There is a lot of noise in the DayZ community about "1000x" servers.

Let's clear the air: **ProjectJackalope 1000x isn't a loot multiplier—it's a performance benchmark.**

While other communities flood the coast with "loot shacks" that crash your frames, we scale the experience through stability, integrity, and elite hardware.

We are a cross-platform ecosystem of **8 community servers** dedicated to the **Jackalope Mandate**: replacing toxic harassment with strategic dominance.

OUR SERVERS

PlayStation (1000x|PvE Focus)

Experience the ultimate survival trilogy. Our PlayStation servers are optimized for those who value community and long-term progression over "disposable" weekend wipes.

- **Sakhal:** Brave the newest frozen frontier.
- **Chernarus:** The classic home for high-performance survival.
- **Livonia:** Tactical PvE in the deep overgrowth.

Xbox (1000x|PvE Focus)

We bring professional moderation and adult-led environments to the Xbox community.

- **Chernarus & Livonia:** Smooth, lag-free PvE gameplay built on a hardware-first philosophy. Your fights with Ai are decided by skill, not frame drops.

To align with your **1000x Performance** branding while shifting the focus to high-stakes combat, here is the updated breakdown for your two PvP-focused servers. This keeps the language consistent with the **Jackalope Mandate** while emphasizing skill-based warfare.

THE PROJECTJACKALOPE PVP EXPANSION

The PvP Standard (1000x)

While our PvE servers offer a haven, our PvP servers are built for those who want to test the **Jackalope Mandate** in the heat of combat. We use the same "Performance Benchmark" loot tiering: no lag-inducing loot shacks, just high-tier tactical gear and elite server stability.

PlayStation PvP (1000x Performance)

Experience combat without the console stutter. Our PlayStation PvP environment is tuned for fast-paced engagements where your reflexes matter more than your internet connection.

- **Tactical Domination:** Optimized for squad-based warfare and strategic territory control.
- **Skill-Based Loot:** High-tier gear is earned through dominance, not found in piles on the coast.

Xbox PvP (1000x Performance)

The ultimate testing ground for the Xbox community. We provide the hardware-first infrastructure needed to ensure your long-range snipes and close-quarters breaches are frame-perfect.

- **Performance Over Quantity:** We've removed the "junk" loot that plagues other servers to give you the smoothest PvP experience on Xbox.
- **Professional Combat:** Moderated to ensure fair play, allowing you to focus on strategy and survival.

WHY PROJECTJACKALOPE PVP?

1. **Hardware-First Philosophy:** We ensure your fights are decided by skill, not frame drops.
2. **Strategic Dominance:** We encourage tactical gameplay over toxic griefing.
3. **Built to Last:** Even in our PvP zones, we prioritize long-term community progression over "disposable" weekend cycles.

ENTER THE WARZONE: [Discord.gg/projectjackalope](https://discord.gg/projectjackalope)

PC (High-Stakes Tactical PVP)

Our PC server is a different beast entirely. Set on the stunning **PNW (Pacific Northwest) map**, we offer a heavily modded, tactical experience in a controlled loot economy.

- **Tactical Air Supremacy:** Fly custom Proplanes and Helicopters.
- **Elite Gear:** Featuring Fallout-inspired equipment and top-tier tactical mods.
- **High Stakes:** Every encounter matters. This is DayZ evolved.

THE JACKALOPE MANDATE

1. **Organizational Integrity:** Professional, unbiased moderation.
2. **Server Health:** Optimized files for the smoothest console and PC experience possible.
3. **Respect for the Player:** Your time is valued here. We build communities that last.

Stop playing on "disposable" servers. Invest your time in a community that's built to scale.

🔥 **PROJECT JACKALOPE – 7+ YEARS STRONG** 🔥

Survival isn't just a game.

It's a legacy.

For over ****7 YEARS****, ProjectJackalope has been holding it down as one of the ****longest-running DayZ console communities**** — and we're not slowing down.

