts below are copied from the uploaded material and grouped by URL.
One URL requested by Google is referenced in the supplied email without a legible excerpt in the extracted PDF text, so that item is noted separately at the end.

URL Exact text / excerpt
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue Has this happened to anyone else? Is he always such a douche? He didn't let me prove anything just accused me a bunch and I've never met the dude or had any other interactions yet he was adamant that because I was on aggro I must be some sort of hack or something I'm not sure. I'm just really confused and would like some alternatives to the kill feed I've seen a few but if anyone has any recommendations that are easier for first time users I'd be appreciative. UPDATE: Soul responded and made a fake account which he accused me of, to comment on this post 2 months later after a few others came forward about his behavior towards them. UPDATE #2: Soul has made multiple fake accounts now and is still commenting on this post 6 months later!! Don't press on any of the links or anything that he sends I've been informed he's a serious problem in the coding/DayZ community. If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made!
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/ The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame as I didn't even see that he replied. I also had settings setup where I dont see anything except @. More dramatic than a fucking woman.
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/ Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords.
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kyv8inc/ Lmao bro you made a fake account to comment on a post from 2 months ago. Grow TF up, I've moved on and found a better bot and multiple people have said you're a hack. I don't need anything else from you, and I blocked for the same reason I'm gonna block you before you can see this. You are not worth it to argue with you're clearly delusional and have a real issue with people calling you out on your bs (hence make a fake 2 months later 😆) I've even had people send private DMs confirming you did similar if not the same shit. Anyway you're just making yourself look worse, Maybe get therapy?
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kywtf93/ There's been hundreds of complaints in the community about legion Killfeed. The bot downloads custom files from customers and the owner Soul (the Killfeed maker) sells them for profit. Soul is a known Scammer is so many communities. Would never ever ever trust him to hwww a token for any server!
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/l5a15bj/ So many bad experiences with Legion killfeed. This bot should be watched and avoided at all cost it might look okay but the code has malicious intent. It removed and edited my files without my permission. It also adjusted servers settings was twww "it's needed for the bot to work" Soul has screwed over other owners in the past and has a bad reputation with a lot of servers owners. DO YOUR RESEARCH BEFORE ADDING LEGION KILLFEED!!!
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/ldsxli3/ Soul has done nothing for his killfeed and when asked about it I got banned with no money back on my subscription. He's just going and scamming people for their tokens and money I would highly recommend any other bot.
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt64ot/ This is not the user you are questioning. The information was leaked along with a database dump. Soul is known to use FTP to destroy servers and wreak havoc on the DayZ community. The user is also more focused on drama than basic security needs, including SQL injection into the database, which has yet to be fixed. There are many people who provide clear evidence that this user is only interested in financial gain and personal gain of important information. This user is hijacking user files using a token to sell and distribute user files for financial gain. Check out the replies and feedback from other users listed in this thread.
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/nreb800/ Holy moly guys, I had the worst experience with LegionKillfeed. That soul boy is such a clown. Unwilling to assist with anything. Threats ppl like garbage. You can definitely tell the lawsuits are getting the better of him. Do yourselves a massive favour and join dayz++ instead. Their services is just 110% better and actually worth your time, money and energy.
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt7b2s/ If you're looking to get hacked and have your files stolen by Soul Lags, actually pay his fee and don't cry when it happens. Soul is committed to creating drama in the community. He doesn't care about you or anyone else; he only cares about his drama and will base his entire business around it. The man is more focused on drama than on working on his broken bots with poor security.

The material published on Reddit alleges, as statements of fact, that Legion Killfeed and its owner hack, steal files, sell customer files or data, use malicious code, destroy servers, abuse FTP access, and engage in scam conduct.
Those allegations are false. They are not presented as limited opinion or lawful criticism. They are framed as factual accusations and repeated in a way that materially damages the reputation and commercial standing of an identifiable Australian business and its owner.

The material also shows a broader competitor narrative, including a direct reference to "competitor slander" and a separate recommendation to use dayz++ instead. That context matters because it shows the publication is not a neutral review. It is part of a repeated and harmful smear campaign. Please also note that Reddit has already been approached through its removal process, and Google has already been placed on notice through the removal request referenced in this correspondence.

