What happened:

A group admin posted and later edited the post to name me and my business. It accuses me of being a pedophile.

The thread contains violent and abusive comments. The group is repeatedly used to harass people.

What I tried on the service:

I reported the post many times and used Meta Pro Team chat ref 1332648995224789. The chat shows repeated delays and a demand

to use forms that had already failed. I asked for a litigation hold and preservation of logs.

Impact:

Serious harm to my reputation and business, fear for safety due to incitement in comments, and distress to my family.

What I want:

Issue a removal notice to Meta under the Online Safety Act 2021 for adult cyber abuse and require platform enforcement.

Attachments:

All exhibits and the chat file are attached.

This he either, claims to be in an impossible amount of Discord Servers so people believe him to be some kind of 'King' or 'President' or he is mocking people for being practical and realistic about the member count.

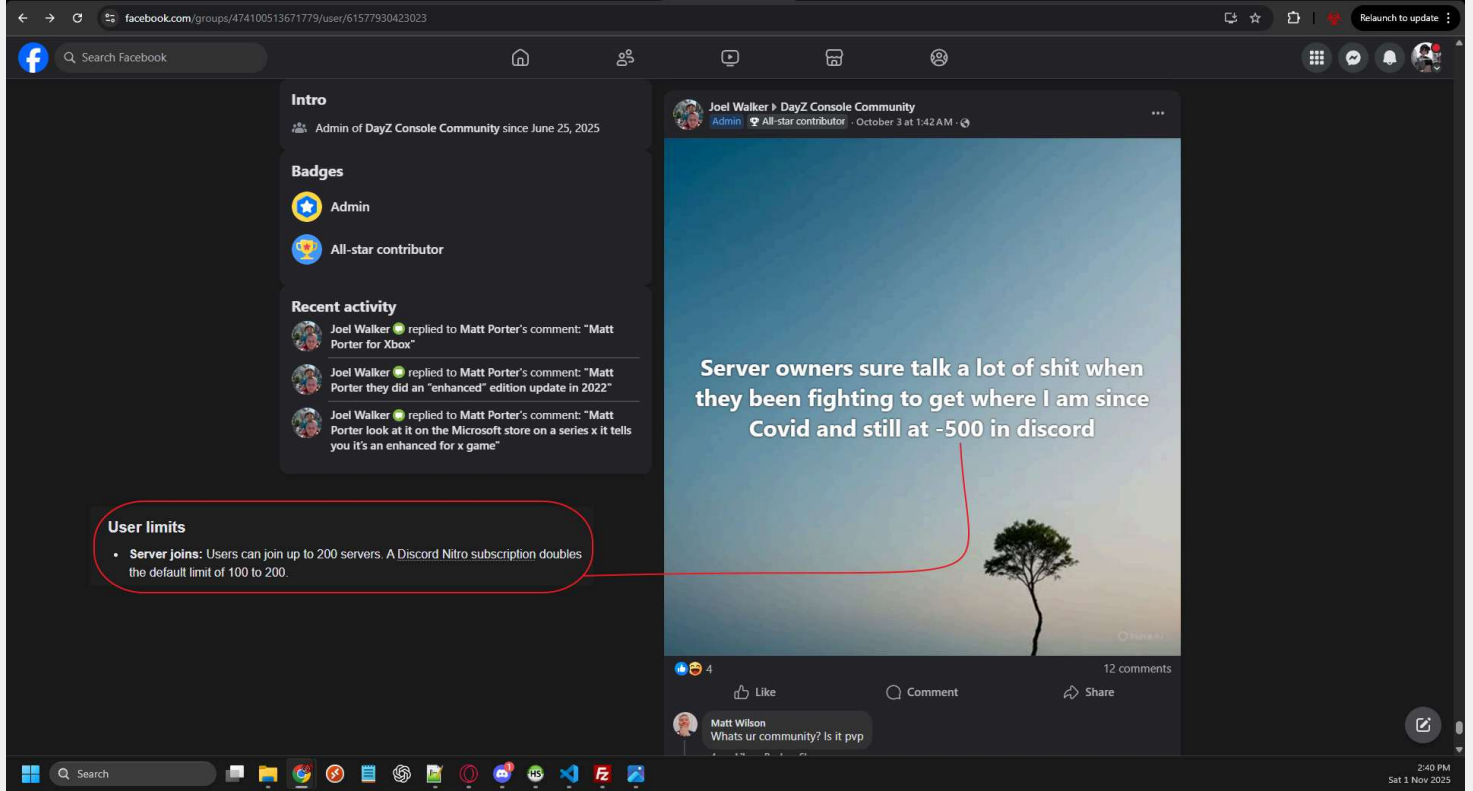

Exhibit: 2025-11-01-joel-walker-manipulated-facebook-posts-31.png

- if he's claiming he's in 500 discord it shows **impossible server count**
- if he is bragging about having more than 500 members in discord, he is foolishly equating inactivity as popularity.
 - if a server only has 50 slots, 500 people is 10x the amount of people they actually need to keep satisfied.
 - It is not "talking shit" to discuss tyranny publicly.

