I have given plenty of fucking details, your stupid ass refuses to read anything and you keep speaking to me like I'm your bitch so here's how it goes moving forward.

- You treat me with some fucking respect.
- You read the fucking # 📢 · premium_announcements
- You read the fucking # 💎 · premium-chat for shit related to whatever you're gonna bitch about
- You don't come in here and be a brain dead fucking idiot
- or I cancel your subscription and fuck you off.

But so far, my count is:

- **Defamation Act 2013** – 7 separate libel statements (“robs people”, “trash bot”, etc.).
- **Malicious Communications Act 1988 §1** – 7 counts for sending grossly offensive falsehoods intended to cause harm.
- **Communications Act 2003 §127** – 7 counts for “grossly offensive” online messages.
- **Protection from Harassment Act 1997** – 1 ongoing course of conduct (the whole campaign).
- **Fraud Act 2006 §2** – 2 counts for urging baseless PayPal charge-backs.
- **Serious Crime Act 2007 §44-46** – 3 counts for encouraging others to commit those frauds / shut the business down.

That's **27 actionable hits** across six UK statutes—and every fresh post just adds another bullet to the list.

Madelyn Mills what you did is called stealing! it's a shame that now everyone wants to solve things by arguing through social networks and not like in the old days, face to face, that legion administrator and all the others would live hidden like rats to avoid facing the consequences of disrespecting the people, you can call the president if you want to try to help you, but I'm not playing, and if you want to go to the next level then I do too, you're not going to scare me with your comments, YOUR RIGHTS END WHERE MINE BEGIN

Daniel Santos You said I stole (not me, but Soul didn't either), talked about people crying on facebook (you did that not me), then reminisced about face to face sorting it out and now you're gonna deny that was an underhanded cowardly way of saying you want to hit me?

Your rights ended when you made the decision to ignore the repeated instructions and violate the ToS that you agreed to when you subscribed. You can't go to an airport, say there's a bomb in your bag, then complain when they throw you out.

Daniel Santos bro legion's a fuckhead spaz off his meds who needs to take a nap, he removed his bot from my discord server cause my old admins lied to him and told him i called him a pedo in a xbox party chat, i woke up next day and seen he removed his bot that i paid for, so i started rocking with the narrative. other peoples ive recommended his bot too have also left cause hes so intolerable. ...

Madelyn Mills these images say otherwise. Never would a seller speak to a consumer like this. Regardless of any situation the seller should act professionally as peoples fund are at stake. I've been going 4 years on multiple bots and have never seen a seller speak to there audience this appallingly!

Madelyn Mills it's not, I have my bots wouldn't touch this with a barge pole. However I do sympathise with others as there are some proper crooks out there. People running their business like this, kicking people out after paying or asking them questions should be shut down.

Danny Hayes So you're personally targeting someone, based on out of context screenshots, because you feel like Soul is being a "crook"? Are you sure it's not because you're an apparent competitor based on your "I have my bots" comment? I watched him spend 4 hours trying to help someone do the most basic thing today. But yes, a crook offers their killfeed for \$7 a month, for up to 10 servers per Nitrado account (basically 2.3 ¢ per server per day)

● User Impact

For a \$20 USD subscription, users expect:

- **Access to GPT-4**, not a weaker substitute
- **File parsing** (especially when advertised for developers)
- **No throttling or silent sandboxing**
- **Clear model transparency**

Instead, users get:

- Vague model behavior
- Shifting performance depending on load
- A degraded product marketed as premium
- **The need to fight or trick the assistant** to get consistent, correct behavior

OpenAI has **no interface or disclaimer** stating:

- When a downgraded model is used
- When features are turned off
- That GPT-4-turbo is not the same model

■ Legal Violations (Australia)

This violates **Australian Consumer Law** (Schedule 2):

- **Section 18** – Misleading or deceptive conduct
- **Section 29(1)(g)** – False or misleading representations regarding performance characteristics
- **Section 54** – Guarantee of acceptable quality
- **Section 55** – Guarantee of fitness for purpose

■ Resolution Requested

1. Formal investigation into OpenAI's product tier disclosures
2. Mandated clarity: model differences, tool restrictions, actual tier capabilities
3. Refunds for Australian customers who did **not receive what was advertised**
4. Clear disclosure before purchase if GPT-4 access is **not** the actual GPT-4 model