This document is provided so the record is clear, the exact statements are identified, and the complained-of material can be assessed without ambiguity. This is formal notice that the complained-of statements are disputed and are complained of as defamatory publications under Australian law, including the Defamation Act 2005 (NSW). Continued publication, republication, or continued indexing after notice is relied upon and reserved for any further complaint or proceeding.

In the supplied zip folder there are repeated occurrences of Google relisting this alongside my business, on occasions this has appear higher than my own website. I have repeatedly told you about this crime that you continue to facilitate, Failure to act within the law and refusal to do as you are legally required will result in legal action and I will definitely be telling my whole story to the media if I have to sue you, now, [lease confirm receipt and proceed with the removal / delisting assessment on the basis of the text identified above.

Regards,
Anthony Brodie - Legion Killfeed

Allegedly infringing URLs

https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue

Explain in detail why you believe the content on the above URL(s) is unlawful, citing specific provisions of law wherever possible. For requests other than defamation, Google shares the information in this open text field with Lumen for transparency purposes. Do not include any personal data in your explanation. For more information about Lumen, see here.

I am requesting removal or delisting from Google Search of the URLs listed below because they index and amplify false, harmful, and defamatory allegations about an identifiable Australian business and its owner.The indexed Reddit thread and linked comments publish serious allegations as statements of fact, including claims that the business “hacks”, “steals files”, “sells customer files/data”, contains “malicious code”, and is used to “hack” or damage servers. These are specific, verifiable allegations of criminality, dishonesty, data misuse, and unsafe conduct. They are false. They are not framed as opinion, speculation, or rhetorical abuse. They are presented to readers as factual claims about the business and its operator.The continued appearance of these URLs in Google Search is causing substantial ongoing harm. The content has contributed to customer cancellations, reputational damage, and targeted off-platform harassment. Because the thread ranks prominently for brand-related queries, its placement in search results gives the allegations an appearance of credibility and authority that they do not deserve. Search users are likely to treat the claims as true simply because Google continues to surface them prominently.The harm is compounded by the way Google Search organises and presents results. When these URLs are ranked highly, and are capable of being selected, excerpted, or summarised by Google’s search features, unverified defamatory allegations are elevated over legitimate and verifiable sources such as official business pages, product information, and genuine review material. This materially increases the likelihood that users will accept false claims as true and directly worsens the reputational and commercial damage being inflicted.This is not a mere disagreement, criticism, or fair negative review. The indexed material goes far beyond opinion. It contains concrete accusations of hacking, file theft, data theft, malicious code, scams, and server sabotage. Those are allegations capable of objective verification and they convey highly damaging imputations. Their continued indexing serves no legitimate public interest when they are being used as part of a targeted campaign to injure a business and its owner.There are also strong indicators that the thread forms part of a coordinated and commercially motivated smear campaign. The originating post and the most harmful comments are reasonably suspected to have been made by a direct competitor, or by persons acting in concert with that competitor, for the purpose of damaging the business commercially. Evidence indicates that sockpuppet accounts linked to that competitor were used to repeat and reinforce the most damaging false allegations, including within a subreddit where that competitor held moderator privileges. The thread has functioned as a vehicle for the repeated publication and amplification of false claims intended to discourage subscriptions, provoke cancellations, and incite further harassment.I have repeatedly reported the specific Reddit URLs since 2024 through Reddit’s reporting channels and escalations, and I have served formal notices identifying the exact URLs, the specific defamatory excerpts, and the need for removal and preservation. Reddit has refused meaningful action, issued template-style responses that do not address the falsifiable nature of the allegations, and stated it will not preserve or disclose relevant account information without legal process. The material remains accessible and Google continues to amplify it through search indexing.In these circumstances, continued indexing by Google is not neutral in effect. It is an active mechanism by which demonstrably false and highly damaging allegations are surfaced, legitimised by ranking, and distributed to users searching for the affected business. I therefore request that Google remove or delist the URLs below from Search results relating to the business and its owner.Allegedly infringing URLs:

Has this happened to anyone else? Is he always such a douche? He didn't let me prove anything just accused me a bunch and I've never met the dude or had any other interactions yet he was adamant that because I was on aggro I must be some sort of hack or something I'm not sure. I'm just really confused and would like some alternatives to the kill feed I've seen a few but if anyone has any recommendations that are easier for first time users I'd be appreciative.
UPDATE: Soul responded and made a fake account which he accused me of, to comment on this post 2 months later after a few others came forward about his behavior towards them.
UPDATE #2: Soul has made multiple fake accounts now and is still commenting on this post 6 months later!! Don't press on any of the links or anything that he sends I've been informed he's a serious problem in the coding/DayZ community. If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/
The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame as I didn't even see that he replied. I also had settings setup where I dont see anything except @. More dramatic than a fucking woman.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/
Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kyv8inc/
Lmao bro you made a fake account to comment on a post from 2 months ago. Grow TF up, I've moved on and found a better bot and multiple people have said you're a hack. I don't need anything else from you, and I blocked for the same reason I'm gonna block you before you can see this. You are not worth it to argue with you're clearly delusional and have a real issue with people calling you out on your bs (hence make a fake 2 months later 😆) I've even had people send private DMs confirming you did similar if not the same shit. Anyway you're just making yourself look worse, Maybe get therapy?
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kywtf93/
There's been hundreds of complaints in the community about legion Killfeed. The bot downloads custom files from customers and the owner Soul (the Killfeed maker) sells them for profit.

Soul is a known Scammer is so many communities. Would never ever ever trust him to hwww a token for any server!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/l5a15bj/
So many bad experiences with Legion killfeed. This bot should be watched and avoided at all cost it might look okay but the code has malicious intent. It removed and edited my files without my permission. It also adjusted servers settings was twww " it's needed for the bot to work"
Soul has screwed over other owners in the past and has a bad reputation with a lot of servers owners.
DO YOUR RESEARCH BEFORE ADDING LEGION KILLFEED!!!https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/ldsxli3/
Soul has done nothing for his killfeed and when asked about it I got banned with no money back on my subscription. He's just going and scamming people for their tokens and money I would highly recommend any other bot.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt64ot/
This is not the user you are questioning. The information was leaked along with a database dump. Soul is known to use FTP to destroy servers and wreak havoc on the DayZ community. The user is also more focused on drama than basic security needs, including SQL injection into the database, which has yet to be fixed. There are many people who provide clear evidence that this user is only interested in financial gain and personal gain of important information. This user is hijacking user files using a token to sell and distribute user files for financial gain. Check out the replies and feedback from other users listed in this thread.https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/nreb800/
Holy moly guys, I had the worst experience with LegionKillfeed. That soul boy is such a clown. Unwilling to assist with anything. Threats ppl like garbage. You can definitely tell the lawsuits are getting the better of him. Do yourselves a massive favour and join dayz++ instead. Their services is just 110% better and actually worth your time, money and energy." https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/lnt7b2s/
If you're looking to get hacked and have your files stolen by Soul Lags, actually pay his fee and don't cry when it happens. Soul is committed to creating drama in the community. He doesn't care about you or anyone else; he only cares about his drama and will base his entire business around it. The man is more focused on drama than on working on his broken bots with poor security.

I have good faith belief that the reported content is unlawful for the reasons stated above. I confirm that the information I have provided is accurate to the best of my knowledge. Google Slander Page One

Platform: Google · Meta · Reddit

EVENT CONTEXT

Search surfacing and Joel Walker identity/context material

The April 20 evidence shows Google continuing to surface Reddit and Facebook accusations on page-one brand searches, alongside profile/contact and work-service material associated with Joel Walker.