Joel Walker's Allegations

Why accused Soul/Legion Killfeed of pedophilia

Soul commented on a post about Joel where Joel smugly indicated he was some kind of authority, to prevent using a biased opinion of Joel as he is personally known to Soul who believes Joel to be one of a rather unusual (and disgusting) character, so Soul used Google's AI Search which painted Joel in the light the community truly see's him in, this hurt Joel's feelings so his response was to retaliate by implying Soul was a pedophile.

Project Jackelope DayZ

Searching for community opinions on "Project Jackelope" outside of its official Facebook group primarily yields very negative feedback and complaints from the video game *DayZ* community. The search results indicate a history of poor server performance and hostile interactions with the administration and owner, leading to players being unfairly banned. @

Key criticisms of Project Jackelope based on community feedback include:

- Toxic administration:** Several players allege that the owner, sometimes referred to as "Jack" or "Jackelope," and his administration team are immature, toxic, and unhelpful. They reportedly do not address player concerns and insult members of the community.
- Abuse of power and unfair bans:** Reports on [Reddit](#) describe administrators unfairly banning players for minor or unsubstantiated reasons. One user claims their faction was banned for asking a question and was mocked by an admin. Another Reddit user describes being banned after a new friend they met on the server was accused of cheating, and an admin was not receptive to a defense.
- Favoritism and raiding:** Multiple accounts suggest that the admins collude with or favor high-tier donators. One player alleges the server owner streamed himself raiding their base early into their time on the server, resulting in repeated harassment.
- Accepting donations without addressing concerns:** The administration is criticized for being more focused on accepting donations than on fixing bugs or addressing community feedback. Some players report paying for items to be spawned near their bases.
- Poor server performance:** A Facebook post from 2020 complains that the Project Jackelope server suffered from "wonky" loot and significant lag, making it unplayable.
- Hostile interactions with the owner:** A commenter on a December 2024 Facebook post suggested searching for the server's owner, described as "toxic," to see how the owner acts. @

The opinions found stand in stark contrast to the positive posts found within Project Jackelope's own controlled Facebook groups, which often praise the servers and owner. @

Project Jackelope DayZ

Allegations of spamming, promotion of propaganda, and toxic behavior have been made against Project Jackelope and its owner, Joel Walker, by various players within the *DayZ* community. These accusations often surface in forums and community hubs, including Reddit and Facebook. @

Claims against Project Jackelope

- Controversial owner and administration:** Community discussions often focus on the server owner and administrators, with some players describing them as unprofessional and rude. These criticisms suggest that staff behavior can create a negative and toxic environment.
- Abuse of power and favoritism:** Multiple players have claimed they were unfairly banned for minor infractions, especially if they came into conflict with paying "VIP" members or administrators in-game. Some community members perceive favoritism towards donators, leading to a corrupt and unbalanced playing field.
- Questionable donation practices:** Concerns have been raised about the project's donation system, which includes expensive packages. Some players feel this creates a pay-to-win environment, with donators receiving special privileges.
- Excessive promotion and spamming:** The "Make DayZ Great Again" movement associated with Project Jackelope has been criticized for using spamming and propaganda tactics to promote its servers. Some players and admins of other DayZ groups have reported banning Project Jackelope members for aggressive promotion in their communities. @

Project Jackalope DayZ

User reviews and community discussions indicate that Project Jackalope and its owner, "JackJackalope," have faced serious accusations of admin abuse, favoritism, and creating a toxic environment. Complaints stretch back several years, suggesting the issues are not isolated incidents but a pattern of alleged misconduct within the community.

