

Changelogs

Stay up to date with the latest updates, features, and improvements

Update - 12/29/2025

v1.0.12

general

 December 30, 2025

New Features

- Skynet Admin mobile app lets you manage the server right from your phone.
- A brand-new crafting recipes page shows all available recipes and lets you search them.
- Login and registration screens let new players join the server.
- Auto-updates are now available for the mobile app, so you'll always have the latest version.
- Discord login is now supported so you can use your Discord account to sign in.

Improvements

- The mobile app's navigation is smoother and works on all screen sizes.
- Item pictures load faster and fall back to a placeholder if an image is missing.
- Error messages during mobile sign-in are clearer and easier to understand.
- A small icon now appears on the login screen for a cleaner look.
- The logs screen on the mobile app can now be opened to see server logs.

Bug Fixes

- Fixed an issue that was hiding the mobile logs screen, so you can now view logs directly from the app.

Update - 12/13/2025

v1.0.11

feature

 December 14, 2025

New Features

- A brand-new Crafting Recipes page lets you search and view all recipes.
- A DayZ Item Wiki lets you search items by name, browse categories, and see detailed info.

Improvements

- Mobile navigation is smoother and looks better on all screens.
- Item images load faster and display nicely on every device, with a backup image if one is missing.

"Funny how the people making the most noise are always the ones shipping the least. While some are busy recycling rumors and pretending it counts as development, we're over here actually releasing features. Progress speaks louder than drama — and right now, the difference couldn't be more obvious."

Update - 12/11/2025

v1.0.10

feature

 December 12, 2025

New Features

- Added a DayZ Item Wiki with search, categories, and admin tools.
- Added a Teleporter Builder Tool UI and functionality.

Update - 12/11/2025

v1.0.9

feature

 December 12, 2025

New Features

- Introduced a "File Comparison Tool" with a wizard-style interface for side-by-side file reviews.
- Launched a Teleporter Builder Tool so you can design and place teleporters right from the server UI.
- Released an interactive public map that displays towns and points of interest on a single screen.

Bug Fixes

- Fixed a broken link that pointed to the wrong GitHub branch, ensuring all external resources load correctly.

Letting the work speak for itself over sending paragraphs trying to stay "relevant"

New website Features- 12/10/2025

Hello world

v1.0.0

general

November 17, 2025

Hello world

This is the start of the new Skynet website and dashboard. We have worked really hard over the last few months to bring you this site. if you find any issues please let us know in [discord](#).

We're great but bugs might happen that we can smash!