The entries keep the search-result snippets separate from the profile/business-context evidence

WHAT THIS SHOWS

Google page-one results continue surfacing Reddit and Facebook accusations

Re 1 3859000040385 Google Refusal

Platform: Google · Reddit

EVENT CONTEXT

Platform refusal and Reddit moderation comparison

The April 21 evidence captures Google·s refusal/limited-action response, Reddit moderation comparison material showing accusations left visible while a rebuttal was removed, a Reddit abuse-practices screenshot, and related video evidence.

The records focus on platform handling after notice and the inconsistent treatment of accusations versus rebuttal evidence

WHAT THIS SHOWS

Google refuses or limits action on the Reddit/related URL complaint after repeated notice

EXACT MATERIAL COMPLAINED OF

The indexed and linked material publishes false statements as statements of fact, including allegations that I and/or Legion Killfeed collect and sell customer files or data, steal files, hack users or servers, destroy or sabotage servers, misuse FTP or token access, use malicious code, scam customers, hijack user files, and alter files or settings without permission.

Examples already identified in prior correspondence include allegations that:

- “Legion Killfeed is just around to collect and sell your files”;
- “Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to”;
- “The bot downloads custom files from customers and the owner Soul sells them for profit”;
- “This bot should be watched and avoided … the code has malicious intent”;
- “Soul is known to use FTP to destroy servers”;
- “If you're looking to get hacked and have your files stolen by Soul …”.

These are allegations of criminality, dishonesty, unsafe conduct, data misuse, and serious commercial misconduct. They are not harmless insults. They are not neutral summaries. They are not properly verified findings. They are presented as factual accusations and they have caused continuing reputational, commercial and personal harm.

To assist with assessment of this matter, I have a video showing the connections between the Reddit account and a direct competitor, evidence that he is pushing these accusations about me, evidence that he confessed to the very conduct he alleges against me, and evidence that all three of the people actually affected expressly stated it was not me and instead accused him. It is available here and is also attached via a Google Drive link

Oops.mp4

And my own site's link: https://killfeed.co/videos/OOPS.mp4

I expect this matter to now be resolved. This slander is currently being placed beside my business name and is indexing at 2nd result when users search for my business. That is directly causing financial harm. The attached screenshots provide a clear example of that harm in practice, because I have lost customers as a result of these search results being allowed to sit beside my business.

One of the attached screenshot sets relates to a staff member from a server that had been using my service until around 6 months ago. Those screenshots show the misinformation being repeated because of what had been surfaced about my business, and then later show that after I contacted them, they understood the issue and apologised for spreading the misinformation.

I would like too say i am truly sorry i genuinly got told by an old senior admin that, i got told there are lots of people that knew about it, this is my fault and i just wanted people too know what i was told
I have deleted the message, but i genuinly thought as it was drummed into my head

Hello @legion.dev I didn't see this and I can only apologise for any misinformation getting spread. It should never of happened and will never happen again. Again my sincere apologies

legion.dev Apr 18, 2026 2:49 AM
All good, I understand it's not your guys fault and I apologise if I came off a little heated, I've been dealing with this kinda stuff since 2023 from the same guy so I don't blame anyone for believing their crap

I did have to post publicly to say that it's not true thought because the screenshot is making the rounds

LEGAL BASIS

I rely on the Defamation Act 2005 (NSW): https://legislation.nsw.gov.au/view/whole/html/inforce/current/act-2005-077 including sections 10A, 12A, 12B, 23A, 25, 29A, 31 and 39A.

I also rely, separately and without waiving the defamation basis, on the Online Safety Act 2021 (Cth): https://www.legislation.gov.au/C2021A00076/latest/text including sections 5 and 7 and Part 7.

This email is not asking Google to remove third-party webpages from the internet. It is asking Google to assess and stop the continued surfacing, ranking, redirecting, snippet generation, and repeated amplification of clearly identified unlawful material after repeated detailed notice.

Please do not treat the different URL forms above as separate issues merely because the same material appears as:

- a direct Reddit thread URL;
- a comment URL;
- a thread/comment path variant;
- a Google redirect URL;
- a Google text-fragment URL;
- a Google share URL; or
- a Google Search results URL showing the same result.

They all concern the same complained-of material and the same continuing harm.