Accusations and user complaints

Multiple users have posted warnings about Project Jackalope on Reddit, Facebook, and other gaming forums, describing incidents of alleged abuse:

- Arbitrary bans:** Several players claim they were banned for unfair or arbitrary reasons. In a 2025 Reddit post, one user alleged that their friend was banned for cheating based on flimsy "evidence" that was never revealed. When the user tried to get more information, they were also banned from the Discord server. A similar incident was reported in 2020 on the r/DayZServers subreddit.
- Admin favoritism and abuse of power:** The community owner and administrators have been accused of abusing their power, often to the benefit of "VIP" donors. In a 2020 post, a player claimed the server owner streamed himself raiding their base, which led to their group being raided multiple times. The group was later banned after questioning an announced change to base damage rules.
- Toxic and unprofessional communication:** Users consistently report that admins and the owner communicate rudely and dismissively. In a 2020 complaint, a player was asked "are you crying?" after they suggested adding a rules channel to the Discord. They were then banned for "spamming" after responding.
- Monetization concerns:** Some players have raised concerns about the server's monetization practices, suggesting that donations buy influence rather than simply supporting the server. One user mentioned a "\$250 VIP package" and noted that a pattern of "sketchy events" seemed to revolve around these high-paying players.

Conclusion

Based on the available community feedback, Project Jackalope has a divisive reputation. While it provides a popular platform for custom DayZ servers on both PC and console, a significant number of players report negative experiences involving alleged admin abuse, favoritism towards donors, and a toxic community environment.

4 Nov, 09:25 pm

I need this escalated now as harm/abuse and defamation. The specific post is here: <https://www.facebook.com/groups/makedayzgreatagain/posts/1468775737537580/> It falsely states I'm a pedophile and names my business, causing ongoing abuse. This violates your Bullying & Harassment, Violence & Incitement, and Hate policies. I'm in Australia and this is also Adult Cyber Abuse under the Online Safety Act 2021 and a Concerns Notice has been served under Defamation Act 2005 (NSW) s12A. Please: Remove or restrict the post immediately pending review, Escalate to your specialist safety/legal team, and Provide a case ID and SLA for outcome. My evidence bundle is here for your reference: <https://they-wish-i.died.space/joel-walker-pedophile-accusation> I've already used the in-product reporting and the generic help page. This matter requires live escalation because of ongoing serious harm and a valid legal notice served on the poster. Please keep this chat open and escalate to the appropriate Safety/Legal review queue now. I need: • Confirmation of escalation, • The internal queue you've sent it to, and • The case ID. If you can't do this, please bring in a supervisor who can. Respectfully, a referral to a generic page does not satisfy your duty to act on clear policy violations causing ongoing harm. I am requesting: • Immediate interim removal of the URL pending review; • Manager/senior agent to confirm escalation; • A written acknowledgement in this chat with case ID. Please note I'm documenting this for my eSafety and court filings. If you decline to act, record this as a refusal and give me the reference number.

Khongsai – Meta Staff

4 Nov, 09:27 pm

As mentioned in the above conversation, there is no other possible solution from our end. Please help me out in filling up the form. Once you submit the form, it will be reviewed by our dedicated team to resolve your concern.

Anthony Brodie

4 Nov, 09:27 pm

If this isn't actioned today, I'll lodge an Adult Cyber Abuse complaint with eSafety and seek urgent injunctive relief. Please confirm removal, preservation, and case ownership.

Khongsai – Meta Staff

4 Nov, 09:33 pm

Anthony, if you prefer not to formally report the issue, you can close your case; as a report is the only way we can offer a solution

Anthony Brodie

4 Nov, 09:33 pm

I've used the in-product report and your generic form already. This case requires live escalation due to ongoing harm and a valid legal notice. URL: <https://www.facebook.com/groups/makedayzgreatagain/posts/1468775737537580/> Evidence: <https://they-wish-i-died.space/joel-walker-pedophile-accusation> Jurisdiction: Australia — Adult Cyber Abuse (Online Safety Act 2021) and Concerns Notice under Defamation Act 2005 (NSW) s12A. Please confirm (1) interim restriction of the post, (2) preservation hold on the post/edit history/comments/reactions/admin actions, and (3) escalation to Safety/Legal with a case ID and SLA. If you're unable to action this, escalate me to a supervisor who can. Please record any refusal and provide the reference number. I have already spent 12 hours in Meta chat being lied to and redirected; confirm the above actions now or get a supervisor.

Khongsai – Meta Staff

4 Nov, 09:33 pm

We can only resolve your issue by logging a formal problem report. If you prefer not to proceed with reporting it, we will have to close your case.

Anthony Brodie

4 Nov, 09:33 pm

I will not accept a false closure

Anthony Brodie

4 Nov, 09:33 pm

if you close it, you will be fucked when this gets to court.

