This is a follow-up to your previous request **#61451054** "Non-DSA Appeal Request: 1428298066137583737"
Hello Trust and Safety,

I am following up on Non-DSA Appeal 1428298066137583737. I am the reporting party in a competitor-driven harassment campaign that began on Discord and spread to other platforms. Prior submissions were closed without a substantive human review, despite the attached chronology and exhibits.

What requires a human reviewer to check in Discord's logs:
Full DM context between me and the initiating user, including deleted messages.
Block history and re-contact showing the same actor contacting me again from a new account to evade blocks.
Linkages between accounts coordinating the harassment, including involvement from competitor-aligned users.
Server and channel context where the harassment originated and was organized.

Why the current action is wrong:
I was the person targeted and the original reporter. Enforcement was applied to my account after I replied once to a harasser who re-contacted me via block evasion. The strike currently shows as active until 2027, which mislabels the reporting victim and rewards the aggressors.
The record includes suicide encouragements and other extreme abuse directed at me. Those messages were not actioned against the originators, yet my single reply was.

Requested actions:
Reverse the harassment-bullying strike and remove the account-standing flag from my account.
Apply enforcement to the initiating account that evaded a prior block, and to any linked accounts coordinating the abuse.
Note my account for ongoing targeted harassment to prevent reporter-retaliation in future reports.
Confirm in writing that a human reviewed the full DM context, block logs, and linkages before closing this appeal.

Legal and policy signals you should be aware of:
Australia: Criminal Code Act 1995 s 474.17 and Online Safety Act 2021 on adult cyber-abuse and use of carriage services to menace or harass.
BOSE determination requires effective complaint handling and reasonable steps to minimize seriously harmful material.
EU DSA Articles 14, 16, and 20 for EU users, and UK Online Safety Act 2023 for UK users. These frameworks require human review, proper notice-and-action, and measures against repeat offenders.

This appeal asks for one simple thing: a proper human review of the DM and block-evasion context and correction of the enforcement target. Please confirm that the strike has been removed and that enforcement has been applied to the initiating and linked accounts.

If anything is unviewable here, it is publically available with fuller context at <https://they-wish-i.died.space/> (a personal archive site) that was made public due to <https://aggropvp.com> (where they explicitly threaten my fiance) and <https://skynetvslegion.com> which is a biased slander website used to defame my business by a direct competitor and core orchestrator of this harassment.

Regards,
Soul