✿ Supporting Evidence Available

- Logs showing GPT-4 refusing basic formatting but GPT-3.5 succeeding
- Screenshots of assistant falsely denying ability to complete tasks
- Comparisons of advertised GPT-4 features with real-world (lack of) results
- Marketing material vs. help articles showing contradictions

Let me know if you want:

- A downloadable **PDF version**
- A summarized **copy/paste web form version**
- A follow-up **ACCC email draft**
- Or if you want to include specific **chat logs as direct exhibits**

Ready when you are.

⚠️ ACCC Complaint Draft Against OpenAI (GPT-4 / ChatGPT Plus Subscription)

Company:

OpenAI, L.L.C.
<https://openai.com>

Core Issues:

1. False advertising of "GPT-4" access under ChatGPT Plus
2. Undisclosed bait-and-switch model substitution with "GPT-4-turbo"
3. Deliberate disabling of file processing functionality on paid tiers
4. Artificial throttling, refusal to function, and intentionally broken responses
5. No model transparency on selection, fallback behavior, or sandbox limitations

🔍 OpenAI Product Misrepresentation in Detail

💡 Claimed Offer:

ChatGPT Plus – \$20 USD/month

- Marketed as access to "GPT-4"
- Described broadly as the best and most capable AI model

🔴 Actual Reality:

Users are given access to a model called "gpt-4-turbo", not GPT-4.

From OpenAI's own buried [help article](#):

"ChatGPT Plus users get access to GPT-4-turbo, which may differ from GPT-4 in architecture and behavior."

This "may differ" line is the only disclosure, and it's:

- Nowhere on the purchase page
- Not disclosed prior to payment
- Not clarified in-app or when asking the assistant

⚠️ Intentional Obfuscation of Model Differences

📊 Known Models and Capabilities

Model	Access Tier	Known Capabilities	File Handling	Response Length	Accuracy
GPT-3.5	Free/Paid	Limited reasoning, poor code, short memory	0 files	Short	Frequently hallucinates
GPT-4	NOT publicly accessible	High-quality reasoning, long memory, accurate code	Varies	Long	Consistently high
GPT-4-turbo	ChatGPT Plus (\$20/mo)	Claims to be "like GPT-4" but performs worse	Artificially limited	Inconsistent	Often degraded
GPT-4-1106-preview	Devs via API	Multi-tool access, functions enabled	Works on files	Very high	Excellent
gpt-4o (omni)	Limited release	File upload, vision, voice, fast	Not available to all Plus users	High	Good but inconsistent

⚠️ gpt-4-turbo Limitations (Unadvertised):

Despite being under the "GPT-4" name:

- Refuses to process large text/code blocks that GPT-3.5 accepts
- Breaks simple formatting tasks (e.g. preserving indents, JSON structure)
- Silently truncates or alters code, responses, and regex
- Cannot reliably handle uploaded files even with API hooks available in other models
- Refuses tasks with no explanation, gaslighting the user with fake limitations

Examples from past interactions:

- Attempts to request a full regex or structured code from uploaded files **were denied** by GPT-4-turbo despite clearly being possible
- Requests to continue a long message mid-output **were refused**, falsely claiming memory limits
- Models began hallucinating or skipping instructions already shown in the same message block

Left Mr Tech N9ne's Modded Servers and sent the owner (@Mr Tech N9ne):

Legion Killfeed has left your server.

Dear MrTechN9ne, Effective immediately, your access to Legion Killfeed services has been permanently revoked due to a clear and serious violation of our Terms of Service. During a voice chat over Xbox on the evening of July 13, 2025, you made a false, defamatory, and entirely unprovoked accusation directed at Soul, our lead developer. Despite Soul not being present in the conversation, you referred to them as a "pedophile" while engaged in an unrelated dispute with your former team members. This level of personal defamation not only violates the mutual respect outlined in our community expectations but also crosses into gross misconduct and character defamation. We take these matters extremely seriously. Legion Killfeed is built on trust, integrity, and unprofessional-professionalism. Weaponizing slander in the middle of petty interpersonal arguments—especially when targeting individuals uninvolved in the matter—is not tolerated under any circumstance. Your account has been removed from our system, and any active feeds or configurations associated with your service ID have been deactivated. No further support or access will be provided. We wish you the best in your future endeavors, but you will not be welcome back into the Legion Killfeed ecosystem.