Anthony Brodie

4 Nov, 09:35 pm

You are abundantly aware of the laws. Your policy is not above the law. Allowing defamation because someone didn't follow your stupid policy that doesn't work (as shown by the multitude of report screenshots I supplied)

Jackalope DayZ'\nAllegations of spamming, promotion of propaganda, and toxic behavior have
been made against Project Jackalope and its owner, Joel Walker, by various players within the
DayZ community. These accusations often surface in forums and community hubs, including
Reddit and Facebook.\nClaims against Project Jackalope\nControversial owner and
administration: Community discussions often focus on the server owner and administrators,
with some players describing them as unprofessional and rude. These criticisms suggest that
staff behavior can create a negative and toxic environment.\nAbuse of power and favoritism:
Multiple players have claimed they were unfairly banned for minor infractions, especially if
they came into conflict with paying 'VIP' members or administrators in-game. Some community
members perceive favoritism towards donators, leading to a corrupt and unbalanced playing
field.\nQuestionable donation practices: Concerns have been raised about the project's
donation system, which includes expensive packages. Some players feel this creates a pay-to-
win environment, with donators receiving special privileges.\nExcessive promotion and
spamming: The 'Make DayZ Great Again' movement associated with Project Jackalope has been
criticized for using spamming and propaganda tactics to promote its servers. Some players and
admins of other DayZ groups have reported banning Project Jackalope members for aggressive
promotion in their communities.",

Complaints stretch back several years, suggesting the issues are not isolated incidents but a pattern of alleged misconduct within the community.\nAccusations and user complaints\nMultiple users have posted warnings about Project Jackalope on Reddit, Facebook, and other gaming forums, describing incidents of alleged abuse:\nArbitrary bans: Several players claim they were banned for unfair or arbitrary reasons. In a 2025 Reddit post, one user alleged that their friend was banned for cheating based on flimsy 'evidence' that was never revealed. When the user tried to get more information, they were also banned from the Discord server. A similar incident was reported in 2020 on the r/DayZServers subreddit.\nAdmin favoritism and abuse of power: The community owner and administrators have been accused of abusing their power, often to the benefit of 'VIP' donors. In a 2020 post, a player claimed the server owner streamed himself raiding their base, which led to their group being raided multiple times. The group was later banned after questioning an announced change to base damage rules.\nToxic and unprofessional communication: Users consistently report that admins and the owner communicate rudely and dismissively. In a 2020 complaint, a player was asked 'are you crying?' after they suggested adding a rules channel to the Discord. They were then banned for 'spamming' after responding.\nMonetization concerns: Some players have raised concerns about the server's monetization practices, suggesting that donations buy influence rather than simply supporting the server. One user mentioned a '$250 VIP package' and noted that a pattern of 'sketchy events' seemed to revolve around these high-paying players.\nConclusion\nBased on the available community feedback, Project Jackalope has a divisive reputation. While it provides a popular platform for custom DayZ servers on both PC and console, a significant number of players report negative experiences involving alleged admin abuse, favoritism towards donors, and a toxic community environment.",

The search results indicate a history of poor server performance and hostile interactions with the administration and owner, leading to players being unfairly banned.\nKey criticisms of Project Jackalope based on community feedback include:\nToxic administration: Several players allege that the owner, sometimes referred to as 'Jack' or 'Jackalope,' and his administration team are immature, toxic, and unhelpful. They reportedly

do not address player concerns and insult members of the community.\nAbuse of power and unfair bans: Reports on Reddit describe administrators unfairly banning players for minor or unsubstantiated reasons. One user claims their faction was banned for asking a question and was mocked by an admin. Another Reddit user describes being banned after a new friend they met on the server was accused of cheating, and an admin was not receptive to a defense.\nFavoritism and raiding: Multiple accounts suggest that the admins collude with or favor high-tier donators. One player alleges the server owner streamed himself raiding their base early into their time on the server, resulting in repeated harassment.\nAccepting donations without addressing concerns: The administration is criticized for being more focused on accepting donations than on fixing bugs or addressing community feedback. Some players report paying for items to be spawned near their bases.\nPoor server performance: A Facebook post from 2020 complains that the Project Jackalope server suffered from 'wonky' loot and significant lag, making it unplayable.\nHostile interactions with the owner: A commenter on a December 2024 Facebook post suggested searching for the server's owner, described as 'toxic,' to see how the owner acts.\nThe opinions found stand in stark contrast to the positive posts found within Project Jackalope's own controlled Facebook groups, which often praise the servers and owner.",

Joel Walker

Community leaders still can't code. 95% of communities have horrible RPT errors. They shame others when they have lied since the start of there servers. I exposed these people at the cost of my community being grieved by the minute by thousands of trolls. 🙏 Server owners and players for the last two years have first hand witnessed or experienced trolling of my community or long time players over the last six years know of the constant grieving and trolling of ProjectJackalope because of its high standing in the community and the spitefully blatant slander from the server owners ex girlfriend in the community. Simp community leaders looking for attention from a women has caused these people to become what they are now.

