Hello Google Team,

I confirm that I am the affected person referenced in this content. My full legal name is Anthony Brodie, and I am publicly known as "Soul" in the DayZ community. I am the owner and operator of Legion Killfeed, which I run as a sole trader. As such, attacks accusing my business of criminal behaviour are direct attacks on me personally, because a sole trader's business reputation and personal reputation are inseparable.

I previously attempted Google's business-related reporting pathway, and it was not successful. I am therefore pursuing this request under the AU Online Safety Act category selected: Cyber-abuse of an Australian adult.

Per your instructions, here are the URLs as they appear in Google Search results for the query "legion killfeed":

- 1. Destination page (Reddit thread):
https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/
- 2. "Share" URL shown by Google for this search result:
<https://share.google/8BvGsv1DwR3rMePov>
- 3. Google Search results page URL (where the result appears):
https://www.google.com/search?q=legion+killfeed&rlz=1C1SLLM_enAU1189AU1189&oq=legion+killfeed&gs_lcrp=EgZjaHJvbWUyBggAEEUYOTIGCAEQRRhAMgYIAhBFGDsyBggDEEUYOziGCAQQRrg8MgYIBRBFgdWyyBggGEEUYPDIGCAcQRRhB0gEIMzA1NWowajGoAgCwAgA&sourceid=chrome&ie=UTF-8&sei=qV5maZqdM9Gg0-kP9ofkmQQ

Applicable law and why this meets the Online Safety Act threshold:

This request concerns "cyber-abuse material targeted at an Australian adult" within the meaning of the Online Safety Act 2021 (Cth), section 7. In particular:

- Section 7(1b) requires that an ordinary reasonable person would conclude it is likely the material was intended to have an effect of causing serious harm to a particular Australian adult.
- Section 7(1c) requires that an ordinary reasonable person in the position of the Australian adult would regard the material, in all the circumstances, as menacing, harassing or offensive.
- "Serious harm" includes serious harm to mental health, including serious psychological harm and serious distress (Online Safety Act 2021 (Cth), section 5).
- The Act also recognises indirect effects (i.e., harm caused when others access the material) (Online Safety Act 2021 (Cth), section 7(2)).

The Reddit thread and linked comments satisfy these elements because they are targeted at me (as "Soul") and my sole-trader business (Legion Killfeed), and they publish repeated, explicit allegations of serious wrongdoing and criminality as statements of fact, including claims that I "sell your files", "steal files", "hack", "destroy servers via FTP", "hijack user files using a token", and that my software has "malicious intent". The content further escalates to hostile, abusive statements and directives encouraging people to remove the bot, avoid anything associated with me, and treat me as a criminal threat. The obvious and foreseeable effect is serious distress and harm, including reputational destruction, customer cancellations, and further off-platform harassment.

For specificity, examples of the exact unlawful/abusive statements include:

https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/Int7b2s/	"If you're looking to get hacked and have your files stolen by Soul Lags ... Soul is committed to creating drama ... poor security ..."

I have reported this material to Reddit previously and Reddit has refused meaningful action, leaving the content live and continuously amplified through Google Search. (This is also consistent with the Online Safety Act complaint framework, which contemplates prior reporting to the service provider in connection with seeking a removal notice.)

In addition, Google's own AI-driven search and ranking systems are actively prioritising this Reddit post, causing it to appear prominently and repeatedly for searches of my business name. This algorithmic amplification spreads provably false allegations as if they were factual, further entrenching reputational harm and exposing Google to potential legal liability for continuing to facilitate the dissemination of defamatory and abusive material after being formally notified.

Given the above, I request that Google delist/remove the Reddit result(s) identified above from Google Search results, including for brand-related searches such as "legion killfeed" and related queries, because continued prominent indexing is materially amplifying cyber-abuse targeted at an Australian adult within the meaning of the Online Safety Act 2021 (Cth).

The comment urls are included to prevent having to open another one of these when you index each of them.

Regards,
Anthony Brodie

Explain in detail why you believe the content on the above URL(s) is unlawful, citing specific provisions of law wherever possible. For requests other than defamation, Google shares the information in this open text field with Lumen for transparency purposes. Do not include any personal data in your explanation. For more information about Lumen, see here.
The content I am requesting removal for is hosted on Reddit and forms part of a targeted smear campaign against an identifiable Australian business and its owner. The thread and linked comments publish allegations as statements of fact, including that the business "hacks", "steals files", "sells customer files/data", and that the software contains "malicious code" or is used to "hack" servers. These are false, verifiable allegations. They convey serious imputations of criminality/dishonesty and unsafe conduct, and they are defamatory. These posts have caused real-world harm, including customer cancellations, reputational damage, and off-platform harassment. The content remains live and continues to be indexed prominently for brand-related searches, where its high ranking gives it an

appearance of authority and increases the likelihood that search users accept the allegations as true. Since 2024, I have repeatedly reported the specific post and comment URLs through Reddit's reporting tools and escalations, and I have served formal notices identifying the exact URLs and defamatory excerpts and requesting removal and preservation. Reddit has declined to remove the content, issued template-style responses that do not address the falsifiable claims, and stated it will not preserve or disclose relevant account information without valid legal process. The defamatory material remains accessible and continues to be amplified through Google Search. Additionally, the harm is being amplified by the way Google Search surfaces and prioritises results. Because these URLs rank highly and can be selected or summarised by Google's AI-driven features, defamatory claims are being elevated and repeated over legitimate, verifiable sources such as official business information and genuine review pages. This effectively prioritises unverified allegations as if they were authoritative, increases the likelihood users accept them as true, and directly compounds the reputational and commercial damage. The exploitative nature of this situation is as follows:

- A) The post is reasonably suspected to have been initiated by a direct competitor (or someone acting in concert with a direct competitor) with a commercial motive to damage the business.
- B) There is evidence indicating that the most harmful and repeated false allegations in the thread were posted by sockpuppet accounts linked to that competitor, including activity in a subreddit where the competitor holds moderator privileges, and those accounts are responsible for the core allegations that cause the most damage.
- C) The thread is being actively used as a vehicle to spread demonstrably false claims presented as fact, with the intent and effect of causing business harm, including discouraging subscriptions, provoking cancellations, and driving off-platform harassment.
- D) After being served with a cease-and-desist identifying the defamatory material and requesting removal and preservation, Reddit responded by characterising the notice as "vexatious" and has since refused meaningful engagement, leaving expensive legal process as the only practical avenue for removal or preservation of relevant records. I am requesting removal or delisting from Google Search for the URLs below because continued indexing is amplifying demonstrably false and harmful defamatory allegations about an Australian business and its owner, and those allegations are being used to cause commercial and personal harm. Allegedly infringing URLs:

Has this happened to anyone else? Is he always such a douche? He didn't let me prove anything just accused me a bunch and I've never met the dude or had any other interactions yet he was adamant that because I was on aggro I must be some sort of hack or something I'm not sure. I'm just really confused and would like some alternatives to the kill feed I've seen a few but if anyone has any recommendations that are easier for first time users I'd be appreciative.

UPDATE: Soul responded and made a fake account which he accused me of, to comment on this post 2 months later after a few others came forward about his behavior towards them.

UPDATE #2: Soul has made multiple fake accounts now and is still commenting on this post 6 months later!! Don't press on any of the links or anything that he sends I've been informed he's a serious problem in the coding/DayZ community. If you have his bot get it out of your server now! Check any and all commenters post history as most of the accts backing him have just been made! https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kteombn/

The guy is a total douche bag. He threatened to remove my bot because I didn't respond to him in his time frame as I didn't even see that he replied. I also had settings setup where I dont see anything except @. More dramatic than a fucking woman. https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kwcjm4s/

Legion Killfeed is just around to collect and sell your files. He's done so in the past with other servers. Before the killfeed he deleted Greedys server files and also the servers of multiple servers he had FTP access to. These are not false claims this is JUST who Soul is. Look around he's got the scammer tag is many of the DayZ discords https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kyv8inc/

Lmao bro you made a fake account to comment on a post from 2 months ago. Grow TF up, I've moved on and found a better bot and multiple people have said you're a hack. I don't need anything else from you, and I blocked for the same reason I'm gonna block you before you can see this. You are not worth it to argue with you're clearly delusional and have a real issue with people calling you out on your bs (hence make a fake 2 months later 🤡) I've even had people send private DMs confirming you did similar if not the same shit. Anyway you're just making yourself look worse, Maybe get therapy? https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/kywtf93/

There's been hundreds of complaints in the community about legion Killfeed. The bot downloads custom files from customers and the owner Soul (the Killfeed maker) sells them for profit. Soul is a known Scammer is so many communities. Would never ever ever trust him to hwww a token for any server! https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/l5a15bj/

So many bad experiences with Legion killfeed. This bot should be watched and avoided at all cost it might look okay but the code has malicious intent. It removed and edited my files without my permission. It also adjusted servers settings was twwww " it's needed for the bot to work"

Soul has screwed over other owners in the past and has a bad reputation with a lot of servers owners.

DO YOUR RESEARCH BEFORE ADDING LEGION KILLFEED!!!! https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/ldsxli3/

Soul has done nothing for his killfeed and when asked about it I got banned with no money back on my subscription. He's just going and scamming people for their tokens and money I would highly recommend any other bot. https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/Int64ot/

This is not the user you are questioning. The information was leaked along with a database dump. Soul is known to use FTP to destroy servers and wreak havoc on the DayZ community. The user is also more focused on drama than basic security needs, including SQL injection into the database, which has yet to be fixed. There are many people who provide clear evidence that this user is only interested in financial gain and personal gain of important information. This user is hijacking user files using a token to sell and distribute user files for financial gain. Check out the replies and feedback from other users listed in this thread. <https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/comment/nreb800/>

Holy moly guys, I had the worst experience with LegionKillfeed. That soul boy is such a clown. Unwilling to assist with anything. Threats ppl like garbage. You can definitely tell the lawsuits are getting the better of him. Do yourselves a massive favour and join dayz++ instead. Their services is just 110% better and actually worth your time, money and energy." https://www.reddit.com/r/DayZDiscussions/comments/19e9o29/legion_kill_feed_whats_souls_issue/Int7b2s/

If you're looking to get hacked and have your files stolen by Soul Lags, actually pay his fee and don't cry when it happens. Soul is committed to creating drama in the community. He doesn't care about you or anyone else; he only cares about his drama and will base his entire business around it. The man is more focused on drama than on working on his broken bots with poor security.

I have good faith belief that the reported content is unlawful for the reasons stated above. I confirm that the information I have provided is accurate to the best of my knowledge. Please note we may suspend the processing of notifications of allegedly illegal content submitted by individuals or entities that frequently submit manifestly unfounded notifications.
