Google Legal / Search Removals Team,

WITHOUT PREJUDICE SAVE AS TO COSTS

Google can no longer hide behind Defteros as though this is a neutral hyperlink case. Google has been repeatedly placed on notice. Google has repeatedly claimed that reported material was “not currently displayed” or had “been removed.” Google then continued displaying the same defamatory allegations through snippets, panels, forum/discussion modules, Google share URLs, Google redirect URLs, canonical URLs and parent-thread results.

That is not Defteros. That is Google being told about specific defamatory matter, saying it was gone, then continuing to reproduce and surface the same defamatory sting anyway. The attached video makes the problem even clearer. The video shows Google displaying the Facebook result: <https://www.facebook.com/groups/dayzeditors/posts/1385739236246930/>

That result is a neutral setup-help post titled “Setting up legion killfeed on discord?” The visible page does not contain the sabotage allegation Google is using as the snippet. Google nevertheless attaches this defamatory text to it: “If you use Legion Killfeed at anytime dude will reset loop your server and force your players to leave your community.”

Google is snippeting defamatory text for the wrong URL.

The video also shows where that “reset loop” lie actually comes from. It comes from the same hostile Facebook / MDZGA / GoMining environment where the same person posts the reset-loop accusation while promoting his own competing killfeed bot. The page is visibly spammed with repeated posts, repeated promotional material and repeated competitor content. Google is not neutrally organising reliable information. Google is rewarding a spammed competitor attack page and using its defamatory accusation against Legion Killfeed in brand search results.

The video shows the same page repeatedly pushing the competing killfeed bot, including promotional material for MDZGA Killfeed. It also shows that the hostile page is filled with repeated posts over and over, creating exactly the kind of repeated indexed material that Google then ranks and surfaces against my business name.

Google has already been told the context:

- The “reset loop” allegation is false.
- The post is competitor-linked.
- The same person promotes his own killfeed bot.
- The page is spammed with repeated promotional/attack content.

Google is attaching that defamatory accusation to the wrong Facebook result. Google previously claimed related material was not displayed or had been removed. Google is still displaying it.

Google therefore cannot keep treating this as a simple Defteros hyperlink issue. Defteros does not excuse Google reproducing a defamatory accusation in its own snippet, attaching that accusation to the wrong URL, ranking spammed competitor-linked attack material, and continuing to display the same allegations after Google said the material had been removed or was not displayed.

Google’s latest request for country confirmation also does not answer the issue. The requested removal is worldwide. Legion Killfeed is internationally used. The attached sales evidence shows 95.36% of sales are international, with 1,357 international sales and only 66 domestic Australian sales. The top countries include the United States, United Kingdom, France, Germany and Australia. Restricting only Australia would leave almost all commercial harm intact.

I require Google to conduct one consolidated human legal review and remove or suppress worldwide:

- The Reddit result and snippets alleging Legion Killfeed collects or sells files.
- The Facebook results and snippets alleging Legion Killfeed reset-loops servers or forces players to leave communities.
- The mismatched snippet where Google attaches the reset-loop accusation to the wrong Facebook URL.
- Google share URLs, Google redirect URLs, canonical URLs, text-fragment URLs, parent-thread URLs and comment URLs for the same underlying material.
- The same defamatory allegations from snippets, panels, “Discussions and forums,” AI Mode, AI Overviews and any other Google-controlled surface.

Google must also explain why it claimed material was removed or not displayed while continuing to display the same defamatory allegations, and why it is ranking spammed competitor-linked attack material beside searches for my business. I am getting sick of dealing with this shit every goddamn week. I am sick of begging for you to abide by the goddamn law. I am sick of explaining this putrid shit to you assholes.

At this point in this kafkaesque bullshit, it is only logical to start classing this abusive run-around after repeated notice as Google being a willing participant in SkyNet Killfeed’s attempt to push me to suicide, keep helping them and you may cause the very thing that will strip any protections you think you have permanently.

Regards,

Anthony “Soul” Brodie