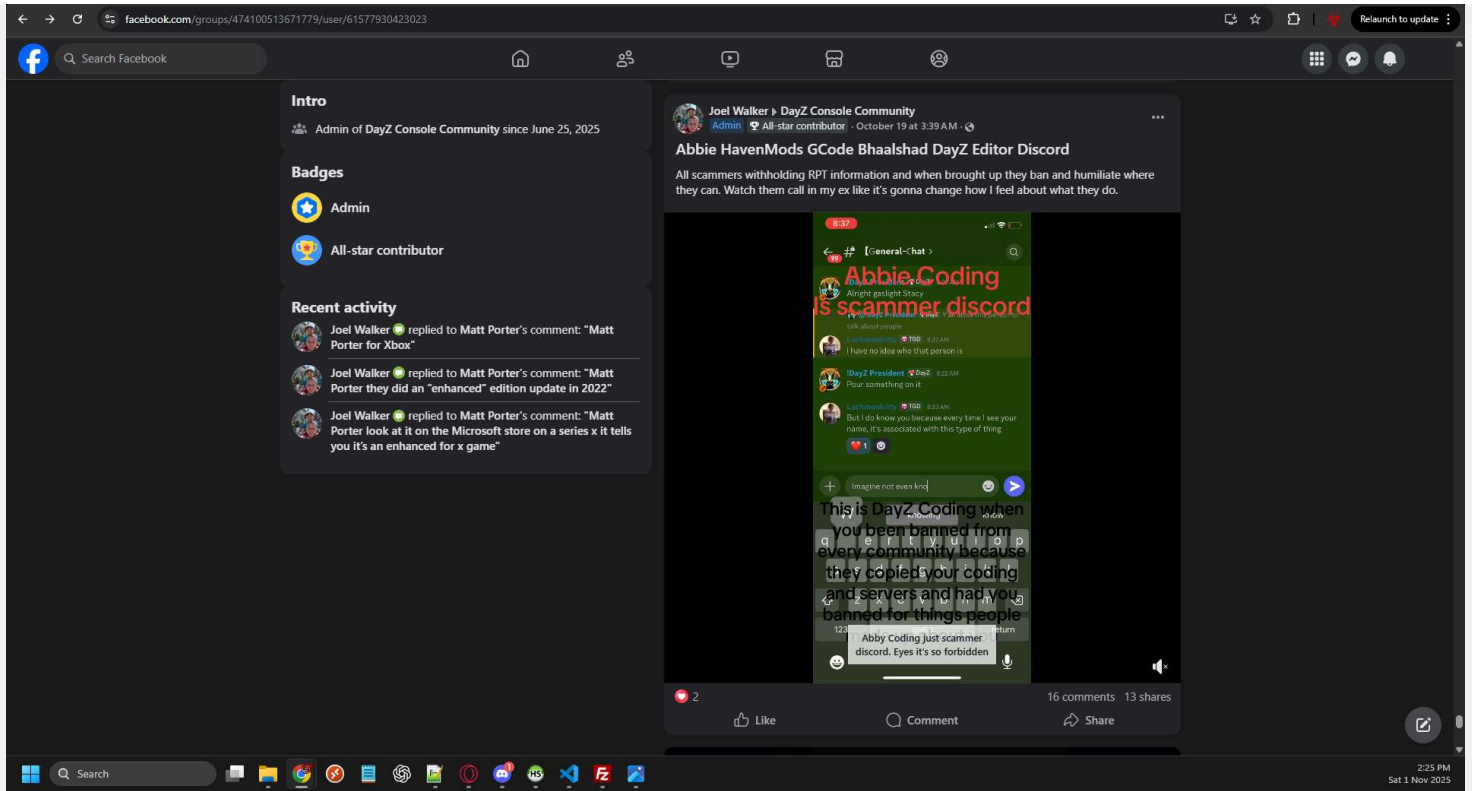

These people use minors and weak minded individuals to spread panic and horrific shock drama to destroy DayZ communities. Be mindful that MakeDayZGreatAgain sees what they have made and even at the expense of my servers population I'll still be here supporting the community I have created and banned these people from being a part of. I will keep my community members and myself safe and always ban these trolls. I will remain to MakeDayZGreatAgain.