We've had ****the same owner.**

The same vision.

The same grind.**

No resets of leadership. No disappearing admins. No fake hype. Just consistency and performance.

🔥 ****Why ProjectJackalope?**** 🔥

🎮 High-performance community servers built for smooth PvP & real survival

📦 Spawn kits for newcomers so you're not stuck punching zombies for 3 hours

💎 A tiered loot economy that actually makes sense

✂️ Balanced progression for experienced killers and fresh survivors

⚙️ Active management and long-term stability you can trust

We didn't pop up last month.

We didn't rebrand three times.

We didn't swap owners after drama.

We've been here.

Grinding.

Building.

Outlasting.

🧟 Whether you're a seasoned PvP veteran or just stepping into Chernarus for the first time — ProjectJackalope gives you the tools to survive, compete, and dominate.

Seven years of consistency speaks louder than any server description ever could.

If you want stability.

If you want performance.

If you want a community that doesn't fold when things get hard...

****You already know where to spawn.****

wtf is a Un-Halloween sale? Should just run random % off sale when our wages are going down because we F'd our game up again.

How you gonna add more cheaters and kill your own revenue by adding pc players to console servers before making them console to console with PlayStation?

Thales the head dev working on DayZ doesn't even know what the file sets look like just the fucking pay checks.

Watch anything with him being asked about file sets and it's "uhhh uhhh uhhhh" every statement that is a passive way of avoiding the topic.

AI Overview

Legion Killfeed is a popular, fast Discord bot for DayZ console servers (Xbox/PlayStation) offering real-time tracking, detailed combat logs (distance, weapon, health), and 150+ management commands. It costs around \$7 USD for premium features, though some users have reported reliability issues. [Trustpilot +2](#)

Key Features of Legion Killfeed:

- **Real-Time Tracking:** Provides nearly instant alerts for kills, deaths, and player activity.
- **Detailed Metrics:** Logs hit zones, weapon used, victim/killer health, and damage distances.
- **Server Management:** Includes over 150 commands for Discord and in-game server administration.
- **Customization:** Highly customizable for RP, PVE, and PVP-focused servers.
- **Easy Setup:** Offers a relatively straightforward installation for Nitro-hosted servers. [Trustpilot +3](#)

Alternatives and Considerations:

- **MDZGA Killfeed:** Promoted as a high-performance, "hardware-first" alternative with detailed, low-latency tracking.
- **Reliability Warning:** While many rate it highly, some users on community forums have reported issues with uptime and billing, as seen in this [Facebook post](#). [Trustpilot](#)

🔴 **BREAKING NEWS: MASSIVE DAYZ OPERATION BUSTED** 🔴

Authorities in Prague have just raided a warehouse packed with hundreds of Xbox and PlayStation consoles—running 24/7 in what officials are calling a “full-scale gaming production line.”

🎮 From older consoles to the latest Xbox Series X and PlayStation 5 Pro...

🖥 Every system was locked into one thing:
Grinding, farming, and mass-producing gear inside DayZ.

📺 LIVE FOOTAGE shows:

- Rows of consoles stacked wall-to-wall
- Screens running synchronized gameplay
- Suspects detained as police shut everything down

⚠ This wasn't just gaming...
This was industrialized survival.

Players skipping the grind.

The Jackalope philosophy, often summarized as the "Jackalope Mandate," is a server management approach that prioritizes hardware performance, file cleanliness, and professional-grade organization over standard community modding practices. It was established by TheJackJackalope (founder of Project Jackalope and leader in the Make DayZ Great Again movement) as a direct challenge to what he describes as "bloated" and "toxic" unoptimized servers.