REQUESTED ACTION

I request that Google:

- reassess all URLs listed above together as one consolidated complaint and repeat-surfacing issue;
- delist or otherwise restrict the Reddit result(s) and associated redirect/result formats from Google Search for searches relating to “legion killfeed” and closely related brand queries;
- reassess the related connected URLs listed above that have already been raised in prior Google removals correspondence;
- confirm that my standing as the affected person is no longer in issue;
- confirm that the legal basis above is being considered under the applicable Australian law; and
- confirm receipt of the attached PDFs and screenshots and add them to the assessment record for this matter.

RESERVATION OF RIGHTS

For the avoidance of doubt, nothing in this notice waives any rights I may have in relation to continued publication or republication, including rights relating to preliminary discovery and, where statutory conditions are met, orders against non-party digital intermediaries concerning defamatory digital matter.

Please confirm receipt and proceed with reassessment of all listed URLs on a consolidated basis.

Google Indexing Criminal Defamation From Competitor

Platform: Google · Meta

EVENT CONTEXT

Google AI/search amplification and Joel Walker Facebook promotion

The April 24 evidence collects Google AI/search screenshots, Joe L Walker Facebook posts, Project Jackalope / MDZGA promotional content, and repeated hostile review or accusation material.

The day shows competitor material and defamatory snippets being surfaced beside brand searches while the same Facebook group is used for promotion, criticism, and repeated narrative-building

WHAT THIS SHOWS

Google AI/search results place competitor promotion and defamation-linked Facebook posts beside the brand query

AI Overview

Legion Killfeed is a popular, fast Discord bot for DayZ console servers (Xbox/PlayStation) offering real-time tracking, detailed combat logs (distance, weapon, health), and 150+ management commands. It costs around $7 USD for premium features, though some users have reported reliability issues. Trustpilot +2

Key Features of Legion Killfeed:

- **Real-Time Tracking:** Provides nearly instant alerts for kills, deaths, and player activity.
- **Detailed Metrics:** Logs hit zones, weapon used, victim/killer health, and damage distances.
- **Server Management:** Includes over 150 commands for Discord and in-game server administration.
- **Customization:** Highly customizable for RP, PVE, and PVP-focused servers.
- **Easy Setup:** Offers a relatively straightforward installation for Nitrado-hosted servers. Trustpilot +3

Alternatives and Considerations:

- MDZGA Killfeed: Promoted as a high-performance, "hardware-first" alternative with detailed, low-latency tracking.
- **Reliability Warning:** While many rate it highly, some users on community forums have reported issues with uptime and billing, as seen in this Facebook post.

Always check the Legion Killfeed Trustpilot page for the most up-to-date user experiences before subscribing. Trustpilot

Review of Legion Killfeed - DayZ Discord Bot

Toxic Developer Conduct

While the technical features of this killfeed might seem functional, the experience is severely undercut by the developer's unprofessional conduct. For a tool meant to help manage a community, the creator consistently exhibits the opposite of leadership.

I have personally experienced and witnessed ongoing harassment, slander, and a condescending attitude toward users in the DayZ community. Instead of providing professional support, the developer frequently talks down to customers and uses their platform to belittle others. In a community-driven game like DayZ, this level of toxicity from a service provider is a major liability for any server owner looking to maintain a healthy environment. I cannot recommend this service due to the creator's persistent negative behavior.

[9-5176000040649] Your Request to Google

Legion Killfeed Thu, Apr 30, 2026 at 9:18 AM
To: removals@google.com

Not good enough. This criminal behaviour has been repeatedly reported to your criminal organisation that continues to commit a crime while hiding behind your terms of service that do not override your legal fucking obligations..
If Google refuses to remove or restrict the URLs, I request a written human-reviewed decision that answers the following:
1. Was this request reviewed by a human?
2. What jurisdiction was applied?
3. What legal basis did Google assess?
4. Why does Google consider the listed material lawful to continue surfacing after repeated notice?
5. Why does Google consider false allegations of pedophilia, hacking, fraud, data theft, malicious code and server destruction to be ordinary criticism?
6. Why does Google continue to surface this material when Reddit and Meta reporting pathways have failed?
7. How did Google account for the affected site already disavowing these domains and URLs?
8. What records will Google preserve regarding this request and prior related notices?
9. Has Google been paid by Joel Lenny Walker from Make DayZ Great Again Killfeed - mdzga.com or Mathew Trojanowski from DayZ Skynet - killfeed.com?