Madelyn Mills these images say otherwise. Never would a seller speak to a consumer like this. Regardless of any situation the seller should act professionally as peoples fund are at stake. I've been going 4 years on multiple bots and have never seen a seller speak to there audience this appallingly!

Madelyn Mills also read the comments. I don't think many people agree with how nice they are as you commented 🤔🤔

Danny Hayes Why are you so hurt by someone saying something you don't like? Why is it your personal passion to hate on someone so much when the way they choose to run their business has absolutely no effect on you if you aren't choosing to use their services?

1d Like Reply Share

Danny Hayes

Madelyn Mills it's not, I have my bots wouldn't touch this with a barge pole. However I do sympathise with others as there are some proper crooks out there. People running their business like this, kicking people out after paying or asking them questions should be shut down.

Madelyn Mills

Danny Hayes So you're personally targeting someone, based on out of context screenshots, because you feel like Soul is being a "crook"? Are you sure it's not because you're an apparent competitor based on your "I have my bots" comment? I watched him spend 4 hours trying to help someone do the most basic thing today. But yes, a crook offers their killfeed for \$7 a month, for up to 10 servers per Nitrado account (basically 2.3 ¢ per server per day)

Legion is one of the best

If you come at him sideways he'll come at you upside down.

He makes everything simple for everyone so there's no need for stupid questions. If you just simply READ you'll find what you're looking for

KaLee Whitmore he started, and i got the entire chat , and before that ,I saw the way he treated other people 🙄, If you have a business, and people pay you for a service, you shouldn't talk to them like that, but the only reason I can see is that he's talking behind a computer, I'm sure he doesn't do that in person.

If anyone needs a bot for their server, don't use Legion. Their tech support is horrible, and when they get back to you, they'll treat you like shit.

Man you need to drop the attitude and fucking be patient or fuck off.

dani23COVID 🌐 LGION 🏠 11:42

I have been a patient, the one with the attitude from the beginning is you, I have seen how you treat everyone and I really don't give a shit, I just need to solve the problem or get a good explanation, that's how it works when someone pays

I have given plenty of fucking details, yet your stupid ass refuses to read anything and keep speaking to me like I'm your bitch here's how it goes moving forward.

- You treat me with some fucking respect
- You read the fucking # 🌐 • premium_announcements
- You read the fucking # 🌐 • premium-chat for shit related to whatever you're going to bitch about
- You don't come in here and be a brain fucking idiot or I cancel your subscription and fuck you off.

Every single issue in this goddamn ticket has been directly addressed, if you actually read the context of the fucking # 🌐 • premium-chat you'd see that I have done a major backend update, every single premium member was pinged and told about this this was in # 🌐 • known-issues for a month beforehand

this was posted in # 🌐 • premium_announcements

there were a lot of bugs when I uploaded the update have fixed most of them

You're a dumb fuck who refuses to fucking read. Not my fucking problem.

I think I've caught most of the errors now but if anyone gets any more, lemme know

I added /base radar whitelist so Mod or higher can add/remove from a base radar's whitelist without being in the channel (just needs zone ID)

Check your role permissions

- each one of these enables a different command level, without that toggled, the applicable commands shouldn't be visible (unless admin perms in discord)
- `/help` has a lot of the commands detailed
- if a command fails, open ticket, tell us what command, what you used with it, screenshots & details are important

can't fix it if we don't know about it, try to be as articulate as possible

Will you drop tech N9ne i tried to record party last night. He called all of us including you a pedo
Read each discord his and mine and see what happened after party chat

Soul ∞  LGION 10:24 PM
got any proof?

10:24 PM

Ill get it in writing, I only have the word of a couple people in party

Very good.
2 dogs put out.

pandemicchunk71 10:26 AM

Is killfeed down? I killed a guy over an
hour ago

Mr Tech N9ne 10:28 AM

yeah its down for the day im getting
a new one
i found out the owner of legion is a
pedophile
so its gotta go