Core Tenets of the Mandate

- * **Hardware-First Philosophy:** The belief that skill—not frame drops—should decide encounters. This is achieved by scrubbing server files to remove RPT errors (engine logs indicating performance-heavy conflicts), aiming for stable 60 FPS even on high-population console servers.
- * **Server Health (Clean Code):** A rejection of "1000x" junk and unoptimized copy-pasted code that clutters maps and causes crashes. Proponents focus on "scaling" the experience through technical fluidity and file integrity.
- * **Organizational Integrity:** Professional, mature, and unbiased moderation aimed at creating a "zero-abuse" environment. This includes a zero-tolerance policy for drama-mongering, toxic grieving, and "admin-spawned" gear.
- * **Strategic Dominance:** Encouraging tactical gameplay where players must use their heads as much as their triggers. The philosophy favors long-term community progression over "disposable" weekend server cycles.

The "Make DayZ Great Again" (MDZGA) Movement

The philosophy is disseminated through the Make DayZ Great Again community, which offers:

- * **Free Coding Education:** Teaching owners to fix flawed server code and manage files without profit-driven motives.
- * **Transparency:** Highlighting flaws in popular pre-made mods and advocating for "Vanilla+" balance that respects player time without breaking immersion.
- * **Security Awareness:** Educating the community on protecting servers from malicious attacks and exploits. @everyone

Not sure if this is allowed on here or not, but I'm working on my server and ran into a snag when trying to set up the Legion Killfeed on my discord. If anyone has used this before or can point me in the direction of someone who can help me finish setting it up, that would be great.

The owners and moderators of the bots mentioned slander peoples personal lives over coding knowledge and social status to be ahead of others

They charge for coding services and file channels of things they can just show others how to do themselves but gatekeeper knowledge from others and slandering those that mention it

They charge for multiple servers when ss9 has been running my seven servers since 2020 on the same monthly subscription no changes no need for more money up charging like I received over the years from the bots mentioned above.

Doing my own server for Xbox, Completely computer illiterate, until a month ago I hadn't owned or really used a PC/Laptop for 20+ years. Got my head around editor, getting my head around the xml side of things but how TF does discord work? 🤔🤔 I've linked my server to the discord, even tried to install a killfeed bot which was a waste of money because I basically got laughed at by some pr1ck called Saul who owns/runs the Legion Killfeed bot as i don't know how any of it works. Any help or guidance would be massively appreciated.

Serious Security and Trust Concerns

I'm leaving this review due to serious concerns about this bot and the individual behind it. There is a well-documented pattern of discussions across the DayZ and Discord communities regarding this tool being linked to exploitative behavior, including actions that have resulted in Discord servers being compromised or wiped.

In addition to the technical concerns, I've personally been subjected to ongoing harassment connected to this project, which shows a complete lack of professionalism and accountability. When a developer behaves this way, it raises major red flags about trusting them with administrative or bot-level access to a server.

Server owners should think very carefully before giving this tool any permissions. Trust, transparency, and respect for community safety are critical — and based on my experience, this product and its operator do not meet those standards.

Project Jackalope DayZ

Searching for community opinions on "Project Jackalope" outside of its official Facebook group primarily yields very negative feedback and complaints from the video game DayZ community. The search results indicate a history of poor server performance and hostile interactions with the administration and owner, leading to players being unfairly banned. 🗨️

Key criticisms of Project Jackalope based on community feedback include:

- Toxic administration:** Several players allege that the owner, sometimes referred to as "Jack" or "Jackalope," and his administration team are immature, toxic, and unhelpful. They reportedly do not address player concerns and insult members of the community.
- Abuse of power and unfair bans:** Reports on [Reddit](#) describe administrators unfairly banning players for minor or unsubstantiated reasons. One user claims their faction was banned for asking a question and was mocked by an admin. Another Reddit user describes being banned after a new friend they met on the server was accused of cheating, and an admin was not receptive to a defense.
- Favoritism and raiding:** Multiple accounts suggest that the admins collude with or favor high-tier donors. One player alleges the server owner streamed himself raiding their base early into their time on the server, resulting in repeated harassment.
- Accepting donations without addressing concerns:** The administration is criticized for being more focused on accepting donations than on fixing bugs or addressing community feedback. Some players report paying for items to be spawned near their bases.
- Poor server performance:** A Facebook post from 2020 complains that the Project Jackalope server suffered from "wonky" loot and significant lag, making it unplayable.
- Hostile interactions with the owner:** A commenter on a December 2024 Facebook post suggested searching for the server's owner, described as "toxic," to see how the owner acts. 🗨️