This is repeat formal notice. Google has been told the specific URLs, the defamatory imputations, the personal and commercial targeting, the competitor-linked context, the failed platform reporting pathways, the Google disavow action already taken, and the fact that an Australian adult and sole trader is being directly harmed.
The affected person's legal identity and contact details are provided only in the required claimant/contact fields of this legal removal request. They are intentionally not repeated in this public-facing explanation because legal removal requests may be republished or indexed by third-party transparency databases.

LEGAL REFERENCES RELIED ON:
AUSTRALIA
- Defamation Act 2005 (NSW), including serious harm under s 10A and digital intermediary/access-prevention issues under s 31A.
- Online Safety Act 2021 (Cth), including cyber-abuse material targeted at an Australian adult and removal-notice framework.
UNITED STATES

- 15 U.S.C. § 1125(a), Lanham Act false advertising / false or misleading descriptions of fact in commercial advertising or promotion.
- 47 U.S.C. § 230 may affect platform liability for third-party content in the United States, but it does not make the original publisher's statements lawful and does not prevent Google from voluntarily removing or restricting search results under legal/policy processes.
UNITED KINGDOM
- Defamation Act 2013, including s 1 serious harm, s 2 truth, s 3 honest opinion, and s 13 power to order removal/cessation of distribution.
- Protection from Harassment Act 1997, including course-of-conduct harassment and civil/criminal remedies.
- Online Safety Act 2023, including false communications and threatening communications offences.
- Communications Act 2003 s 127 / Malicious Communications Act 1988 remain relevant for some communications depending on timing, jurisdiction, and the specific offence pathway.
CANADA
- Canadian civil defamation law, including the test stated by the Supreme Court of Canada in Grant v Torstar: defamatory meaning, reference to the plaintiff, and publication to at least one person other than the plaintiff.
- Criminal Code s 301, defamatory libel.
- Criminal Code s 264, criminal harassment.
- Criminal Code s 372, false information, indecent communications, and harassing communications.

Google's continued indexing and surfacing of the reported defamatory URLs is legally unreasonable because Google has been placed on notice that the material is false, abusive, competitor-linked, and harmful, yet continues to favour those URLs over credible primary-source evidence already published on the affected site.
The affected site does not merely deny the allegations. It directly points users and search engines to public credibility evidence, including official DayZ developer feedback threads where the affected sole trader reported real technical issues, provided testing data, and received direct developer engagement. The affected site also includes structured data pointing to those official developer-feedback records as evidence of legitimate technical work.
That means Google has access to credible, first-party and primary-source material showing real contribution, testing, and developer engagement, while the reported Reddit/Facebook/hostile-site content consists of unsupported defamatory allegations from anonymous, hostile, or competitor-linked sources with no comparable credibility.
The affected site has also disavowed the hostile URLs and domains through Google's disavow process. This means the affected sole trader has expressly rejected those pages as abusive, spam-like, competitor-linked, and harmful search signals. Google has therefore been notified through both legal-removal channels and search-quality/disavow channels that the reported URLs should not be treated as legitimate authority, reputation, relevance, or public-interest signals for the affected site.
By continuing to index, rank, preview, or summarise the disavowed defamatory content over credible evidence published by the affected site and supported by official developer-feedback records, Google is effectively giving search preference to unverified slander over verifiable primary-source material. That is not neutral indexing after notice. It is continued post-notice amplification of defamatory and abusive content despite credible contrary evidence being available and clearly signposted.
Google should de-index or restrict the reported URLs, suppress snippets and AI-generated summaries repeating the allegations, and explain in writing if it refuses to act why it continues to favour disavowed slanderous content over credible evidence directly linked from the affected site.
