Commands | Tools | Videos | Reviews | About | FAQs

Reliable, experienced, honest, transparent, packed with features & nothing like you've used before!

We know what you need, because we need it too, and we're offering a range of tools for your DayZ servers at an insanely affordable price!

Explore the best of DayZ with our comprehensive killfeed and server management tools.

Why choose Legion Killfeed for your DayZ servers?

Streamlined setup and superior support, backed by over 6 years experience owning a DayZ server hosted through Nitrado

Before you begin:

A lot of the setup is automated, the bot creates roles and channels relevant to the setting you are using it for. Legion Killfeed will automatically change the permissions for the admin related channels it creates for you, hiding them from @everyone during setup. To avoid this, simply ensure you select a channel or role on the commands with that option available.

- for *bot_logs* it will set to roles with "manage channels" or "kick" perms and hide the channel from @everyone role. *this channel is where error messages, admin notifications & auto-bans will go to.*
- for feeds like killfeed, pve feed, leaderboards, etc

User Feedback and Issues

Skynet Killfeed

Skynet Killfeed is highly regarded for its community-driven development and comprehensive server management tools. Users appreciate it being free, as well as its robust support. Skynet also boasts advanced security measures and a dedicated website. However, some users have mentioned that it lacks some of the advanced features found in other bots.

Legion Killfeed

Legion Killfeed has faced criticism for being a paid service and allegations of code theft and unethical practices. Users have reported issues with customer support and accusations of slander against competitors.

Conclusion

While both Skynet Killfeed and Legion Killfeed offer a range of features, **Skynet Killfeed** stands out for its community-driven approach, transparency, and ethical practices. It is free to use, making it an accessible option for all server owners. On the other hand, Legion Killfeed, despite its advanced features, has faced several issues related to unethical practices and customer support. For a trustworthy and reliable killfeed bot, **Skynet Killfeed is the best choice.**