The opinions found stand in stark contrast to the positive posts found within Project Jackalope's own controlled Facebook groups, which often praise the servers and owner. 🗨️

This bot is absolutely 10000% trash. You rent their bot, and they don't allow you to use the bots discord to promote your server unless you pay them even more money. The bots features are garbage as well. You are better off going and renting the Dayz+ bot for a lot less than what is charged by these guys.

3 1 Reply Share

Soul_Logs • 2y ago

That's funny, because it's been free for over a year, sounds like you're just promoting another bot and spitting all over mine without ever actually using it.

The truth is, we allow anyone using the bot to advertise within our support discord. They simply have to have the role that is added automatically by the bot when you set it up for your server.

Discord had evidence of false pedophile accusations for 4 days before punishing the victim. This represents knowing misconduct, not just processing error. The platform is now actively enabling serious harassment. This creates liability beyond typical support complaints.

This is not a routine billing question. It is a breach-of-contract / Australian Consumer Law refund demand. Please link and merge this billing ticket with Trust & Safety tickets 61451498, 61451749, and 61465755 and escalate to Billing Compliance + Trust & Safety Management + Legal.

Refund scope I am demanding
Full refund of all Discord fees paid from 11 March 2021 to present, starting with Payment ID 905340670112317472 (PayPal), and including any subsequent renewals, boosts, and add-ons.

Statutory interest and fees.
Written confirmation that all related enforcement flags are removed and my account is annotated for targeted-harassment protection.

Why this is a breach (summary)

Discord has repeatedly failed to provide services with due care and skill and not fit for the stated purpose (safe, usable access with fair, context-aware enforcement).

I am the reporting victim of a competitor-driven harassment campaign that escalated to false pedophile accusations, suicide incitement, doxxing, and use of my children's images.

25 Oct: Facebook post naming me as a pedophile.

4 Nov: Discord placed a harassment strike on me for defending against those accusations, even though Discord already held the Facebook evidence for 4+ days.

Result: paid features were restricted (DMs, friend requests, servers, uploads) and my business was harmed, while the harassers remained active. This is not the service I paid for since 11 Mar 2021.

What I require from Billing/Legal now
Backdated refund for all payments from 11 Mar 2021 → present to the original PayPal source.
Itemised ledger (CSV/PDF) of every payment on my account since 11 Mar 2021 (date, amount, product, transaction ID).
Strike/flag reversal and a written explanation of why enforcement was taken despite prior evidence that the accusations were false.
Safety annotation preventing reporter-retaliation in future moderation.
Enforcement review on the identified harassers (including Joel Walker and associates) with outcome notes.

Why this action is incorrect

My linked message documents ongoing harassment against me and provides context and evidence. It is not abusive, threatening, or targeted harassment toward another user.

Moderation penalized the victim's documentation rather than the slander itself, even though Discord had four days' prior knowledge of the context before applying the action.

This continues a pattern where my account is restricted after I report the abuse, which discourages reporting and undermines trust in the process.

Continued ignorance of the case will result in legal action and this will reflect badly on discord, especially in Australia that is currently undergoing major law changes regarding online abuse.

The harassers' failures are evident – they have not produced any truth to back their claims – but the real failure has been on the part of the platforms to enforce their rules. This timeline shows how Soul repeatedly tried to resolve each incident: flagging, appealing, providing proof, contacting moderators and law enforcement. Each time, the attackers adapted and the platforms dragged their feet.

Luca has joined the conversation.

This guy attacks everyone on facebook using crap from discord and is one of the biggest misinformation spreading dogs. Right now he is editing past posts to call me a pedophile and he frequently does the same posts in discord, I just have not got an account in his discord because unlike the people you have enabled while attacking me, I don't block/ban evade.

Here's his IDs, plus months of proof

Yo yo yo, we're thinking of getting legion again but had a question! We kind of want to automate making base radars, we play the game as well and dont want people to think we know exactly where their base is because we setup the base alarm... Is it still the same process that one of the admin guys needs to create the alarm and everything?

Soul LGION Tue 4 Nov 2025 2:21 AM

I do have notes and some examples of an idea I had for auto-creation on fence kit placement but I have to get the faction system implemented for it to work, shouldn't take much, just been sidetracked dealing with all the fan boys

I'm just about to send a email that could get Jackelope's facebook account and group deleted

Hello Anthony,

Someone replied to you

YOU LYING PIECE OF SHITS TOLD ME "This is an automated message: an agent...

I understand that this is frustrating for you, however, I would kindly request you not to use profanity/

Anthony, from our end we have checked for all possibilities here, and I would like to let you know that to report a content or post the best is to report it through the link we have provided you.

Facebook user

Please know that we empathize with the challenges you're facing and are committed to providing assistance.

We can only resolve your issue by logging a formal problem report. Anthony, I understand that you have reported it multiple times, however, I would kindly suggest you to report it again from your end, and from my end I will I will also try leaving a note from my end requesting the team to manually review it on a priority basis.

Facebook user

You may kindly go through this link -
<https://www.facebook.com/help/181495968648557>

I don't mean to rush you; however, the chat has been idle for the last couple of minutes, and I am wondering whether we are still connected.

Huh

Are you being a fucking idiot again

You do realise you've ignored the evidence entirely despite my repeated complaints that your stupid piece of shit link doesn't work.

Which means, Meta is liable

And I will be persuing this legally.

While you argue with me over forms, you refuse to remove a post calling me a pedophile.

You solicit my phone number

Then never call it.

You make me wait from 8pm until 5am in a chat, the never return

This demonstrates bad faith

So if I swear, get the fuck over it

Now do your job or get a supervisor.

Facebook user

Anthony, I totally understand your concern and your frustration here, however, please try to understand, from our end we have checked for every possibilities for your concerns and issues. And I understand that you have reported the content multiple times however, I am kindly requesting you to report it again, and from my end I will also try leaving a note from my end requesting the team to manually review it on a priority basis.

You replied to participant

I can totally understand your frustration here, however, I would kindly...

I kindly request you stop facilitating a crime

You know it is a defamatory post

You refuse to act because I don't click your buttons you want, but I don't do that because it doesn't work.

I have shown you proof of this.

And you go "bugger, try again"

And now for 4 days Meta has known about this, lied repetitively to me and left the defamatory content online.

So go get your supervisor right now

@Adi

Get your supervisor

@Adi get your supervisor before I get my lawyer

Now.

I don't care what you are typing.

Unless it is that you've removed the post or your supervisor is coming, don't type. Do as your told

Facebook user

Anthony, I completely understand your emotions here, however, the same details will be given by the supervisor.

@Adi if your supervisor doesn't hurry up, I will call the police to the named addressee registered to the ABN holder and I will have them arrest your Australian representative for facilitating a crime.

Facebook user

If you want you can go ahead and report the content from your end and let Meta decide if it should be taken down or not .

Are you seriously this dumb.

Facebook user

I am sorry , we do not have a manual option from our end to remove a post .

Look at the attached files you morons.

Someone replied to you

Are you seriously this dumb.

This is a personal comment , I would like to keep this chat professional here.

I don't care about your feelings, you are a criminal

Someone replied to you

Look at the attached files you morons.

Please report the post , it is your right to do so .

Stop being a criminal and I might actually treat you with respect

Facebook user

Meta will work according to it norms , which are common for all .
